SUPPLEMENT TO STANDARD
OPERATION AND MAINTENANCE MANUAL
SACRAMENTO RIVER FLOOD CONTROL PROJECT

UNIT NO. 126
CACHE CREEK LEVEES
AND SETTLING BASIN
YOLO BYPASS TO HIGH GROUND

SECTION I
INTRODUCTION

1-01. Location. - The improvement covered by this manual is that part of the Sacramento River Flood Control Project levee and channel that is located in Yolo County, California and lies in the alluvial flood plain area from the Yolo Bypass to about 11 miles westerly of the bypass and about 3 miles northerly of Woodland, California. Description by levee mileage follows: Unit No. 1 the left bank of Cache Creek from near the town of Yolo to the Yolo Bypass, mile 0.00 to mile 11.81; a short reach upstream of the town of Yolo from mile 0.00 to mile 0.20 on the right bank of Cache Creek; Unit No. 2 on the right bank of Cache Creek from the town of Yolo to the West Training Levee from mile 0.00 to mile 6.94; Unit No. 3, the West Training Levee from mile 0.00 to 1.81; Unit No. 4, the East Training Levee from mile 0.00 to mile 2.61; also the east levee of the Settling Basin that is likewise the west levee of the Yolo Bypass extending for a distance of about 1.48 miles; and the south levee of the Settling Basin that extends for a distance of about 1.98 miles. The general location is as shown on the vicinity map, Exhibit A-1.

1-02. Project works. - The project works covered by this manual is a part of the Sacramento River Flood Control Project authorized by the Flood Control Act of 1917, as modified by the Acts of 1928, 1937, and 1941, and consists of the levees and channel of Cache Creek and settling basin from the Yolo Bypass to high ground as described in paragraph 1-01 above.

1-03. Protection provided. - Levees of Cache Creek, as described in this unit, provide direct protection to agricultural land along lower Cache Creek upstream from the Yolo Bypass and adjacent to the City of Woodland. In addition, the levees protect U. S. Highway No. 99W and alternate Highway No. 40, the mainline route and one branchline route of the Southern Pacific Railroad, several county roads and the unincorporated town of Yolo. Along the north (left bank) levee of Cache Creek the grade of the adopted flood plane profile varies from elevation 92.0 at the upper end to elevation 35.1 at the Yolo Bypass. Along the south (right bank) levee of Cache Creek the grade of the adopted flood plane profile varies from elevation 87.2 at the upper end to elevation 50.4 at its junction with the West Training Levee. Along the West Training Levee the flood
Cache Creek
at Yolo
25 Feb 58  49,000
23 Dec 64  24,200
6 Jan 65   37,800
24 Jan 70  34,000
27 Jan 83  44,500
plane profile varies from elevation 50.4 at its upper end to elevation 39.4 at the lower end. All elevations are referred to U. S. Corps of Engineers datum. Levee grades within this unit provide for a freeboard of at least 3 feet above the adopted flood plane profile. The project design flood for Cache Creek is 30,000 cubic feet per second.

\[ \text{27 Jan 1933 - OK est} = 57,000 \text{ at} \ \text{Camby} \]

1-04. Construction data and contractor. Work required by the Corps of Engineers to bring levees of this unit to project standards was accomplished under the following contracts:

a. Levee repairs along Yolo Bypass and Cache Creek was accomplished under Contract No. W-1105-eng-2036 by Haas, Doughty, Jones, Marshall & Stacy, contractors and completed on 20 September 1938.

b. Setback of the south levee of Cache Creek approximately one mile west of the Woodland-Knights Landing Bridge was accomplished by hired labor under Job Order No. 618 and completed on 15 August 1940.

c. Setback of the south levee of Cache Creek at 1/2 mile above Dunnham Ranch was accomplished by hired labor under Job Order No. 647 and completed on 31 August 1940.

d. Repair of a levee break on Cache Creek on the north levee about 3 miles west of the Woodland-Knights Landing Bridge was accomplished by hired labor under Job Order No. 634 and completed on 30 September 1940.

e. Raising and strengthening the existing south levee of the Cache Creek settling Basin was accomplished under Contract No. W-1105-eng-2881 by S. A. Marshall, contractor, and completed on 9 December 1940.

f. Repair of a break in the north levee of Cache Creek approximately 1 mile west of the Woodland-Knights Landing Bridge was accomplished by hired labor under Job Order No. 633 and completed on 17 December 1940.

g. Repair of levees on the Cache Creek settling Basin was accomplished under Contract No. W-1105-eng-2925 by Frederickson & Westbrook, contractor, and completed on 16 December 1940.

h. Enlargement of the north levee of Cache Creek from the Knights Landing Bridge to the S.P.R.R. at Yolo was accomplished under Contract No. W-1105-eng-3237 by Chas. C. Wood & W. C. Watson, Contractor, and completed on 12 June 1942.

i. Rebuilding of the north levee of Cache Creek from the S.P.R.R. branch line upstream 1,830 feet was accomplished by hired labor under Job Order No. 872, and completed on 26 August 1942.
j. Setback of the south levee of Cache Creek from the Power Line Road upstream 4.8 miles was accomplished by hired labor under Job Order No. 906, and completed on 15 November 1942.

