SUPPLEMENT TO STANDARD
OPERATION AND MAINTENANCE MANUAL
SACRAMENTO RIVER FLOOD CONTROL PROJECT

UNIT NO. 133
LEVELS OF RECLAMATION DISTRICT NO. 1660

EAST LEVEE OF SACRAMENTO RIVER
FROM
WINSHIP SCHOOL TO TISDALE BY-PASS
AND
NORTH LEVEE OF TISDALE BY-PASS
AND
WEST LEVEE OF SUTTER BY-PASS
FROM
LONG BRIDGE TO TISDALE BY-PASS

SECTION I
INTRODUCTION

1-01. Location. The improvement covered by this manual is that
part of the Sacramento River Flood Control Project which includes the
east levee of the Sacramento River from Winship School downstream to
Tisdale By-pass, the north levee of Tisdale By-pass and the west levee
of Sutter By-pass from Long Bridge downstream to Tisdale By-pass. Sutter
and Tisdale By-passes are leveed floodways which convey excess flood
waters from the Sacramento River. The main channel of the Sacramento
River within this unit is leveed along both banks and conveys normal
flows in addition to flood flows of the Sacramento River system. The
levees of this unit are located in Reclamation District No. 1660, in
Sutter County, California, in the general vicinity of the town of
Meridian. The location of the completed unit covered by this manual
is shown on Exhibit A-1. This manual covers and supersedes a portion
of the supplemental manual issued by this office which was designated
as Unit No. 10 (east levee of Sacramento River between Meridian Bridge
and Tisdale Weir) and which is now obsolete and should be destroyed.

1-02. Protection Provided. The main channel of the Sacramento
River, Sutter By-pass, and Tisdale By-pass located within Unit No. 133
are essential features of the Sacramento River Flood Control Project.
The primary function of the by-passes is to carry excessive overflow
waters of the Sacramento River and its tributaries. The levees of
this unit provide protection to adjacent agricultural lands and the
town of Meridian against flood waters of the Sacramento River, Tisdale
By-pass and Sutter By-pass. The grade of the adopted flood plane profile
in the Sacramento River varies from elevation 57.0 at Winship School to
elevation 54.49 upstream from Tisdale Weir. The grade of the adopted flood plane profile along Tisdale By-pass varies from elevation 53.0 downstream from Tisdale Weir to elevation 50.2 at Sutter By-pass. And the grade of Sutter By-pass varies from elevation 56.7 at Long Bridge to elevation 50.2 at its junction with Tisdale By-pass. All elevations are referred to U. S. Corps of Engineers datum. The levee project grade along Sutter By-pass and Tisdale within this unit provide a freeboard which equals or exceeds 6 feet. Along the Sacramento River the levee grade provides a freeboard of 3 feet or greater above the flood plane profile. The project design capacity of the Sacramento River is 66,000 cubic feet per second; Sutter By-Pass is 178,000 cubic feet per second and Tisdale By-pass is 38,000 cubic feet per second within this unit.

1-03. Project Works. The flood-control improvement covered by this manual is a part of the Sacramento River Flood Control Project authorized by the Flood Control Act of 1917 as modified by the Acts of 1928, 1937, and 1941, and consists of:

a. The east levee and banks of the Sacramento River from Winship School southerly (downstream) 3.0 miles to Tisdale Weir as constructed by local interests and/or as reconstructed by levee setbacks and bank protection works by the Corps of Engineers to adopted grade and section and as provided with gravel surfacing for patrol road purposes.

b. The north levee and channel of Tisdale By-pass from the Sacramento River to Sutter By-pass as built by local interests and re-constructed by the Corps of Engineers to adopted grade and section.

c. The west levee of Sutter By-pass from Long Bridge southerly (downstream) 10.1 miles to its junction with the north levee of Tisdale By-pass as constructed by local interests and/or as enlarged by the Corps of Engineers to adopted grade and section.

1-04 Construction Data. Unit No. 133 of the flood control works described in this manual forms an integral part of the Sacramento River Flood Control Project. In addition to emergency bank protection work and building of levees by local interests, the construction to bring this unit to project standards was completed in three sections described as follows:

a. Section I. Enlargement to adopted grade and section of the west levee of Sutter By-pass from Long Bridge southerly (downstream) 10.1 miles to its junction with Tisdale By-pass and north levee of Tisdale By-pass. Work on this section was completed under two contracts. The north levee of Tisdale By-pass was completed on 8 May 1941 and the west levee of Sutter By-pass portion was completed on 27 November 1941.

b. Section II. Levee setback and bank protection work on the east levee of the Sacramento River from Winship School southerly (downstream) 3.0 miles to Tisdale Weir. Work was started on 5 June 1950 and completed on 17 Nov 1951.
c. **Section III.** Site “D”, levee enlargement and bank protection on the left bank (east levee) of the Sacramento River from mile 118.9 to mile 119.4. Work on this portion was started on 1 July 1952 and completed on 17 February 1953.

d. **Section IV.** Bank protection work on the right bank (west levee) of Sutter Bypass from Oswald Bridge to Tisdale Bypass. Work on this portion was started on 6 May 1964 and completed on 14 October 1964.

e. **Section V.** Bank protection, right and left banks Sacramento River at various locations between Colusa and Boyers Bend. Work on this portion was started on 22 September 1964 and completed on 5 November 1965.

f. **Section VI.** Stone protection, bank sloping and selective clearing on the left bank of the Sacramento River at Site Mile 120.1 (a portion of Unit 26) was accomplished under Contract No. DACW05-73-C-0059 by Luhr Brothers, Inc. during the period from 7 December 1972 to 15 November 1974. Specification No. 4251, Drawing No. 50-4-4777.

**g. Section VII.** Stone protection, bank sloping and selective clearing on the left bank of the Sacramento River at Site Miles 119.8, 120.3, 121.5, and 121.7 (of Unit 29) was accomplished under Contract No. DACW05-76-C-0084 by Claude C. Wood Company during the period from 28 June 1976 to 9 August 1977. Specification No. 4833. Drawing No. 50-4-5011.

**h. Section VIII.** Bank sloping, stone protection and selective clearing on the bank of the Sacramento River at Site Mile 120.7 L (a portion of Unit 35) was accomplished under Contract No. DACW05-81-C-0036 by Francis Construction Inc. Construction was completed on 18 November 1982. Specification No. 5472, Drawing No. 50-4-5438.

**i. Section IX.** Seepage ditch filled with drain material constructed on left bank Sutter Bypass in 1970 from 2800 feet upstream of Oswald Road to 13,800 feet downstream of Oswald road under Contract No. DACW05-71-C-0011. Specification No. 3793, Drawing No. 50-4-4542. No Transfer Letter found.

