

Local Agency Reporting Requirements Workshop

California Water Code §9141 (AB156)

Department of Water Resources

The Department of Water Resources Flood Project Integrity and Inspection Branch will be hosting a series of Local Agency Reporting Workshops in June 2009. These Workshops are designed to provide Local Agency representatives with a hands on demonstration of the updated electronic reporting web application developed in partnership with the California Data Exchange Center (CDEC). The web application has been developed to provide Local Agencies with access to flood control system information and to facilitate reporting under the new California Water Code (CWC §9141) requirements resulting from Assembly Bill 156.

In an initial effort to integrate CWC §9141 annual reporting requirements with recurring levee inspection requirements, a Levee Mile/Inspection Report View feature has been added to the web application for 2009. We invite you to attend one of these Workshops to test the additional functionality and new features of the web application and look forward to receiving feedback for future improvements.

Intended Workshop Audience: Local Agencies and their Representatives