k. Building of the East Training Levee of Cache Creek to grade and section was accomplished by hired labor under Job Order No. 893, and completed on 31 January 1943.

l. Construction of the north levee of Cache Creek from the Power Line Road east to the East Training Levee was accomplished by hired labor under Job Order No. 890, and completed on 31 March 1943.

m. Enlargement of the south levee of Cache Creek from the Power Line Road upstream 4.8 miles was accomplished under Contract No. W-1105-eng-4507 by A. Teichert & Son, contractor, and completed on 7 April 1943.

n. Setback of the south levee of Cache Creek opposite Yolo from the S.P.R.R. downstream 0.66 miles was accomplished by hired labor under Job Order No. 883 and completed on 15 September 1943.

o. Repairs to the north and south levees of Cache Creek in the vicinity of the S.P.R.R. Knights Landing Branch was accomplished by hired labor under Job Order No. 906 and completed on 15 September 1943.

p. Construction of the East Training Levee from the west levee of Yolo Bypass west 1.5 miles was accomplished under Contract No. W-04-167-eng-70 by Larson & Harms, contractor, and completed on 4 January 1944.

q. Construction of a sill at the opening of the Cache Creek Settling Basin was accomplished under Contract No. W-04-167-eng-326 by H. Earl Parker, contractor, and completed on 7 January 1944.

r. Bank protection along the west levee of the Yolo Bypass at the east end of the Cache Creek Settling Basin was accomplished by hired labor under Job Order No. 939, and completed on 31 June 1944.

s. Construction of the Settling Basin entrance channel and training levee of Cache Creek was accomplished under Contract No. W-04-167-eng-1728 by H. Earl Parker, Inc., during the period from 9 December 1949 to 28 June 1950.

t. Surfacing of the West Training Levee of Cache Creek and Settling Basin entrance channel was accomplished under Contract No. DA-04-167-eng-585 by A. Teichert & Son, Inc., during the period from 1 August 1951 to 14 August 1951.
u. Emergency levee repairs on the right bank of Cache Creek near the Settling Basin entrance channel was accomplished under Contract No. DA-04-167-CIVENG-56-248 by Lee Stephens, contractor, during the period from 26 June 1956 to 20 July 1956.

v. Emergency repairs of the south levee of the Cache Creek Settling Basin was accomplished under Contract No. DA-04-167-CIVENG-57-39 by the Fresno Paving Company during the period from 20 September 1956 to 9 November 1956.

w. Emergency repairs of the east levee of the Cache Creek Settling Basin was accomplished under Contract No. DA-04-167-CIVENG-57-77 by the Fresno Paving Company during the period from 16 October 1956 to 20 November 1956.

x. Construction of the levees of Cache Creek from Yolo Bypass to high ground was accomplished under Contract No. DA-04-167-CIVENG-60-98 by A. Teichert & Son, Inc., during the period from 11 July 1960, to 21 February 1961.

y. Stone protection along the Yolo Bypass was accomplished under Contract No. DA-04-167-CIVENG-64-74 by the Chandler-Newman Construction Company during the period from 14 April 1964 to 12 August 1964. Specification No. 2917, Drawing No. 50-4-3735.

z. Emergency repairs to project levees on Cache Creek, Yolo County, was accomplished under Contract No. DACW05-83-C-0140 by Dave Mendez, Inc. Specification No. 6878 Drawing No. CC-4-34.

aa. Bank protection work along the west levee of Yolo Bypass, Levee Mile 0.25 to 1.52, was completed on 22 November 1983 by the Department of Water Resources under Contract No. DACW05-83-C-0147.

ab. Enlargement of Cache Creek Settling Basin and enlargement of the North, East, and West levees, construction of a new South levee, a new training levee, a training channel, a roller compacted concrete weir, a low flow channel, and a low flow outlet structure was completed on August 31, 1993 under Contract No. DACW05-919C-0101, Specification No. 8528, and Drawing No. CC5-4-70. (See separate O&M manual title “Cache Creek Settling Basin Enlargement” as addition to Unit 126)

1-05. **Flood Flows.** For purposes of this manual, the term “flood” or “high water period” for Cache Creek shall refer to flows when the water surface in Cache Creek reaches or exceeds the reading of 25.0 on the U.S. Geological Survey gage located on the left bank of Cache Creek on the abutment of an old county bridge about 800 feet upstream from the U.S. Highway 99 W Bridge. The continuous water stage recorder and staff gage is set with zero at 52.3 feet U.S.G.S. datum.

1-06. **Assurances provided by local interests.** - Assurance of cooperation by local interests is provided by state legislation as contained in Chapter 3, Part 2, Division 5 of the state Water Code. (See paragraph 2-02a of the Standard Manual).
1-07. **Acceptance by the State Reclamation Board.** – Responsibility for operating and maintaining the completed flood control work along Cache Creek, the Cache Creek Settling Basin and Training Levees was accepted by the state Reclamation Board by letter dated 17 February 1961, as shown on the attached letter, EXHIBIT F.