**j. Section X.** Emergency repairs consisting of construction of relief wells and seepage drains along the west levee of Sutter Bypass from Wadsworth Canal to Gilsizer Slough was completed on 14 November 1958 under Contract No. DA-04-167-CIVENG-59-2. Specification No. 2463, Drawing No. 50-4-3531.

**k. Section XI.** Stone protection, selective clearing, excavation, and other miscellaneous work on the left bank of the Sacramento River, Site Mile 121.6, was completed on 16 November 1994 under Contract No. DACW05-94-C-0044. Specification No. 8385, Drawing No. 50-4-5806.
1-05. Contractor. Work, as referred to above, was performed under the following contracts, copies of which are on file with the Corps of Engineers, U.S. Army, Sacramento District, Sacramento, California:

a. **Section I.** Enlargement to standard grade and section of the west levee of Sutter By-pass from Long Bridge southerly 5.3 miles was accomplished under Contract No. 2880 by Parish Bros., Contractor. Also enlargement to standard grade and section of the west levee of Sutter By-pass from 5.3 miles south of Long Bridge to Tisdale Weir was accomplished under contract No. 2837 by A. Teichert & Son, Contractor.

b. **Section II.** Levee setback and bank protection work of the Sacramento River within this unit was accomplished under Contract No. DA-04-167-eng-272, by H. Earl Parker, Inc., contractor.

c. **Section III.** Levee enlargement and bank protection on the east levee of the Sacramento River from mile 118.9 to mile 119.4 was accomplished under Contract No. DA-04-167-eng-806 by H. Earl Parker, Inc., contractor.

d. **Section IV.** Bank protection work on the west levee of Sutter Bypass from Oswald Bridge to Tisdale Bypass was accomplished under Contract No. DA-04-167-CIVENG-64-75 by H. Earl Parker, Inc., Specification No. 2917, Drawing no. 50-4-3735.

e. **Section V.** Bank protection on the Sacramento River was accomplished under Contract No. DA-04-167-CIVENG-65-15 by Elmer G. Wendt, Inc. Specification No. 3024, Drawing 50-4-3754.

f. **Section VI.** Stone protection, bank sloping and selective clearing on the left bank of the Sacramento River at Site Mile 120.1 (a portion of Unit 26) was accomplished under Contract No. DAC05-73-C-0059 by Luhr Brothers, Inc. during the period from 7 December 1972 to 15 November 1974. Specification No. 4251, Drawing No. 50-4-4777.

g. **Section VII.** Stone protection, bank sloping and selective clearing on the left bank of the Sacramento River at Site Miles 119.8, 120.3, 121.5, and 121.7 (of Unit 29) was accomplished under Contract No. DACW05-76-C-0084 by Claude C. Wood Company during the period from 28 June 1976 to 9 August 1977, Specification No. 4833, Drawing No. 50-4-5011.

h. **Section VIII.** Bank sloping, stone protection and selective clearing on the bank of the Sacramento River at Site Mile 120.7 L (a portion of Unit 35) was accomplished under Contract No. DACW05-81-C-0036 by Francis Construction Inc. Construction was completed on 18 November 1982. Specification No. 5472, Drawing No. 50-4-5438.

i. **Section IX.** Seepage ditch filled with drain material constructed on left bank Sutter Bypass in 1970 from 2800 feet upstream of Oswald Road to 13,800 feet downstream of
Oswald road under Contract No. DACW05-71-C-0011. Specification No. 3793, Drawing No. 50-4-4542. No Transfer Letter found.

j. Section X. Emergency repairs consisting of construction of relief wells and seepage drains along the west levee of Sutter Bypass from Wadsworth Canal to Gilsizer Slough was completed on 14 November 1958 under Contract No. DA-04-167-CIVENG-59-2. Specification No. 2463, Drawing No. 50-4-3531.

k. Section XI. Stone protection, selective clearing, excavation, and other miscellaneous work on the left bank of the Sacramento River, Site Mile 121.6, was completed on 16 November 1994 under Contract No. DACW05-94-C-0044. Specification No. 8385, Drawing No. 50-4-5806.

1-06. Flood Flows. For purposes of this manual, the term “flood” or “high water period” shall refer to flows when the water surface in the Sacramento River reaches or exceeds the reading of 51.0 at Recl. Dist. No. 70 pump or when the water surface in Sutter By-pass reaches or exceeds the reading of 50.0 on the State of California Division of Water Resources gage at Long Bridge. Also when the water surface at Tisdale Weir reaches or exceeds the reading of 48.0 on the gaging station located on the left bank of the Sacramento River at the north end of Tisdale Weir. Also when the water surface reaches or exceeds the reading of 43.0 on the Reclamation District No. 1660 gage on the north levee of Tisdale By-pass two miles east of Tisdale Weir at District drainage pumping plant. All gages are set on U. S. Corps of Engineers datum.

1-07. Assurances Provided by Local Interests. Assurance of cooperation by local interests is provided by State legislation, as contained in Chapter 3, Part 2, Division 5 of the State Water Code (see paragraph 2-02a of the Standard Manual).

1-08. Acceptance by the State Reclamation Board. Responsibility for operating and maintaining the completed works was officially accepted by the Reclamation Board of the State of California, on 23 July 1947, 2 July 1947, 2 April 1952 and 23 July 1947, as shown on the attached letters of acceptance, Exhibit F.

1-09. Superintendent. The name and address of the Superintendent appointed by local interests to be responsible for the continuous inspection, operation, and maintenance of the project works shall be furnished the District Engineer, and in case of any change of Superintendent, the District Engineer shall be so notified.
SECTION II
FEATURES OF THE PROJECT SUBJECT TO FLOOD CONTROL REGULATIONS

2-01. Levees.

a. Description. Levees described in this manual are located along the easterly side of the Sacramento River from Winship School to Tisdale By-pass, the north levee of Tisdale By-pass and the west levee of Sutter By-pass from Long Bridge to Tisdale By-pass. All levees of this unit have been re-constructed to adopted grade and section. For more complete detail of items included in construction of above mentioned levees, reference is made to the "As Constructed" drawings of Exhibit B. Structures affecting levee maintenance are listed in Exhibit E.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(1) Maintenance - paragraph 4-02 of the Standard Manual.
(2) Check Lists - Exhibit E of this Supplement Manual.
(3) Operation - paragraph 4-04 of the Standard Manual.
(4) Special Instructions - paragraph 4-05 of the Standard Manual.