1-08. **Inspection procedure.** - Since the enactment of State Legislation of Chapter 1528, Statutes of 1947, the Department of Water Resources, State of California, has made semi-annual inspections of all levees of authorized flood control projects in the Sacramento-San Joaquin drainage basin pursuant to the Federal Regulations of 16 August 1944 (Title 33) and reports its findings to the local agency, the State Reclamation Board and the Sacramento District, Corps of Engineers, U. S. Army. This activity, initiated pursuant to Section 208.10(a) of the Federal Regulations, has in effect provided for transfer from the local agencies to the State Department of Water Resources the obligation of…… (continued on page 5)
compliance with Sections 8371, 6372, and 8373 of the Water Code of the State of California. These sections of the Code require the local responsible agencies to submit a report to the State Department of Water Resources on or before 1 June of each year on the condition of the levees within their jurisdiction. Supervisory powers and duties of the Department are applicable to all works of the Sacramento River Flood Control Project maintained and operated by the local agencies without regard to status of completion, or expenditure of Federal funds on the construction of such works.

The following procedure is used in inspecting the levees of the responsible maintaining agency:

Personnel of the State Department of Water Resources make a detailed inspection in the spring and fall of each year and made a report on any required maintenance. The inspection objectives are to determine if the following items, which are a condensation of Federal Regulations, are being adhered to:

a. That all brush, trees and wild growth other than sod are removed from the levee crown and slopes.

b. That all weeds, grass and debris on the levee have been burned during the appropriate season, where not dangerous or impractical.

c. That all grass and weeds on the levee have been mowed where removal by burning is dangerous or impracticable. This applies only on peat levees or where burning would constitute a hazard to improvements.

d. That all burrowing animals have been exterminated.

e. That all caves, sloughs, burrows, holes, slips or other damaged portions of the levee have been repaired.

f. That all irrigation and drainage structures through the levee are in good working condition.

g. That no revetment work or riprap have been displaced, washed out or removed.

h. That the crown of the levee is well shaped and maintained and that unauthorized vehicular travel is restricted.

i. That stock grazing on the levee is restricted to conditions and seasons when the levee would not be seriously scarred or otherwise damaged thereby.

j. That encroachments are not being erected on the levee which would hinder travel by authorized patrol vehicles.
k. Prevent the erection of structures on, additions to, or alterations of, the levee unless authorized by permit from the State Reclamation Board.

Following this detailed inspection a joint field inspection is made with representatives of the responsible maintaining agency and the State Department of Water Resources to review and discuss the inspection report.

Upon completion of the fall inspection the State Department of Water Resources publishes an annual report entitled, "Status of Project Levee Maintenance" which indicates the degree of proficiency attained by each obligated local agency in providing required maintenance.
SECTION II
FEATURES OF THE PROJECT SUBJECT TO FLOOD CONTROL REGULATIONS

2-01. Levees.

a. Description. Levees described in this manual lie along both banks of Cache Creek from the Settling Basin Entrance Channel upstream about 7.8 miles along the left bank and about 6.9 miles along the right bank (south levee), the north levee extends for a distance of about 3.8 miles; the east levee of the Settling Basin is about 1.2 miles long with a weir near the center about 0.3 miles long; the south levee of the Settling Basin 2.0 miles long; and the two training levees are about 2.5 miles long, each. The levees have been reconstructed with slopes of 1 on 3 waterside and 1 on 2 landside with a crown width of 12 feet, except the north levee and the East Settling Basin levee that has a crown width of 20 feet. The necessary drainage structures, road approaches, bank protection, and appurtenances were also included in the work. For more complete detail in construction of the above-mentioned levees, refer to the "As Constructed" drawings of EXHIBIT B.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(1) Maintenance-paragraph 4-02 of the Standard Manual.

(2) Suggested Check Lists - EXHIBIT E of this Supplement Manual.

(3) Operation - paragraph 4-04 of the Standard Manual.

(4) Special Instructions - paragraph 4-05 of the Standard Manual.

c. Settling Basin. The Cache Creek Settling Basin Entrance Channel and Training Levees portion of the project consists of the excavated channel and the east and west training levees of Cache Creek located near the mouth of Cache Creek at its junction with the Yolo Bypass. The purpose of the project works is to give protection to adjacent agricultural lands against flood flows and to provide a means for control of sediment deposits whereby silt and debris will be deposited against the south levee of the Settling Basin hence progress upstream as the sediment accumulates. Due to the fact that the plan of operation for control of the settling basin involves breaching of the lower end of the east training levee as required to regulate deposition of sediment, above quoted regulations may be somewhat modified for the east training levee. Encroachment of debris deposits in the Settling Basin cannot be predicted in advance, therefore, a schedule or plan for control of debris and breaching of the east levee cannot be advanced. It will be necessary to meet the problem as it arises in the future.
2-02. **Drainage and irrigation structures.**

a. Description. Drainage and irrigation structures which extend through the levee are listed as follows:

<table>

**South Levee of Cache Creek Settling Basin**

Note on abbreviations:

CMP = Corrugated Metal Pipe
W.S. = Water Side

b. For pertinent Requirements of the Code of Federal Regulations and other requirements, see the following:

2. Suggested Check Lists - EXHIBIT E of this Supplement Manual.

2-03. Channels. -

a. Description. The main channel and floodway of Cache Creek lies adjacent to and between the levees as described in paragraph 1-02. The project design capacities of said channels are as listed in paragraph 1-03 of this manual.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements, see the following:

(2) Suggested Check Lists - EXHIBIT E of this Supplement Manual.

(4) Safety Requirements - 6-05 of the Standard Manual.

It shall be the duty of the local agency responsible for maintenance to keep in contact with the State Department of Water Resources' Flood Operation Center during all periods of flood danger, and maintain a patrol of the project works in their area during periods of flood in excess of a reading of 25.0 on the gage located on the left bank of Cache Creek upstream from the town of Yolo, as referred to in paragraph 1-05 of this manual.

The Flood Operations Center is responsible for data collection and issuance of a joint river forecast with the U. S. Weather Bureau and coordinates with the Sacramento District Engineer, and other agencies to keep appraised of the current situation in accordance with terms of the Memorandum of Understanding dated 1 November 1956, between the Division Engineer, U. S. Army Engineer Division, South Pacific, and the Director, Department of Water Resources, State of California for cooperative action during flood emergencies.

2-04. Miscellaneous facilities. -

a. Description. Miscellaneous structures or facilities which were constructed as a part of, or in conjunction with, the protective works, and which might affect their functioning, include the following:
(1) **Bridges.**

(a) County Road No. 102 Bridge located at about station 532+00.

(b) S.P.R.R. Bridge branch line located at about station 450+80.

(c) Alternate U. S. Highway No. 40 Bridge (State Hyw. No. 24) located at about station 413+00.

(d) S.P.R.R. Bridge located at about station 244+50 near Yolo.

(e) U. S. Highway 99W Bridge (abandoned) located at about station 243+50.

(f) U. S. Highway 99W Bridge (new) located at about station 241+90.

(2) **Utility relocation.** Because of the nature of the construction of structures by local interests, records of utility relocations are not available.

(3) **Hydrologic facilities.** U. S. Geological Survey continuous recorder and staff gage located on the left bank of Cache Slough about 700 feet upstream from U. S. Highway 99W Bridge (new). This gage to be maintained by the U.S.G.S.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements, see the following:

(1) **Maintenance** - paragraph 7-02 of the Standard Manual.

(2) **Suggested Check Lists** - paragraph 7-03 of the Standard Manual.

(3) **Operation** - paragraph 7-04 of the Standard Manual.
SECTION III
REPAIR OF DAMAGE TO PROJECT WORKS AND
METHODS OF COMBATING FLOOD CONDITIONS

3-01. Repair of damage. - In the event of serious damage to the project works, whether due to flood conditions or other causes, and which may be beyond the capability of local interests to repair, the local agency responsible for maintenance will contact a representative of the Department of Water Resources, State of California, who coordinates maintenance of project works of the Sacramento River Flood Control Project. The State representative will give assistance or advise, or will determine appropriate action to be taken.

3-02. Applicable methods of combating floods. - For applicable methods of combating flood conditions, reference is made to Section VII of the Standard Operation and Maintenance Manual, revised May 1955, where the subject is fully covered.

Instructions for Completing Sheet 2, Exhibit E  
(To be printed on back of Sheet 2)

Item (a)  Indicate levee station of observation, obtained by pacing from nearest reference point; indicate right or left bank.

Item (b)  If sufficient settlement of earthwork has taken place to be noticeable by visual observation, indicate amount of settlement in tenths of a foot. If sloughing has caused a change in slope of the embankment sections, determine the new slope. Note areas where erosion or gullying of the section has occurred.

Item (c)  If sufficient erosion or gullying of back face of back toe of levee has taken place to be noticeable by visual inspection, indicate area affected and depth.

Item (d)  Note any natural change in any section of roadway or ramps. Indicate any inadequacy in surface drainage system.

Item (e)  Indicate any evidence of seepage through the embankment section.

Item (f)  Indicate the serviceability of all farm gates across the embankments and roadway, and indicate if repainting is required.

Item (g)  Indicate maintenance measures that have been performed since last inspection and their condition at the time of this inspection.

Item (h)  Record opinion, if any, of contributory causes for conditions observed and also any observations not covered under other columns.

NOTE: One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion, and one copy is to be attached to and submitted with the Superintendent's semi-annual report.
SUGGESTED CHECK LIST NO. 3

CHANNEL AND RIGHT-OF-WAY

UNIT NO. 126

Inspector's Report Sheet No. __________ Inspector __________

Date ___________ Superintendent __________

(a) Name of Channel and location by Stations

(b) Vegetal growth in channel

(c) Debris and refuse in channel

(d) New construction within right-of-way

(e) Extent of a aggradation or degradation

(f) Condition or riprapped section

(g) Condition of bridges

(h) Measures taken since last inspection

(i) Comments

EXHIBIT E
Sheet 4 of 7
Instructions for Completing Sheet 4, Exhibit E
(To be printed on back of Sheet 4)

Item (a) Indicate station of observation obtained by pacing from nearest reference point.

Item (b) Note nature, extent, and size of vegetal growth within the limits of flood flow channel.

Item (c) Note nature and extent of debris and refuse that might cause clogging of the conduits of the irrigation intake works, fouling of the tailwater gates, or the bridges over the channel.

Item (d) Report any construction along the diversion channel or above the diversion channel or above the diversion works that has come to the attention of the inspector and that might affect the functioning of the project.