2-02. Drainage and Irrigation Structures.

a. Description. Drainage and irrigation structures which extend through the levees are listed as follows:

<table>
<thead>
<tr>
<th>Location</th>
<th>Size and Kind of Pipe</th>
<th>Other Structure Details</th>
<th>Elev. of Invert at Pipe</th>
</tr>
</thead>
<tbody>
<tr>
<td>2+07.8</td>

Notes pertaining to gates and abbreviations:
Gate Model No. 101 is a Calco slide gate which operates by hand screw on a steel frame.
Gate Model No. 102 is a Calco automatic drainage flap gate which closes against face pressure and opens to permit outflow when pressure is released.

Abbreviations are as follows:
- C.M. = Corrugated Metal
- C.M.P. = Corrugated Metal Pipe
- R.S. = Riverside

b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

2. Check Lists - Exhibit E of this Supplement Manual.

2-03. Channels.

a. Description. The main leved section of the Sacramento River from Winship School to Tisdale Weir has a project design capacity of 66,000 cubic feet per second and width of about 400 feet. Overflow waters of the Sacramento River system, after passing through Butte Basin over natural overflow channels of Moulton and Colusa Weirs, are concentrated in Sutter By-pass which has a width of 4,000 feet at its upper end, levees 18 to 20 feet in height and a project design capacity of 178,000 cubic feet per second in that portion of Sutter By-pass to Tisdale By-pass. Flows in the Sacramento River are further relieved at Tisdale Weir from which waters are discharged through a leved by-pass (Tisdale By-pass) which has a project design capacity of 38,000 cubic feet per second and a width of about 950 feet.

Since the channel of the Sacramento River from Winship School to Tisdale By-pass is utilized for navigable purposes, the responsibility of local interests for inspection, maintenance and operation of the channel of the Sacramento River shall be limited to flood control and the requirements, which follow, shall be observed only to that extent.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(2) Check Lists - Exhibit E of this Supplement Manual.

It shall be the duty of the Superintendent to maintain a patrol of the works during all periods of flood in excess of a reading of 50.0 on the gage at Long Bridge, 48.0 on the gage at Tisdale Weir and 43.0 on the gage at Reclamation District No. 1660 drainage pump as indicated in paragraph 1-06 of this manual. The Superintendent shall dispatch a message by the most suitable means to the District Engineer whenever the water surface reaches gage readings as indicated above. The Superintendent shall cause readings to be taken at said gates at intervals of two to four hours during the period when the water surface is above the flood-flow stage indicated above and record the time of observations. One copy of the readings shall be forwarded to the District Engineer immediately following the flood, and a second copy transmitted as an inclosure to the semi-annual report in compliance with paragraph 3-06 of the Standard Manual.

2-04 Miscellaneous Facilities.

a. Description. Miscellaneous structures or facilities which were constructed as a part of, or in conjunction with, the protective works, and which might affect their functioning, include the following:

(1) Bridges. (for further details see Exhibit B).

   (a) Concrete bridge over Tisdale Weir with 10 feet roadway.

   (b) Timber trestle of S.P.R.R. Co. across Tisdale By-pass at station 1042+65.

   (c) County road bridge at approximate station 491+87 across borrow pit along west levee of Sutter By-pass.

   (d) Wood bridge across borrow pit at approximate station 646+15 along west levee of Sutter By-pass.

   (e) Wood bridge across borrow pit at approximate station 760+30 along west levee of Sutter By-pass.
(2) **Dams.**

(a) Wood dams across borrow pit at approximate station 434+73 along west levee of Sutter By-pass.

(b) Weir No. 3 across borrow pit at approximate station 647+65 along west levee of Sutter By-pass.

(c) Flashboard dam across borrow pit at approximate station 905+12 along west levee of By-pass.

(3) **Utility Relocation.** None

(4) **Hydrographic Facilities.** Gages at R.D. 70 pump, Tisdale Weir, Long Bridge, and R.D. No. 1660 pump as referred to in paragraph 1-06 of this manual.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(2) Check Lists - paragraph 7-03 of the Standard Manual.

2-05. **Environment Protection.**

a. Vegetation preserved as a part of selective clearing on the waterside berm or slope above the bank protection during prosecution of the contract shall not be removed as a part of normal maintenance. Dead trees with wildlife value will be retained except where they constitute a hazard to existing flood control works.

b. Consistent with the standards established in this manual and those established by the State of California, all wild growth, including but not limited to, trees, shrubs and other vegetation within those project areas where environmental easements have been obtained by local interests shall be preserved and retained. (Reference Site Mile 119.8, left bank, Sacramento River.)

*(Added February 1979)*
SECTION III

REPAIR OF DAMAGE TO PROJECT WORKS AND
METHODS OF COMBATING FLOOD CONDITIONS

3-01. Repair of Damage. In the event of serious damage to the project works, whether due to flood conditions or other causes, and which may be beyond the capability of local interests to repair, the Superintendent will contact a representative of the Division of Water Resources, State of California, who coordinates maintenance of project works of the Sacramento River Flood Control Project. The State representative will give assistance or advice, or will determine appropriate action to be taken.

3-02. Applicable Methods of Combating Floods. For applicable methods of combating flood conditions reference is made to Section VIII of the revised Standard Manual, where the subject is fully covered.

Instructions for Completing Sheet 2, Exhibit E
(To be printed on back of Sheet 2)

Item (a) Indicate levee station of observation, obtained by pacing from nearest reference point; indicate right or left bank.

Item (b) If sufficient settlement of earthwork has taken place to be noticeable by visual observation, indicate amount of settlement in tenths of a foot. If sloughing has caused a change in slope of the embankment sections, determine the new slope. Note areas where erosion or gullying of the section has occurred.

Item (c) If sufficient erosion or gullying of back face of back toe of levee has taken place to be noticeable by visual inspection, indicate area affected and depth.

Item (d) Note any natural change in any section of roadway or ramps. Indicate any inadequacy in surface drainage system.

Item (e) Indicate any evidence of seepage through the embankment section.

Item (f) Indicate the serviceability of all farm gates across the embankments and roadway, and indicate if repainting is required.

Item (g) Indicate maintenance measures that have been performed since last inspection and their condition at the time of this inspection.

Item (h) Record opinion, if any, of contributory causes for conditions observed and also any observations not covered under other columns.

NOTE: One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion, and one copy is to be attached to and submitted with the Superintendents's semi-annual report.