Item (e) Indicate any change in grade or alignment of the channels, either by deposition or sediment or scour, that is noticeable by visual inspection. Estimate amount and extent.

Item (f) Indicate any change that has taken place in the riprap such as disintegration of the rock, erosion, or movement of the rock. Note the presence of vegetal growth through the riprap.

Item (g) Note any damage or settlement of the footings of the bridges. Indicate condition of wooden structures and if repainting is required. Indicate condition of bridge approaches, headwalls, and other appurtenances.

Item (h) Indicate maintenance measures that have been performed since the last inspection and their condition at time of this inspection.

Item (i) Record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

NOTE: One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion and one copy is to be attached to and submitted with the Superintendent's semi-annual report.

Instructions for Completing Sheet 6, Exhibit E
(To be printed on back of Sheet 6)

(1) Enter station of all structures under Column (a) for check list.

(2) Inspect inlet, barrel, and outlet for accumulation of sediment, rubbish, and vegetal matter. Note condition under Column (c).

(3) If any settlement or damage to the pipe, barrel, or invert of the drain has occurred, estimate the location and amount. Note particularly if any backfill has come into the pipe or been disturbed. Record observations under Column (d).

(4) Inspect the concrete portions of the structures for evidence of settlement, cracks, "pop-outs", spaces, abrasive wear, or other deterioration. Record conditions under Column (e).

(5) Inspect backfill area adjacent to structure for evidence of erosion caused by overflow of the drainage structure and note conditions in Column (f).

(6) Under Column (g) indicate physical measures that have been taken to correct conditions reported in last inspection, and their condition at time of this inspection.

(7) Under Column (h) record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

(8) A copy of the inspector's report is to be mailed to the District Engineer immediately on completion, and a record copy shall be attached to the Superintendent's semi-annual report.

LETTER OF ACCEPTANCE BY

THE STATE RECLAMATION BOARD
Ms. Leslie M. Gallagher  
Executive Officer  
Central Valley Flood Protection Board  
3310 El Camino Avenue, Room 151  
Sacramento, CA 95821

Dear Ms. Gallagher:

The purpose of this letter is to notify the Central Valley Flood Protection Board of the completion of an effort to update the Operation and Maintenance Manual Supplements for the Sacramento River Flood Control Project and the Lower San Joaquin River Levees and Lower San Joaquin River and Tributaries Project. These updates are a compilation of revisions made to the project over time and where we had record of a transfer letter to the Board. These updated supplements are the most current version and should be utilized as the baseline version for any future project modifications.

This process and the compiled updates have been coordinated with the Central Valley Flood Protection Board and Department of Water Resources staffs for review and comment. All comments have been addressed or incorporated into the manuals.

The Board staff has been provided a copy of the manuals in electronic format. Future updates will include entire unit supplements so updates can be seen in context with the entire unit supplement. The list of completed supplements, by the unit number and title, are attached. If you have any questions regarding this transmittal, please contact Gary Kamei at 916-557-6845.

Sincerely,

[Signature]

David G. Ray, P.E.  
Colonel, U.S. Army  
District Commander

December 2, 1993

Navigation and Flood Control Unit

The Reclamation Board
State of California
1416-9th Street, Room 455-6
Sacramento, California 95814

Members of the Board:

You are hereby notified that the Corps of Engineers has completed the enlargement of Cache Creek Settling Basin under authority of the Water Resources Development Act of 1986 (P/L 99-662). Minor work items requested by your Board remain to be completed and will be accomplished under a follow on contract scheduled to be issued next year.

The completed functional work consists of the enlargement of the north, east and west levees, construction of a new south levee, a new training levee, a training channel, a roller compacted concrete weir, a low flow channel, and a low flow outlet structure.

The work was completed on August 31, 1993, in accordance with Contract Number DACW05-91-C-0101, Specification Number 8528, and Drawing Number CC5-4-70. Therefore, the completed work is hereby transferred to the State of California for operation and maintenance as of the date of this letter.

The completed work will be operated and maintained in accordance with the Local Cooperation Agreement between the Department of the Army and the State of California dated March 12, 1990. An Operation and Maintenance Manual will be prepared for this work and furnished to your office at a later date.
We are aware of your concerns regarding the accumulated sediment in the training channel, the leaking gate at the low flow outlet structure, and the possible erosion of the railroad trestle foundation due to releases from the low flow outlet. The leaking gate will be repaired, if required, under the provisions of the contract warranty. The accumulated sediment will be removed in the follow-on contract if studies currently underway indicate that this is necessary. We will review the possible erosion of the railroad trestle foundation and include any repairs attributed to the operation of the low flow outlet in the follow-on contract.

Sincerely,

John N. Reese
Colonel, Corps of Engineers
District Engineer

Navigation and Flood Control Unit

The Reclamation Board
State of California
1416 - 9th Street, Room 455
Sacramento, California  95814

Members of the Board:

You are hereby notified that the bank protection work along the Yolo Bypass west levee (Unit 2, L.M. 0.25 + to 1.52 +) has been completed by the Department of the Water Resources. The quarry stone was furnished and delivered to the work site by this office under Contract Number DACWD5-83-C-0147 under the general authority of the Flood Control Act of December 22, 1944 (Public Law 534, 78th Congress, 2nd Session) as amended.