**Instructions for Completing Sheet 4, Exhibit E**
*(to be printed on back of Sheet 4)*

**Item (a)** Indicate station of observation obtained by pacing from nearest reference point.

**Item (b)** Note nature, extent, and size of vegetal growth within the limits of flood flow channel.

**Item (c)** Note nature and extent of debris and refuse that might cause clogging of the conduits of the irrigation intake works, fouling of the tainter gates, or the bridges over the channel.

**Item (d)** Report any construction along the diversion channel or above the diversion channel or above the diversion works that has come to the attention of the inspector and that might affect the functioning of the project.

**Item (e)** Indicate any change in grade or alignment of the channels, either by deposition or sediment or scour, that is noticeable by visual inspection. Estimate amount and extent.

**Item (f)** Indicate any change that has taken place in the riprap such as disintegration of the rock, erosion, or movement of the rock. Note the presence of vegetal growth through the riprap.

**Item (g)** Note any damage or settlement of the footings of the bridges. Indicate condition of wooden structures and if repainting is required. Indicate condition of bridge approaches, headwalls, and other appurtenances.

**Item (h)** Indicate maintenance measures that have been performed since the last inspection and their condition at time of this inspection.

**Item (i)** Record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

**NOTE:** One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion, and one copy is to be attached to and submitted with the Superintendent's semi-annual report.

EXHIBIT E  
Sheet 6 of 7
Instructions for Completing Sheet 6, Exhibit E
(To be printed on back of Sheet 6)

1. Enter station of all structures under Column (a) for check list.

2. Inspect inlet, barrel, and outlet for accumulation of sediment, rubbish, and vegetal matter. Note condition under Column (c).

3. If any settlement or damage to the pipe, barrel, or invert of the drain has occurred, estimate the location and amount. Note particularly if any backfill has come into the pipe or been disturbed. Record observations under Column (d).

4. Inspect the concrete portions of the structures for evidence of settlement, cracks, "pop-outs", spaces, abrasive wear, or other deterioration. Record conditions under Column (e).

5. Inspect backfill area adjacent to structure for evidence of erosion caused by overflow of the drainage structure and note conditions in Column (f).

6. Under Column (g) indicate physical measures that have been taken to correct conditions reported in last inspection, and their condition at time of this inspection.

7. Under Column (h) record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

8. A copy of the inspector's report is to be mailed to the District Engineer immediately on completion, and a record copy shall be attached to the Superintendent's semi-annual report.
EXHIBIT F

LETTER OF ACCEPTANCE

BY STATE RECLAMATION BOARD
Ms. Leslie M. Gallagher  
Executive Officer  
Central Valley Flood Protection Board  
3310 El Camino Avenue, Room 151  
Sacramento, CA 95821

Dear Ms. Gallagher:

The purpose of this letter is to notify the Central Valley Flood Protection Board of the completion of an effort to update the Operation and Maintenance Manual Supplements for the Sacramento River Flood Control Project and the Lower San Joaquin River Levees and Lower San Joaquin River and Tributaries Project. These updates are a compilation of revisions made to the project over time and where we had record of a transfer letter to the Board. These updated supplements are the most current version and should be utilized as the baseline version for any future project modifications.

This process and the compiled updates have been coordinated with the Central Valley Flood Protection Board and Department of Water Resources staffs for review and comment. All comments have been addressed or incorporated into the manuals.

The Board staff has been provided a copy of the manuals in electronic format. Future updates will include entire unit supplements so updates can be seen in context with the entire unit supplement. The list of completed supplements, by the unit number and title, are attached. If you have any questions regarding this transmittal, please contact Gary Kamei at 916-557-6845.

Sincerely,

[Signature]

David G. Ray, P.E.  
Colonel, U.S. Army  
District Commander

Colonel John N. Reese  
District Engineer  
Sacramento District  
U.S. Army Corps of Engineers  
1325 J Street  
Sacramento, California 95814-2922

Dear Colonel Reese:

This is in reference to your January 13, 1995 letter regarding the completed Sacramento River Bank Protection Project work for Contract 42A at River Miles 88.8, Right Bank, 89.0R (the downstream 1,450-foot portion), 111.2R, 111.7R, 116.7R, 121.6L, and 143.3L. At its March 17, 1995 meeting, The Reclamation Board formally accepted the completed flood control work from the U.S. Army Corps of Engineers and transferred the responsibility for operation and maintenance to the local agencies.

The work consisted of clearing and grubbing; excess soil excavation; placement of stone protection, embankment material, stone fill, and fish groins; and miscellaneous site work.

We concur that the above Contract 42A sites were constructed in conformance with Contract No. DACW05-94-C-0044, Specification Number 8385, and Drawing File Number 50-4-5806, as could be determined visually. Attached are copies of the letters to local agencies notifying them about the completed work and their responsibilities for operation and maintenance.

If you have any questions, please contact me at (916) 653-5434 or have your staff contact Jay Punia at (916) 327-1535 or Michael Petersen at (916) 327-1533.

Sincerely,

Raymond E. Barsch  
General Manager

Navigation and Flood Control Unit

The Reclamation Board
State of California
1416 - 9th Street
Sacramento, California 95814

Members of the Board:

You are hereby notified that the Corps of Engineers has completed first construction season work on the Sacramento River Bank Protection Project, Contract 42A, at River Miles 88.8R, 89.0R (The downstream 1450 feet portion of 89.0R), 111.2R, 111.7R, 116.7R, 121.6L, and 143.3L, in Colusa, Sutter and Yolo counties, California. The work consisted of clearing and grubbing, excess excavation, placement of stone protection, embankment material, stone fill, removal and reinstallation of wood piles, and miscellaneous site work. The work was completed on November 16, 1994, in accordance with Contract Number DACW05-94-C-0044, Specification Number 8385, and Drawing File Number 50-4580. Work to be completed during the second construction season, beginning in May 1995 is located at Site Miles 89.0R, 90.2R, 90.8R, 94.5R, and 101.7R.

The work was performed under general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session (PL 86-645, July 14, 1960), Section 2304(a), Title 10, and the Water Resources Development Act of 1986 (PL 99-662, October 17, 1986), and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway bank contiguous thereto, is transferred as of the date of this letter to the State of California for operation and maintenance.

This work and any special operation and maintenance requirements will be added by amendment to the Operation and Maintenance Manual, supplement numbers 127, 130, 133, and 136.
Sacramento River Flood Control Project. Copies will be furnished to your office at a later date.

Sincerely,

John N. Reese
Colonel, Corps of Engineers

Colonel Arthur E. Williams
District Engineer
Sacramento District
U. S. Army Corps of Engineers
650 Capitol Mall
Sacramento, CA 95814

Dear Colonel Williams:

Reference is made to your letter of November 30, 1982, concerning the transfer to the State of California for operation and maintenance, a portion of the Sacramento River Bank Protection Project, in Unit No. 35.

The flood control work consisted of selective clearing, bank sloping, placement of stone bank protection, and such miscellaneous work as necessary to complete the construction at the following sites:

Sites Miles 115.3, 118.4, 123.9, 130.5, 134.7, 136.7, 137.2, 137.4, and 140.9 Right Bank, Sacramento River.

Sites Miles 120.7, 126.6, 132.6, and 135.4 Left Bank, Sacramento River.

The work was constructed in a workmanlike manner and in conformance with Drawing No. 50-4-5438, Specification No. 5472, and Contract No. DACW 05-81-C-0036, insofar as could be determined visually.

The Reclamation Board at its regular meeting of December 17, 1982, formally accepted from the District Engineer, for operation and maintenance, the completed work on the above-referenced sites.

Sincerely,

ELDON E. RINEHART
General Manager

Gentlemen:

This is in regard to the joint inspection of 23 November 1982 made for the purpose of transferring a portion of the Sacramento River Bank Protection Project (Unit 35), to the State of California for Operation and Maintenance. The flood control work consists of levee bank sloping and placement of stone protection on the Sacramento River right bank at Site Miles 115.3, 118.4, 123.9, 130.5, 134.7, 136.7, 137.2, 137.4 and 140.9 and left bank at Site Miles 120.7, 126.6, 132.6 and 135.4. The sites were completed on 18 November 1982 in accordance with Contract No. DACW05-81-C-0036, Specification No. 5472 and Drawing No. 50-4-5438.

The work was performed under general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session (PL 86-645, 14 July 1960), and Section 2304(a), Title 10, and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway bank contiguous thereto, is transferred as of 23 November 1982 to the State of California for operation and maintenance.

This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Nos. 130, 131, 133 and 134, Sacramento River Flood Control Project. Copies will be furnished your office at a later date.

Sincerely,

HENRY LEE

650 Capitol Mall
Sacramento, CA 95814

Dear Colonel O'Shei:

The Reclamation Board at its regular meeting of August 23, 1977, formally accepted from the District Engineer the completed flood control work on a portion of Unit No. 29 of the Sacramento River Bank Protection Project. The flood control work was transferred to the State of California by your letter of August 11, 1977.

The flood control work consisted of selective clearing, bank sloping, placement of stone bank protection, and such miscellaneous work as necessary to complete the construction at Sites Miles 114.8, 119.8, 120.3, 121.5, 121.7, 122.3, 122.4, 123.3, 125.0, 125.6, 128.6, 135.0 and 137.5 Left Bank, Sacramento River.

The work was constructed in a workmanlike manner and in conformance with Drawing No. 50-4-5011, Specification No. 4833, and Contract No. DACW 05-76-C-0084, insofar as could be determined visually.

Sincerely,

PAUL L. CLIFTON
General Manager
Gentlemen:

Reference is made to the joint inspection of 9 August 1977, made for the purpose of transferring a portion of the Sacramento River Bank Protection Project (Unit No. 29) to the State of California for operation and maintenance. This flood control work consists of bank sloping and placement of stone protection on the Sacramento River left bank at Site Miles 114.8, 119.8, 120.3, 121.5, 121.7, 122.3, 122.4, 123.3, 125.0, 125.6, 128.6, 135.0, and 137.5. The sites, as listed on the enclosure, were completed on 9 August 1977 in accordance with Specification No. 4833, Contract No. DACW05-76-C-0084, Drawing No. 50-4-5011.

The work was performed under the general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session (PL 86-645, 14 July 1960), and Section 2304(a), Title 10, and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway banks contiguous thereto, is transferred as of 10 August 1977 to the State of California for operation and maintenance.

This portion of the project work will be added by amendment to the Operation and Maintenance Manual, Supplement Nos. 128, 133, and 134, Sacramento River Flood Control Project. Copies will be furnished your office at a later date.

Sincerely yours,

Dear Sir:

The Reclamation Board at its regular meeting of June 28, 1974, formally accepted a portion of the completed flood control work on Unit No. 26 of the Sacramento River Bank Protection Project from the District Engineer for operation and maintenance. The flood control work was transferred to The Reclamation Board by your letter of June 20, 1974.

The flood control work consisted of selective clearing, levee bank sloping, placement of stone bank protection, and such miscellaneous work as necessary to complete the construction at Sites Miles 114.4, 118.4, 120.1, 134.7, 136.1, 142.7, 145.0, and 147.3 Left Bank, Sacramento River.

The flood control work was constructed in a workmanlike manner and in conformance with Drawing No. 50-4-4777, Specification No. 4251, and Contract No. DACW05-73-C-0059, insofar as could be determined visually.

Sincerely yours,

Gentlemen:

Reference is made to the joint inspection of 3 June 1974, made for the purpose of transferring a portion of the Sacramento River Bank Protection Project Work (Unit No. 26), to the State of California for operation and maintenance. This portion of the flood control work consists of levees and bank sloping, and placement of stone bank protection on the Sacramento River left bank at Site Miles 114.4, 118.4, 120.1, 134.7, 136.1, 142.7, 145.0 and 147.3. The sites, as listed on the enclosure, were completed on 3 June 1974 in accordance with Specification No. 4251, Contract No. DACO573-C0059, Drawing No. 50-4-4777.

The work was performed under the general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session and Section 2304(a), Title 10 and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway banks contiguous thereto, is transferred as of 20 June 1974 to the State of California for operation and maintenance.

This portion of the project work will be added by amendment to the Operation and Maintenance Manual, Supplements Nos. 128, 133, 134 and 136 Sacramento River Flood Control Project. Copies will be furnished your office at a later date.

Sincerely yours,

Gentlemen:

Reference is made to the joint inspection made on 22 & 23 September 1965, of flood control work pertaining to the Sacramento River Bank Protection Project for the purpose of transferring this work, upon completion, to the State of California for operation and maintenance.

The flood control work, designated as Contract No. 4, consisting of levee enlargement, levee setback, shaping and placement of bank protection at 11 locations from Colusa to Boyers Bend right and left banks as listed on the attached inclosure, was completed on 20 October 1965, in accordance with Specification No. 3024, Contract No. DA-04-167-CIVENG-65-15 and Drawing No. 50-4-3754.

The flood control work as described on the attached inclosure, now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said flood control works, together with the waterway banks contiguous thereto are transferred to the State of California for operation and maintenance.