Therefore, said flood control work, together with the waterway banks contiguous thereto, are transferred as of November 10, 1983 to the State of California for operation and maintenance. The work shall be maintained in accordance with the requirements of the Sacramento River Major and Minor Tributaries Flood Control Project.

This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Number 125, Sacramento River Flood Control Project. Copies will be furnished your office at a later date.

Sincerely,

Arthur E. Williams
Colonel, Corps of Engineers
District Engineer

Members of the Board:

You are hereby notified that the Corps of Engineers has completed emergency repairs to project levees under authority of Section 5 of the Flood Control Act of August 18, 1941, as amended (Public Law 99, 84th Congress, 1st Session). The work was completed on October 28, 1983 and consisted of repairing the right bank levees of Cache Creek and the settling basin in accordance with Contract Number DACWO5-83-C-0140 and Drawing Number CC-4-34. This work shall be maintained in accordance with the assurances which your Board provided for the Sacramento River Flood Control Project. This portion of the work shall be added by amendment to the Operation and Maintenance Manual, Supplement Number 126, Sacramento River Flood Control Project. Copies will be furnished your office at a later date.

Sincerely,

Arthur E. Williams
Colonel, Corps of Engineers
District Engineer
THE RECLAMATION BOARD

District Engineer
Corps of Engineers
U. S. Army
P. O. Box 1739
Sacramento, California - 95808

Dear Sir:

Reference is made to your letter of 25 August 1964, concerning transfer to the State of California of stone revetment on waterside slope of west Yolo Bypass levee, beginning from Sacramento Northern Railroad crossing running upstream 0.31 mile to south end of Cache Creek weir, and from north end of Cache Creek weir upstream 0.79 mile, and stone revetment on waterside slope of Yolo Bypass east levee, beginning at Sacramento Deep Water Channel and running upstream 1.55 miles to Yolo Causeway, in accordance with Specification No. 2917.

The Reclamation Board, at its meeting of September 3, 1964, formally accepted the above referred to work for operation and maintenance.

Sincerely yours,

A. E. McCOLLAM /s/

Sacramento, California 95814

Gentlemen:

Reference is made to joint inspections made on 22 July and 4 August 1964, on the Yolo Bypass Levee Revetment Sites No. 1 & 3, for the purpose of transferring them, upon completion, to the State of California for operation and maintenance.

The flood control work performed is described as follows:

a. Site No. 1 - Placement of stone revetment on the waterside slope of the west Yolo Bypass levee, beginning from the Sacramento-Northern Railroad crossing and running upstream 0.31 mile to the south end of the Cache Creek weir, and from the north end of the Cache Creek weir upstream 0.79 mile.

b. Site No. 3 - Placement of stone revetment on the waterside slope of the Yolo Bypass east levee, beginning at the Sacramento Deep Water Channel and running upstream for a distance of 1.55 miles to the Yolo Causeway, U.S. Highway Interstate 80.

c. This work was performed under the general authority of the Sacramento River Major and Minor Tributaries Flood Control Project, which was authorized by the Flood Control Act of 22 December 1953 (Public Law 534, 78th Congress, 2d Session).

d. The work was completed on 12 August 1964 in accordance with Specification No. 2917, Contract No. DA-04-167-CIVENG-64-74 and Drawing No. 50-4-3735.

The flood control work described above now meets the requirements of the Sacramento River Major and Minor Tributaries Flood Control Project (Supplement of the Sacramento River Flood Control Project) and is hereby transferred to the State of California for operation and maintenance.
These sites will be added by amendment to the O&M manual, Supplement Nos. 116 & 126, Sacramento River Flood Control Project, and furnished to your office at a later date.

Sincerely yours,

ROBERT B. MATHE
Colonel, CE
District Engineer

Engr Div-Prog Dev
Valley Resident Ofc
F & A Branch
The Reclamation Board
State of California
1215 "O" Street
Sacramento 14, California

Gentlemen:

Reference is made to the joint inspection made on 10 January 1961
of flood control work along Cache Creek and Settling Basin Training
Levees, for the purpose of transferring this work, upon completion, to
the State of California for operation and maintenance.

This work, consisting of levee construction and modification on
Cache Creek and Settling Basin Training Levees from Yolo Bypass to High
Ground, is completed in accordance with Specification No. Z-274; Contract
No. DA-04-167-CIVING-60-93 and Drawing No. 50-4-3227.

The flood control work described above now meets the requirements
of the Sacramento River Flood Control Project. Therefore, said flood
control work, together with the waterway banks contiguous thereto, are
transferred to the State of California for operation and maintenance.

It is to be noted that the levee construction and modification work
described above combined with other flood control work previously trans-
ferred to your jurisdiction now form continuous completed levee reaches
on both banks of Cache Creek and Settling Basin Training Levees extending
from Yolo Bypass to high ground. This completes all work on Cache Creek
except for Item No. 82-1, "Reconstruction of dammed weir structure
along east levee Cache Creek Settling Basin", outlined in supplement
dated 25 November 1957, to Memorandum of Understanding entered into with
the State of California covering added items of work at critical loca-
tions required to complete the Sacramento Flood Control Project.