This portion of the project work will be added by amendment to the Operation and Maintenance Manual, Supplement No. 128, 130, 131, 133, 134 and 136, Sacramento River Flood Control Project, and furnished your office at a later date.

Gentlemen:

Reference is made to the joint inspection trip of 14 October 1964,  
on the Sutter Bypass Levee Revetment work in Area No. 2, for the purpose  
of transferring it upon completion to the State of California for operation  
and maintenance.

The flood control work consisted of placement of stone revetment on  
the waterside slope of the west levee of Sutter Bypass, beginning from  
the Gerald Bridge and running downstream 3.13 miles to the north bank of  
Tisdale Bypass.

This work was performed under the general authority of the Sacra-  
mento River Major and Minor Tributaries Flood Control Project, which was  
authorized by the Flood Control Act of 22 December 1944 (Public Law 534,  
78th Congress, 2nd Session).

The work was completed on 15 October 1964, in accordance with Spec-  
fications No. 2917, Contract No. DA-04-167-CIVER-64-75 and Drawing No.  
50-045-3735.

The flood control work described above now meets the requirements  
of the Sacramento River Major and Minor Tributaries Flood Control Project  
and is hereby transferred to the State of California for operation and  
maintenance.

This site will be added by amendment to the O&M Manual, Supplement  
No. 133, Sacramento River Flood Control Project, and furnished to your  
office at a later date.

Sincerely yours,

ROBERT E. MATHE

Members of the Board:

This is in regard to the joint inspection of November 14, 1985 made for the purpose of transferring a portion of the Sacramento River Bank Protection Project (Unit 3A), to the State of California for Operation and Maintenance. The flood control work consists of bank sloping and placement of stone protection on the Sacramento River left bank at Elita Miles 94.0, 96.6, 127.3 and 128.5 and right bank at Elita Miles 80.6, 99.2, and 134.6. These sites were completed during the past construction season in accordance with Contract Number DACH05-84-C-0112, Specification Number 7033 and Drawing Number 50-4-5712.

The work was performed under general authority of the Flood Control Act of 1968, 66th Congress, 2nd Session (PL 86-643, July 14, 1960), and Section 2304(a), Title 10, and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway bank contiguous thereto is transferred as of November 20, 1985 to the State of California for operation and maintenance.

This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Numbers 123, 128, 130, 134, and 137 Sacramento River Flood Control Project. Copies will be furnished to your office at a later date.

Sincerely,

Gentlemen:

Reference is made to the emergency repair program on the Sacramento River Flood Control Project formulated as a result of requests from local interests, joint inspections and investigations participated in by State, local and Corps of Engineers representatives.

Emergency repairs have been completed under the general authority of Public Law 99, 84th Congress, 1st Session, on both levees of the Sutter Bypass from Wadsworth Canal to Gillsizer Slough.

The emergency work consisted of the construction of relief wells and seepage drains and was completed 14 November 1958 in accordance with Specification No. 2463; Contract No. DA-06-167-CIVENG-59-2 and Drawing No. 20-1-3751.

The above work as completed is hereby transferred to the State of California for operation and maintenance as an appurtenance of the levee reach in this area transferred to the State on 8 December 1951.

A copy of this letter is being transmitted to the Department of Water Resources.

March 9, 1953

District Engineer
Sacramento District
U. S. Corps of Engineers
P. O. Box 1739
Sacramento, California

Dear Sir:

Reference your letters, file No. SPK100-P 8243(Sac. R.C.C.P.) dated 3 Dec 51, 5 Dec 51, 4 Feb 53 and 13 Feb 53, wherein the following levee units were transferred to the State of California:

3 Dec 51 The westerly levee of the Sacramento River.

Section No. 8
1. From Princeton (Mile 163.6) to Packers Warehouse (Mile 165.5).

Section No. 7
2. From Mile 167.5 to opposite Packers Lake (Mile 168.0).

8 Dec 51 The easterly levee of the Sacramento River.

Section No. 144
1. From Mile 168.5 to Mile 168.9 (at Butte City).

4 Feb 53 The southerly levee of Lindsey Slough, from the westerly levee of the Yolo Bypass to the back levee of Egbert tract, (a distance of approximately 4 miles).

13 Feb 53 The easterly levee of the Sacramento River from River mile 118.9 (north end of Tisdale Wair), to Mile 120.75, near Grimes.

The Reclamation Board on behalf of the State of California, in meeting held March 4, 1953, accepted the above-mentioned levee units, together with their contiguous waterway banks, for operation and maintenance.

Yours very truly
THE RECLAMATION BOARD

The Nationation Board
State of California
1100 "D" Street
Sacramento, California

Gentlemen:

Reference is made to the District Engineer's letter dated 1
December 1952, wherein it was suggested that a joint inspection be
made for the purpose of transferring to the jurisdiction of the
State of California, when completed, two units of the Sacramento
River Flood Control Project. Reference is also made to the joint in-
spection of these two units which was made on 9 December 1952.

In accordance with the above, you are hereby advised that Unit 1
described in the letter referred to above was completed on 13 February
1953. The completed work was performed under specification No. 1508;
drawings No. 30-4-2876 and 30-4-2712. Said work included levee
enlargement, bank protection and levee surfacing for patrol road
purposes along the left bank of the Sacramento River at river mile
118.79, at the northerly end of Union Fair, to river mile 120.75,
near Delta, California.

The levee unit 1 described above forms an integral part of the
Sacramento River Flood Control Project, and meets with the require-
ments of the project. Therefore, said levee unit, together with the
waterway bank contiguous thereto, is hereby transferred to the
State of California for operation and maintenance.

Unit 2 referred to in said letter of 1 December 1952, consisting
of levee enlargement along the right bank of the Sacramento River at
Colusa Warehouse, river mile 144.2, was transferred to the State of
California by letter dated 15 January 1953.

The maintenance work required under the provisions of the
Sacramento River Flood Control Project shall be performed in accordance
The Reclamation Board

with existing Flood Control Regulations enclosed herewith which have been prescribed by the Secretary of the Army pursuant to Section 3 of the act of congress approved 22 June 1936, as amended and supplemented, as provided under paragraph 208.10 (10) of these regulations, a maintenance manual covering this levee unit is in process of preparation and will be furnished to you upon completion.

A copy of this letter is being transmitted to the State Engineer.

The Reclamation Board  
State of California  
1100 "Q" Street  
Sacramento 16, California

Gentlemen:

Reference is made to your letter of 4 May 1951 acknowledging that certain reaches of the levees of the Sacramento River Flood Control Project and the waterway bank contiguous to said levee reaches meet the requirements of the project as authorized prior to the Flood Control Act of 1944.