The maintenance work required under the provisions of the Sacramento
River Flood Control Project shall be performed in accordance with
existing Flood Control Regulations, inclosed herewith, which have been
prescribed by the Secretary of the Army pursuant to Section 3 of the Act
of Congress, approved 22 June 1936, as amended and supplemented by the
current issue of the Standard Operation and Maintenance Manual for the
SPKO-C
The Reclamation Board

Sacramento River Flood Control Project. As provided under Paragraph 206.10(10) of these regulations, a supplement to the Standard Operation and Maintenance Manual covering these units of work is in process of preparation and will be furnished to you upon completion.

A copy of this letter is being transmitted to the Department of Water Resources.

Sincerely yours,

H. E. Turner
Colonel, CH
District Engineer

Gentlemen:

Reference is made to your letter of 22 June 1961 acknowledging that certain reaches of the levees of the Sacramento River Flood Control Project and the waterway bank contiguous to said levee reaches meet the requirements of the project as authorized prior to the Flood Control Act of 1961.

The levee reaches in question are located as follows:

- **a. Northerly levees of the American River from Jibboon Street Bridge to Sacramento River.**

- **b. Easterly levees of the Sacramento River.**
  1. American River to Natomas Cut, 60.25 to 79.5, 134
  2. At Moulton Weir. (Man 2), 154
  3. Mile 153.5 (North and Moulton Weir) to Mile 164.4 (Princeton Ferry). (Man 2), 138
  4. Mile 166.5 to Mile 168.9 (at Butte City). (Man 2), 138

- **c. Wasterly levees of the Sacramento River.**
  1. Mile 59.9 to Mile 60.78. 110
  2. Mile 61.5 to Mile 62.66 (at Bryte Bend) 110

Items 140 to 198

The Reclamation Board

5. Southerly levees of Knights Landing Ridge Cut (cont’d)

(3) From a point 3,300 feet westerly from Yolo Bypass to a point 7,100 feet westerly from Yolo Bypass.

Also covered under Unit No. 46-4.

7. That portion of the back or westerly levees of Hastings Tract which runs east and west along the County Road for a distance of approximately one mile.

u. Northerly levees of Sycamore Slough from Sacramento River to Knights Landing Outfall Gates.

v. Southerly levees of Sycamore Slough from Sacramento River to Knights Landing Outfall Gates.

The records of this office show that your Board has accepted the levees and/or works covered by Items b, (1), b, (2), b, (3), c, (2), c, (4), c, (6), c, (8), c, (11), c, (12), c, (14), d, (1), d, (3), d, (6), d, (8), f, (3), f, (5), f, (6), g, (1), h, (1), h, (2), h, (3), h, (5), n, (3), n, (7), n, (8), g, (3), g, (5), g, (6), h, (1), and s, (1) above, as complete. Accordingly the waterway bank contiguous to said Items is hereby transferred to the State of California for maintenance and operation.

The levees covered by Items a, b, (4), c, (1), c, (3), c, (4), c, (6), c, (7), c, (9), c, (10), c, (13), c, (15), c, (16), d, (2), e, (1), f, (1), f, (2), f, (4), f, (6), j, k, (1), n, (4), n, (5), n, (6), n, (7), n, (8), u, and v, above, although complete has not been formally transferred as contemplated by the project documents. Accordingly the levees covered by said Items, together with the waterway bank contiguous thereto, is hereby transferred to the State of California for maintenance and operation.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress approved 22 June 1936, as amended and supplemented. As provided under paragraph 208.10(10) of these regulations, a maintenance manual covering these works is in process of preparation and will be furnished your Board upon completion.

A copy of this letter is being transmitted to the State Engineer.

Sincerely yours,

H. R. Ralston

4 DEC 1951

The Board accepted Item No. 9 on 18 Dec. 1951 with the
condition that the Federal Gov. complete the enlargement of the levee
with no obligation for the State to maintain the banks along
the Sacramento Deep Water Channel.

The Board also accepted Items No. 10 and 11 on
18 Dec. 1951, without reservations other than an statement
indicating that flatter slopes on this levees are not required.

Item No. 9 was previously accepted on 6 June 1951.

Gentlemen:

Reference is made to your letter of 18 May 1951 acknowledging that
certain reaches of the levees of the Sacramento River Flood Control
Project and the waterway bank contiguous to said levee reaches meet the
requirements of the project as authorized prior to the Flood Control
Act of 1944.

The levee reaches in question are located as follows:

Reach No. 32
a. Wasterly levee of the Yolo Bypass from Fremont Weir to
   Miners Slough: 127, 128, 129, 130, 140, 109, 103, 105

Reach No. 33
b. Northerly levee of Sacramento Bypass: 122

Reach No. 33
i. Southerly levee of Sacramento Bypass: 110

The records of this office show that on 6 June 1951 your Board
accepted the levees covered by Item a, above as complete. Accordingly,
the waterway bank contiguous to said Item a, is hereby transferred to
the State of California for maintenance and operation.

The levees covered by Items b, and c, above although complete has
not been formally transferred as contemplated by the Project documents.
Accordingly, the levees covered by said Items b, and c, together with the
waterway bank contiguous thereto, is hereby transferred to the State of
California for maintenance and operation.

The maintenance work required under the provisions of the Sacramento
River Flood Control Project shall be performed in accordance with existing

Reaches 32 and 33

Items 9 to 11

Dear Sir:

Reference your file PSKKO-P 8243 (Cache Creek) in which you advised this office of the state of completion of the Cache Creek Settling Basin Entrance Channel and Training levee and transferred the same to the State of California as of November, 1950, contingent upon the provisions indicated in your letter of 16 November 1950 relative to the graveling of the crown of the easterly training levee along certain stretches, including the construction of turnouts essential for vehicular travel.

The project is hereby accepted on behalf of the State of California for maintenance contingent upon the provisions of graveling be completed in accordance with your letter.

Yours very truly

THE RECLAMATION BOARD
A. M. BARTON
Chief Engineer and General Manager

By

S. A. HONAKER
Assistant Secretary

The Reclamation Board
State of California
1100 "O" Street
Sacramento 14, California

Gentlemen:

Reference is made to letter from this office dated 23 June 1950 and letter from your office dated 26 June 1950 wherein a procedure for transfer of completed units of the Sacramento River Flood Control Project was proposed and accepted respectively. Reference is also made to letter from this office dated 16 November 1950 indicating that the flood control works covering the Settling Basin Entrance Channel and Training levee of Cache Creek near Woodland, California, are considered in suitable condition for transfer to the State of California for maintenance under the terms of the project document. At the same time it is indicated in this letter that the Corps of Engineers will perform additional work, recommended by the State Engineer, when funds are made available. This work will consist of graveling the crown of the easterly training levee for a distance of approximately 1.25 miles and along the entire length of the westerly levee of Cache Creek Settling Basin and will include construction of turnouts essential for vehicular travel.

In accordance with the two letters referred to above said "Settling Basin Entrance Channel and Training Levees" of Cache Creek located near Woodland, California, completed 28 June 1950 under Contract DA-OL-167-eng-1728, by H. Earl Parker, contractor, is hereby transferred to the State of California as of 15 November 1950, contingent on the provisions indicated in the letter of 16 November 1950 referred to above.

There is inclosed a copy of the Flood Control Regulations prescribed by the Secretary of the Army pursuant to the provisions of Section 3 of the Act of Congress approved 22 June 1936, as amended and supplemented, to govern the maintenance and operation of flood control works, of which

Unit 38A

District Engineer

Unit 38A
February 17, 1961

District Engineer
Sacramento District
U. S. Corps of Engineers
P. O. Box 1739
Sacramento, California

Dear Sir:

Reference is made to your letter of February 10, 1961, File SPKK0-C regarding transfer to the State of the flood control work along Cache Creek and the Cache Creek Settling Basin and Training Levees.

The Reclamation Board at its meeting of February 16, 1961, formally accepted this levee section for operation and maintenance.

Reference is made to the next to last paragraph of your letter stating that under Paragraph 208.1(10) of your regulations, a supplement to the Operation and Maintenance Manual covering the transferred units of work is in the process of preparation and will be furnished to us upon completion. A portion of this project, consisting of the south levee of Cache Creek from Highway 99 upstream to high ground is being transferred to Yolo County for operation and maintenance. It is requested that we be furnished an additional supplement to the Standard Operation and Maintenance Manual for the use of Yolo County in maintaining the section of levee that was transferred to them.

Sincerely yours,

A. N. MURRAY
General Manager and Chief Engineer

SUGGESTED SEMI-ANNUAL REPORT FORM
TO: The District Engineer
Sacramento District
Corps of Engineers
1209 - 8th Street
Sacramento, California

Dear Sir:

The semi-annual report for the period (1 May 19__ to 31 October 19__) (1 November 19__ to 30 April 19__) Unit No. 125 of the Sacramento River Flood Control Project is as follows:

a. The physical condition of the protective works is indicated by the inspector's report, copies of which are inclosed, and may be summarized as follows:

(Superintendent's summary of conditions)

It is our intention to perform the following maintenance work in order to repair or correct the conditions indicated:

(Outline the anticipated maintenance operations for the following 6 months.)

b. During this report period, major high water periods (water level at 25.0 on the gage on the left bank of Cache Creek near Yolo) occurred on the following dates:

<table>
<thead>
<tr>
<th>Dates</th>
<th>Maximum Elevation</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

EXHIBIT G
Sheet 1 of 2
Comments on the behavior of the protective works during such high water periods are as follows:

(Superintendent's log of flood observations)

During the high water stages when the water level reached a height of _________, on the gage or excess thereof (dates) ________, it was necessary to organize and carry out flood operations as follows:

(See Maintenance Manual _________.)

c. The inspections have indicated (no) or (the following) encroachments or trespasses upon the project right-of-way.

d. (no) _________ permits have been issued for (the following) improvements or construction within the project right-of-way.

Executed copies of the permit documents issued are transmitted for your files.

e. The status of maintenance measures, indicated in the previous semi-annual report as being required or as suggested by the representatives of the District Engineer, is as follows:

(Statement of maintenance operations, item by item with percent completion.)

f. The fiscal statement of the Superintendent's operations for the current report period is as follows:

<table>
<thead>
<tr>
<th>Labor</th>
<th>Material</th>
<th>Equipment</th>
<th>Overhead</th>
<th>Total</th>