The levee reaches in question are located as follows:

   a. Westerly levee of the Sacramento River:

   (1) Mile 163.6 (Princeton) to Mile 165.3.
   (2) Mile 155.5 to Mile 154.5.
   (3) Mile 154.3 to Mile 152.1.
   (4) Mile 152.1 to Mile 151.5.
   (5) Mile 151.5 to Mile 146.4.
   (6) Mile 146.1 to Upstream outskirts of Colusa.
   (7) Upstream outskirts of Colusa to Mile 143.5 (Colusa Bridge), excepting 320 lin. ft. at Colusa Warehouse Mile 144.2.

   b. Easterly levee of the Sacramento River:

   (1) Mile 165.5 (Terrill's Landing) to Mile 152.7 (South Line Bogg's Ranch).

Items 51 to 76
The Reclamation Board

59  (2) Mile 149.9 to Mile 149.7 (Graham's Ranch).
60  (3) Mile 149.4 (Farmsworth Pump) to Mile 149.0 (Sailor Bend).
61  (4) At Colusa Weir.
62  (5) Mile 145.5 (Arnold's) to Mile 140.2.
63  (6) Mile 139.5 to Mile 138.2 (Butte Slough Outfall Gates).
64  (7) Mile 135.2 (Butte Slough Outfall Gates) to Mile 137.9
     (Hart's Pump).
65  (8) Mile 136.9 (Opposite Steidelmayer's Pump) to Mile 134.0
     (Meridian Bridge).
66  (9) Mile 134.0 (Meridian Bridge) to Mile 133.8.
67  (10) Mile 133.2 to 132.5.
68  (11) Mile 131.8 to Mile 125.9.
69  (12) Mile 125.8 to Mile 123.1.
70  (13) Mile 122.9 to Mile 122.0.

e. Westerly levees of the Sutter Bypass.

71  (1) Butte Slough Outfall Gates to Tisdale Bypass.
72  (2) Tisdale Bypass to a point 5.8 miles northerly from
     Sacramento River.
73  (3) From a point 5.8 miles northerly from Sacramento River
     to Sacramento River.

74  d. Northerly levees of Tisdale Bypass.
75  e. Southerly levees of Tisdale Bypass.
76  f. Easterly levees of the Sutter Bypass from high ground near
     Longbridge to Feather River.

The records of this office show that your Board has accepted the
levees covered by Items 2(1), 9(5), 9(6), 6(4), 6(5), 6(6),
6(7), 6(8), 6(9), 6(10), 6(11), 6(12), 6(13), 6(14), 6(2), 4, and 6, above as complete. Accordingly the waterway bank contiguous to
said Items is hereby transferred to the State of California for maintenance and operation.

The levee covered by Items a.(2), a.(4), a.(7), b.(1), b.(2), b.(3), c.(3) and f. above, although complete, has not been formally transferred as contemplated by the Project documents. Accordingly the levee covered by said Items, together with the waterway bank contiguous thereto, is hereby transferred to the State of California for maintenance and operation.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress approved 22 June 1936, as amended and supplemented. As provided under paragraph 208.10(10) of these regulations, a maintenance manual covering these works is in process of preparation and will be furnished your Board upon completion.

A copy of this letter is being transmitted to the State Engineer.

FOR THE DISTRICT ENGINEER:

Sincerely yours,

Copy Furnished:

Lt. Colonel, Corps of Engineers
Executive Officer
RESOLUTION
PASSED AND ADOPTED BY THE RECLAMATION BOARD
JULY 2, 1947

WHEREAS The Reclamation Board has heretofore approved certain items of "new construction"; consisting of (1) the enlargement, set back and construction of the East Levee of the Sacramento River from Isleton Bridge to Walnut Grove, in Reclamation Districts Nos. 407 and 556; (2) enlargement, set back and construction of the East Levee of the Sacramento River from Meridian Bridge to Tisdale Weir, in Reclamation Districts Nos. 70 and 1660; and (3) the enlargement, set back and construction of the East Levee of the Sacramento River between River Miles 92.6 to 94.5, 99.3 to 101.2, and 110.6 to 111.5, in Reclamation District No. 1500; and

WHEREAS the War Department, Corps of Engineers, District Engineer, Sacramento District, under date of June 23, 1947, has notified The Reclamation Board of the completion of the three items of levee enlargement, set back and construction, and has transferred said portions of levee to the State of California for maintenance and operation between proper local interests; and

WHEREAS the Chief Engineer of The Reclamation Board has caused to be made an inspection on the ground of the three items of new construction as specified above, and has found and determined that such work, as completed, has been prosecuted and carried out in conformance with plans and specifications therefor; now therefore be it

RESOLVED AND ORDERED that The Reclamation Board does hereby accept for the State of California the said three items of "new construction" as aforesaid, which have on the date above set forth been transferred to said Board by the War Department, U. S. District Engineer; and be it further
RESOLVED AND ORDERED that the East Levee of the Sacramento River from Isleton Bridge to Walnut Grove, together with the berms and appurtenant structures thereof, so much thereof as lies within Reclamation District No. 407, be, and the same is hereby turned over to Reclamation District No. 407 for maintenance and operation, as the legally authorized function of said district; and so much thereof as lies within Reclamation District No. 576 be, and the same is hereby turned over to Reclamation District No. 576 for maintenance and operation, as the legally authorized function of said district; and be it further

RESOLVED AND ORDERED that the East Levee of the Sacramento River, Meridian Bridge to Tisdale Weir, together with the berms and appurtenant structures thereof, so much thereof as lies within Reclamation District No. 70 be, and the same is hereby turned over to Reclamation District No. 70 for maintenance and operation, as the legally authorized function of said district; and that so much thereof as lies within Reclamation District No. 1660 be, and the same is hereby turned over to Reclamation District No. 1660 for maintenance and operation, as the legally authorized function of said district; and be it further

RESOLVED AND ORDERED that the East Levee of the Sacramento River between Miles 92.6 to 94.5, 99.3 to 101.2, and 110.6 to 111.5, together with the berms and appurtenant structures thereof, be and the same is hereby turned over to Reclamation District No. 1500 for maintenance and operation, as the legally authorized function of said district.

STATE OF CALIFORNIA
COUNTY OF SACRAMENTO
Office of The Reclamation Board

I, S. A. HONAKER, Assistant Secretary of The Reclamation Board, do hereby certify that the above and foregoing is a true and correct copy of a Resolution adopted by said Board at its meeting held July 2, 1947.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of The Reclamation Board this 15th day of July, 1947.

S. A. HONAKER
Assistant Secretary
The Reclamation Board
824.3 (Sacramento River) FSXXB
23 June 1947

SUBJECT: Maintenance of East Levee, Sacramento River, Meridian Bridge to Tisdale Weir

The Reclamation Board
State of California
1100 "Q" Street
Sacramento, California

Gentlemen:

Enlargement has been completed of the East Levee, Sacramento River, between Meridian Bridge and Tisdale Weir. Therefore, in accordance with established procedure, this portion of completed levee is hereby transferred to the State of California for maintenance.

This construction forms an integral part of the Sacramento River Flood Control Project. The details and extent of the work are shown on inclosed drawing No. 50-4-2207 in seven sheets, entitled "Proposed Levee Enlargement, East Levee, Sacramento River, Meridian Bridge to Tisdale Weir."

There is also inclosed a copy of Flood Control Regulations prescribed by the Secretary of War pursuant to provisions of Section 3 of the Act of Congress approved 22 June 1936, as amended and supplemented, to govern the maintenance and operation of Flood Control Works, of which the levee referred to above is a part. In accordance with paragraph 208.10(10) of said regulations, at a later date this office will furnish your Board and local interests with an operation and maintenance manual to assist in carrying out their obligation established by these regulations.

For the records of this office, acknowledgment of this letter is requested on or before 25 July 1947.

Copy of this letter, with inclosures, is being transmitted to the State Engineer.

July 23, 1947

District Engineer
Sacramento District
Wright Building
1205 - 8th Street
Sacramento, California

Dear Sir:

Reference is made to your letter of June 23, 1947, file No. 824.3 (Sacramento River) PSKKB, transferring to the State of California for maintenance a section of the east levee of the Sacramento River from Meridian Bridge to Tisdale Weir.

The Reclamation Board at its meeting on July 2, 1947, accepted the levee for maintenance, and has subsequently turned it over to Reclamation Districts 70 and 1660 for maintenance.

Copy of the Board's resolution is enclosed with our letter of today, relating to your file No. 824.3 (Sacramento River) PSKKB; east levee, Sacramento River, Isleton Bridge to Walnut Grove.

Yours very truly,

THE RECLAMATION BOARD
A. M. BARTON
Chief Engineer and General Manager

Assistant Secretary
The Reclamation Board

NOTE: Only item pertaining to Operation and Maintenance Manual No. 133 is included in the above copy.
District Engineer  
Sacramento District  
Corps of Engineers, U.S. Army  
P. O. Box 1739  
Sacramento 8, California  

Dear Sir:

1. Reference is made to your letter of 8 December 1951, file SPKKA 824.3 (Sac.Riv. F.C.P.), transferring to The Reclamation Board for operation and maintenance of levees and their contiguous waterway banks as follows:

   a. --- - --------- - ------
   b. --- - --------- - ------
   c. Westerly levee of the Sutter By-pass.
      1. Butte Slough Outfall Gates to Tisdale By-pass.
      2. and 3. - ----------------- - ------
   d. North levee of Tisdale By-pass.

   ------------------------ - - - - - - - - - - - - - - - - - - - - - -

6. There are no contiguous waterway banks other than the adjacent by-pass areas under Items "c", "d", "e" and "f". On December 18, 1951, The Reclamation Board formally accepted the levees covered by these items together with their contiguous by-pass areas subject to the provision that the portion of Item "c-1" now having waterward slopes of three horizontal to one vertical would be rectified by Federal construction. All other levees of the Sutter By-pass are now constructed to waterward slopes of four horizontal to one vertical. The Flood Control Act of December 22, 1944, calls for construction of waterward slopes of four horizontal to one vertical on the Tisdale By-pass levees. The existing section of these levees is ample.

Yours very truly

THE RECLAMATION BOARD

By /s/ A. M. Barton  
A. M. BARTON

Chief Engineer and General Manager

NOTE: Only items pertaining to Operation and Maintenance Manual No. 133 are included in the above copy.

Dear Sir:

Reference your letters, file No. SPKKO-P 824.3 (Sac.R.F.C.P.) dated 3 Dec 51, 8 Dec 51, 4 Feb 53 and 13 Feb 53, wherein the following levee units were transferred to the State of California:

------------------

13 Feb 53 The easterly levee of the Sacramento River from River mile 118.9 (north end of Tisdale Weir), to Mile 120.75, near Grimes.

The Reclamation Board on behalf of the State of California in meeting held March 4, 1953, accepted the above-mentioned levee units, together with their contiguous waterway banks, for operation and maintenance.

Yours very truly,

THE RECLAMATION BOARD

EXHIBIT G

SUGGESTED SEMI-ANNUAL REPORT FORM.
TO: The District Engineer  
Sacramento District  
Corps of Engineers  
1209 - 8th Street  
Sacramento, California

Dear Sir:

The semi-annual report for the period (1 May 19__ to 31 October 19__) (1 November 19__ to 30 April 19__) Sacramento River Flood Control Project, Unit No. 133, east levee of Sacramento River, north levee of Tisdale By-pass and west levee of Sutter By-pass of the Sacramento River Flood Control Project, is as follows:

a. The physical condition of the protective works is indicated by the inspector's report, copies of which are inclosed, and may be summarized as follows:

(Superintendent's summary of conditions)

It is our intention to perform the following maintenance work in order to repair or correct the conditions indicated:

(Outline the anticipated maintenance operations for the following 6 months.)

b. During this report period, major high water periods (water level at 51.0 at R.D. Pump No. 70, 50.0 at Long Bridge, 43.0 on R.D. No. 1660 drainage pump and 48.0 at Tisdale Weir gages) occurred on the following dates:

<table>

<th>Maximum Elevation</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Comments on the behavior of the protective works during such high water periods are as follows:

(Superintendent's log of flood observations)
During the high water stages when the water level reached a height of [ ], on the gage or excess thereof (dates) [ ], it was necessary to organize and carry out flood operations as follows:

(See Maintenance Manual [ ].)

c. The inspections have indicated (no) or (the following) encroachments or trespasses upon the project right-of-way.

d. (No) ( ) permits have been issued for (the following) improvements or construction within the project right-of-way.

Executed copies of the permit documents issued are transmitted for your files.

e. The status of maintenance measures, indicated in the previous semi-annual report as being required or as suggested by the representatives of the District Engineer, is as follows:

(Statement of maintenance operations, item by item with percent completion.)

f. The fiscal statement of the Superintendent's operations for the current report period is as follows:
