SUPPLEMENT TO STANDARD
OPERATION AND MAINTENANCE MANUAL
SACRAMENTO RIVER FLOOD CONTROL PROJECT

UNIT NO. 141 - PART NO. 1
EAST LEVEE OF FEATHER RIVER FROM
BEAR RIVER TO NATOMAS CROSS CANAL
AND
SOUTH LEVEE OF BEAR RIVER
AND
BOTH LEVEES OF YANKEE SLOUGH

SECTION I

INTRODUCTION

1-01. Location. The improvement covered by this manual is Unit No. 141-Part No. 1 of the Sacramento River Flood Control Project. Levees and channels of this unit lie east of the Feather River, north of the City of Sacramento and southwesterly from the town of Wheatland. The area is located in Reclamation District No. 1001 in the Counties of Sutter and Placer, California and the general vicinity is as shown on the Location Map, Exhibit A-1.

1-02. Project Works. The flood control works included in this manual was authorized by the Flood Control Act of 1917 as modified by the Acts of 1928, 1937, and 1941, and consists of the following:

a. The east levee and channel of the Feather River from the Bear River downstream to the Natomas Cross Canal, except that portion which extends from the Bear River (a point about one mile upstream from the Nicolaus Bridge) downstream to a point located 2.37 miles downstream from the Nicolaus Bridge.

b. The south levee and channel of the Bear River from high ground downstream to the Feather River, except a portion about 3,500 feet long which lies between the S.N.R.R. track crossing and the W.P.R.R. track crossing.

c. The channel and both levees of Yankee Slough extending from high ground downstream to the Bear River.

Part No. 1 of Unit No. 141 completes Unit No. 141 with the exceptions listed above. At such time when the excepted portions of this unit are completed to project standards, a revised Operation and Maintenance Manual will be written to cover the entire unit.
This manual covers and supersedes operation of the Operation and Maintenance Manual designated as Manual No. 5 entitled, "Bear River levee system constructed in vicinity of Rio Oso, Sutter County, California, approximately 28 miles northerly of Sacramento, California.” The portion of Manual No. 5 which is included in Unit No. 141-Part No.1 is the south levee of the Bear River.

1-03. Protection Provided. Levees of the Feather River, Bear River and Yankee Slough, as described in this unit, provide direct protection to adjacent agricultural lands against flood water of the Feather River, Bear River and Yankee Slough. Along the east levee of the Feather River within this unit the grade of the adopted flood plane profile varies from elevation 56.2 at its junction with the Bear River to elevation 41.8 at the Natomas Cross Canal. Along the south levee of the Bear River the grade of the adopted flood plane profile varies from elevation 114.9 at the upper end to elevation 56.2 at its junction with the Feather River. Along Yankee Slough the grade of the adopted flood plane profile varies from elevation 76.2 at the upper end to elevation 59.9 at the W.P.R.R. crossing near the junction of Yankee Slough and the Bear River. Levee grades within this unit provide for a freeboard of at least 3 feet above the adopted flood plane profile. Within this unit the project design floods are: 320,000 cubic feet per second for the Feather River, 40,000 cubic feet per second for the Bear River and 2,500 cubic feet per second for Yankee Slough.

1-04. Construction Data and Contractor. In addition to levees as built by local interests and emergency repair work done by the U. S. Army Corps of Engineers, construction required to bring levees of this unit to project standards was accomplished under the following contracts:

a. Enlargement of the north levee of Yankee Slough, as shown on Drawing No. 2-4-62 of Exhibit B, has accomplished under Contract No. W-l05-167-eng-2334 by Morrison-Knudsen Co. and completed on 3 October 1938.

b. Construction of slab levee along the W.P.R.R. from Yankee Slough to the Bear River, as shown on Drawing No. 2-4-65, sheet 1 of Exhibit B, was accomplished under Job Order No.426 and completed on 6 December 1938.

c. Enlargement of the south levee of the Bear River from W.P.R.R. upstream 4 miles, as shown on Drawing No. 2-4-106, sheets 2 and 3 of Exhibit B, was accomplished under Contract No. W-l04-167-eng-633 by H. Earl Parker and completed on 6 October 1945.

d. Surfacing of levee crown for patrol road purposes along both levees of Yankee Slough and along the upper portion of the south levee of the Bear River, as shown on Drawing No. 50-4-2897, sheet No.1, was accomplished under Contract No. DA-04-167-eng-828 by Browne and Krull and completed on 2 December 1952.

f. Bank protection (Unit No.8) at three locations on the left bank of the Bear River at levee Miles 4.90, 7.12 and 11.6 was accomplished under Contract No. DA-04-167-CIVENG-66-50 by H. Earl Parker Inc. during the period from 18 October 1965 to 14 June 1966. Specification No. 3154, Drawing No. 50-4-4004.

g. Stone protection and levee enlargement on the left bank of the Feather River at Site Miles 1.9, 2.2 and 5.75 (a portion of Unit 12 Sacramento River Bank Protection Project) was accomplished under Contract No. DACW05-68-C-0014 by A. Tiechert & Son during the period from 28 August 1967 to 18 April 1969. Specification No. 3288, Drawing No. 50-4-4078.

h. Bank protection at one location on the left bank of Feather River at levee mile 10.60 and on the left bank of Bear River at levee miles 4.20 and 4.60. All work was accomplished under Contract No. DA-05-70-C-0088 by H. Earl Parker, Inc. during the period from 19 May 1970 to 24 September 1970. Specification No. 3426. Drawing No. 50-4-4377.

i. Bank sloping, stone protection and selective clearing on the left bank of the Sacramento River at Site Mile 79.0 (a portion of Unit 34) was accomplished under Contract No. DACW05-78-C-0046 by Claude C. Wood. Construction was completed on 7 November 1979. Specification No. 5403, Drawing No. 50-4-5433.

j. PL84-99 Emergency Levee Repairs on the right bank of Yankee Slough upstream of Swanson Road were accomplished under Contract No. DACW05-86-0107 by Ford Construction Company, Inc., during the period from 20 September 1986 to 13 November 1986 (Ref. Drawing File No. BE-4-14, sheets 1 & 2, and Specification No. 8010). Federal cost, which included levee repairs on Bear River and Natomas Cross Canal, totaled $212,997.18.

k. Bank sloping, stone protection and selective clearing on the left bank of the Feather River at Site Miles 0.9, 1.5, 5.6, 5.9, and 6.4 (a portion of contract 43) was accomplished under Contract Nos. DACW05-88-B-0055 & DACW05-88-C-0063. Specification No. 8367, Drawing No. 50-4-5798.

l. PL 84-99 rehabilitation repairs on the left bank levee of Yankee Slough and the left bank levee of Bear River were accomplished under two contracts (see tables 1 and 2 for locations). Contract No. W91238-06-D-0029, covering one site on the left bank levee of Bear River and one site on the left bank levee of Yankee Slough (site 007-005C), was completed on November 15, 2007. Contract W91238-08-D-0016 (Task Order No. 0003), covering 5 sites on the left bank levee of Yankee Slough, was completed on September 20, 2008. Contract No. W91238-08-D0016 (Task Order No. 0003) was performed by Santos Excavating, Inc. Specifications: P.L. 84-99 Levee Rehabilitation Repairs. Drawings: “PL 84-99 Levee Rehabilitation Repairs, Cy2008 Order 3-5 Sites, Reclamation District 1001”. There are two sets of drawings with this name, one covering the one site on Yankee Slough and one site on Bear River dated 9-24-07, and the other set of drawings cover the 5 sites on Yankee Slough dated 2-15-08. The Natomas Cross Canal repair sits shown in the drawings are not part of this transfer.

</table>

m. Bank protection, road construction and levee shaping along the left bank of the Feather River for a distance of 1400 feet at River Mile 6.7 was completed on 30 November 1963 under Contract No. DA-04-167-CIVENG-64-33. Specification No. 2985, Drawing No. 4-4-542.

n. Levee enlargement on the left banks of the Feather and Bear Rivers from Nicolaus upstream was accomplished under Contract No. DA-04-167-CIVENG-59-62 by M. Malfitano & Son, Inc., during the period from 16 April 1959 to 16 October 1959. Specification No. 2465, Drawing No. 4-4-450.
1-05. Flood Flows. For purposes of this manual, the term "flood" or "high water period" for the Bear River and Yankee Slough portion of this unit shall refer to flows when the water surface in the Bear River reaches or exceeds the reading of 11.0 feet on the U. S. Geological Survey gage located on the right bank of the Bear River, 100 feet downstream from the U. S. Highway 99E near Wheatland, California. (Zero on this gage and on the staff gage on downstream side of highway bridge is approximately elevation 80.4 feet U. S. Corps of Engineers datum.) Such term for the Feather River portion of this unit shall refer to flows when the water surface in the Feather River reaches or exceeds the reading of 43.0 feet on the State Division of Water Resources and U.S.G.S. gage located on the left bank of the Feather River about 2,000 feet downstream from Nicolaus. (This water stage recorder and staff gage is set on U. S. Corps of Engineers datum.)

1-06. Assurances Provided by Local Interests. Assurance of cooperation by local interests is provided by State legislation as contained in Chapter 3, Part 2, Division 5 of the State Water Code. (See paragraph 2-02a of the Standard Manual.)

1-07. Acceptance by State Reclamation Board. Responsibility for operating and maintaining the completed works was officially accepted by the Reclamation Board of the State of California on 18 December 1951, 2 January 1952 and 2 December 1952, as shown on the attached letters of Acceptance, Exhibit F.

1-08. Superintendent. The name and address of the Superintendent appointed by local interests to be responsible for the continuous inspection, operation, and maintenance of the project works shall be furnished the District Engineer, and in case of any change of Superintendent, the District Engineer shall be so notified.
SECTION II

FEATURES OF THE PROJECT SUBJECT TO FLOOD CONTROL REGULATIONS

2-01. Levees.

a. Description. The levees described in this manual are located along the east side of the Feather River, along the south side of the Bear River and along both banks of Yankee Slough and extend as indicated in paragraph 1-03 of this manual. All levees of this unit were originally built by local interests and portions of the south levee of the Bear River and both levees of Yankee Slough have been rebuilt by the Corps of Engineers to project grade and section. For more complete detail of items in the reconstruction of above mentioned levees, refer to the "As Constructed" drawings of Exhibit B.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements, see the following:

(1) Maintenance - paragraph 4-02 of the Standard Manual.
(2) Check Lists - Exhibit E of this Supplement Manual.
(3) Operation - paragraph 4-04 of the Standard Manual.
(4) Special Instructions - paragraph 4-05 of the Standard Manual.

2-02. Drainage and Irrigation Structures.

a. Description. Drainage and irrigation structures which extend through the levees are listed as follows:

b. For pertinent Requirements of the Code of Federal Regulations and other requirements, see the following:

(2) Check Lists - Exhibit E of this Supplement Manual.

2-03. Channels.

a. Description. The main channel and floodways of the Feather River, Bear River and Yankee Slough for this unit lie adjacent to levees as described in paragraph 1-02. The project design capacities of said channels are as listed in paragraph 1-03 of this manual.

The maintenance and operation of the channel of the Feather River, within this unit, shall be limited to flood control and the requirements which follow shall be observed only to that extent.

The maintenance of the channels of Bear River and Yankee Slough shall be performed in complete accordance with the Federal Control Regulations.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements, see the following:

(2) Check Lists - Exhibit E of this Supplement Manual.

(4) Safety Requirements - 6-05 of the Standard Manual.

It shall be the duty of the Superintendent to maintain a patrol of the project works during all periods of flood in excess of a reading of 11.0 on the gage located on the Bear River near Highway 99E and a reading of 43.0 on the gage located on the Feather River near Nicolaus, as indicated in paragraph 1-05 of this manual. The Superintendent shall dispatch a message by the most suitable means to the District Engineer whenever the water surface in the Bear River or the Feather River reaches the gage readings indicated above. The Superintendent shall cause readings to be taken at said gages at intervals of two to four hours during the period when the water surface is above
flood-flow stage and record the time of the observations. One copy of
the readings shall be forwarded to the District Engineer immediately
following the flood, and a second copy transmitted as an inclusion to
the semi-annual report in compliance with paragraph 3-06 of the Standard
Manual.

2-04. Miscellaneous Facilities.

a. Description. Miscellaneous structures or facilities which
were constructed as a part of, or in conjunction with, the protective works,
and which might affect their functioning, include the following:

(1) Bridges.

(a) S.P.R.R. Bridge crossing the Bear River near
Wheatland.

(b) Highway 99E Bridge crossing the Bear River near
Wheatland

(c) Carlin Road Bridge crossing the Bear River and
another bridge crossing Yankee Slough near station 703+90 of Bear River
traverse.

(d) W.P.R.R. Bridge crossing the Bear River and
Yankee Slough near Rio Oso (same bridge and trestle).

(e) Sacramento Northern Railroad trestle crossing
the Bear River near Rio Oso.

(f) County road bridge crossing the Bear River at
Rio Oso.

(g) Highway Bridge crossing the Feather River at
Nicolaus.

(2) Utility Relocation. Because of the nature of the
construction of structures by local interests, records of utility
relocations are not available.

(3) Hydrographic Facilities. Hydrographic facilities
provided within this unit consist of the following:

(a) U. S. Geological Survey continuous water stage
recorder and staff gage located on the right bank of the Bear River,
100 feet downstream from U. S. Highway 99E near Wheatland.

(b) State Division of Water Resources and U. S. G. S.
continuous water stage recorder and staff gage located on the left bank
of the Feather River about 2,000 feet downstream from Nicolaus. These
gages are maintained by the Government agencies indicated above.
b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(2) Check Lists - paragraph 7-03 of the Standard Manual.

2-05. Environment Protection.

a. Vegetation left during construction on the waterside berm or slope above the bank protection shall not be removed under normal maintenance. Dead trees with wildlife value will be retained except where they are a hazard to existing flood control works.
SECTION III

REPAIR OF DAMAGE TO PROJECT WORKS AND
METHODS OF COMBATING FLOOD CONDITIONS

3-01. Repair of Damage. In the event of serious damage to the project works, whether due to flood conditions or other causes, and which may be beyond the capability of local interests to repair, the Superintendent will contact a representative of the Division of Water Resources, State of California, who coordinates maintenance of project works of the Sacramento River Flood Control Project. The State representative will give assistance or advice, or will determine appropriate action to be taken.

3-02. Applicable Methods of Combating Floods. For applicable methods of combating flood conditions, reference is made to Section VIII of the Revised Standard Manual, where the subject is fully covered.

INSTRUCTIONS FOR COMPLETING SHEET 2, EXHIBIT E
(to be printed on back of sheet 2)

Item (a) Indicate levee station of observation, obtained by pacing from nearest reference point; indicate right or left bank.

Item (b) If sufficient settlement of earthwork has taken place to be noticeable by visual observation, indicate amount of settlement in tenths of a foot. If sloughing has caused a change in slope of the embankment sections, determine the new slope. Note areas where erosion or gullyling of the section has occurred.

Item (c) If sufficient erosion or gullyling of back face of back toe of levee has taken place to be noticeable by visual inspection, indicate area affected and depth.

Item (d) Note any natural change in any section of roadway or ramps. Indicate any inadequacy in surface drainage system.

Item (e) Indicate any evidence of seepage through the embankment section.

Item (f) Indicate the serviceability of all farm gates across the embankments and roadway, and indicate if repainting is required.

Item (g) Indicate maintenance measures that have been performed since last inspection and their condition at the time of this inspection.

Item (h) Record opinion, if any, of contributory causes for conditions observed and also any observations not covered under other columns.

NOTE: One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion, and one copy is to be attached to and submitted with the Superintendent's semi-annual report.

INSTRUCTIONS FOR COMPLETING SHEET 4, EXHIBIT E
(to be printed on back of sheet 4)

Item (a) Indicate station of observation obtained by pacing from nearest reference point.

Item (b) Note nature, extent, and size of vegetal growth within the limits of flood flow channel.

Item (c) Note nature and extent of debris and refuse that might cause clogging of the conduits of the irrigation intake works, fouling of the tainter gates, or the bridges over the channel.

Item (d) Report any construction along the diversion channel or above the diversion channel or above the diversion works that has come to the attention of the inspector and that might affect the functioning of the project.

Item (e) Indicate any change in grade or alignment of the channels, either by deposition or sediment or scour, that is noticeable by visual inspection. Estimate amount and extent.

Item (f) Indicate any change that has taken place in the riprap such as disintegration of the rock, erosion, or movement of the rock. Note the presence of vegetal growth through the riprap.

Item (g) Note any damage or settlement of the footings of the bridges. Indicate condition of wooden structures and if repainting is required. Indicate condition of bridge approaches, headwalls, and other appurtenances.

Item (h) Indicate maintenance measures that have been performed since the last inspection and their condition at time of this inspection.

Item (i) Record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

NOTE: One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion, and one copy is to be attached to and submitted with the Superintendent's semi-annual report.

CHECK LIST No. 4
DERAINAGE AND IRRIGATION STRUCTURES
Unit No. 141-Part No. 1

Inspector's Report Sheet No.

Date

EXHIBIT E-Sheet 7 of 8
INSTRUCTIONS FOR COMPLETING SHEET 6, EXHIBIT E
(to be printed on back of sheet 6)

(1) Enter station of all structures under Column (a) for check list.

(2) Inspect inlet, barrel, and outlet for accumulation of sediment, rubbish, and vegetal matter. Note condition under Column (c).

(3) If any settlement or damage to the pipe, barrel, or invert of the drain has occurred, estimate the location and amount. Note particularly if any backfill has come into the pipe or been disturbed. Record observations under Column (d).

(4) Inspect the concrete portions of the structures for evidence of settlement, cracks, "pop-outs", spaces, abrasive wear, or other deterioration. Record conditions under Column (e).

(5) Inspect backfill area adjacent to structure for evidence of erosion caused by overflow of the drainage structure and note conditions in Column (f).

(6) Under Column (g) indicate physical measures that have been taken to correct conditions reported in last inspection, and their condition at time of this inspection.

(7) Under Column (h) record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

(8) A copy of the inspector's report is to be mailed to the District Engineer immediately on completion, and a record copy shall be attached to the Superintendent's semi-annual report.
EXHIBIT F

LETTER OF ACCEPTANCE
BY STATE RECLAMATION BOARD
Ms. Leslie M. Gallagher  
Executive Officer  
Central Valley Flood Protection Board  
3310 El Camino Avenue, Room 151  
Sacramento, CA 95821

Dear Ms. Gallagher:

The purpose of this letter is to notify the Central Valley Flood Protection Board of the completion of an effort to update the Operation and Maintenance Manual Supplements for the Sacramento River Flood Control Project and the Lower San Joaquin River Levees and Lower San Joaquin River and Tributaries Project. These updates are a compilation of revisions made to the project over time and where we had record of a transfer letter to the Board. These updated supplements are the most current version and should be utilized as the baseline version for any future project modifications.

This process and the compiled updates have been coordinated with the Central Valley Flood Protection Board and Department of Water Resources staffs for review and comment. All comments have been addressed or incorporated into the manuals.

The Board staff has been provided a copy of the manuals in electronic format. Future updates will include entire unit supplements so updates can be seen in context with the entire unit supplement. The list of completed supplements, by the unit number and title, are attached. If you have any questions regarding this transmittal, please contact Gary Kamei at 916-557-6845.

Sincerely,

[Signature]

David G. Ray, P.E.  
Colonel, U.S. Army  
District Commander

Mr. Jay Punia, Executive Officer
Central Valley Flood Protection Board
3310 El Camino Avenue, Room 151
Sacramento, California 95821

Dear Mr. Punia:

The U.S. Army Corps of Engineers has completed a portion of work under PL 84-99, Flood Control and Coastal Emergencies (FCCE) (33 U.S.C. 701n) (69 Stat. 186) for emergency management activities. Repairs were made to rehabilitate various sites along the left bank levees of Bear River and Yankee Slough within Reclamation District 1001. Additional information about the repair and location of the sites may be found in the document titled, "Project Information Report for Public Law 84-99 Levee Rehabilitation, Reclamation District 1001, (Final)", dated June 25, 2007.

The rehabilitation work meets the requirements of the existing Operation and Maintenance Manuals and enclosed revisions. The subject flood damage reduction project is considered complete as of the date of this letter. The repairs were completed under Contract Number W91238-08-D-0016, Task Order Number 3 and W91238-06-D-0029. As-constructed drawings and revisions to the Operation and Maintenance Manual are enclosed. Please note that repairs to the Natomas Cross Canal, as shown in the enclosed drawings, are part of Unit 141 of the Sacramento River Flood Control Project and are addressed in a separate letter. The Central Valley Flood Protection Board shall continue to operate and maintain the completed Rehabilitation Effort as part of the project.

Mitigation plantings for the above work are required but have not been completed. The estimated completion date for the plantings is Spring 2011. All mitigation plantings will be ETL 1110-2-571 compliant. After completion of the plantings, a separate letter with addendum and as-builts will be sent to you.

If you have any questions regarding this project, please contact Ms. Paige Caldwell (916) 557-6919 or Ms. Christy Jones (916) 557-7107, Readiness Section. If you have any questions regarding this transfer, please contact Mr. Ryan Larson at (916) 557-7568 or Mr. Robert Murakami at (916) 557-6738, Flood Protection and Navigation Section.
A copy of this letter is being furnished to Reclamation District 1001, 1959 Cornelius Avenue, Rio Oso, CA 95674.

Sincerely,

William J. Leady, P.E.
Colonel, U.S. Army
District Commander

Enclosure

Navigation and Flood Control Unit

The Reclamation Board
State of California
1416 - 9th Street, Room 455-6
Sacramento, California 95814

Members of the Board:

This is in regard to the joint inspection of January 5, 1990, made for the purpose of transferring a portion of the Sacramento River Bank Protection Project (Unit 43) to the State of California for operation and maintenance. The flood control work consists of bank sloping, placement of stone protection and miscellaneous work on the Feather River left bank at Site Miles 0.9, 1.5, 5.6, 5.9 and 6.4.

The sites were completed on December 8, 1989, in accordance with Contract Number DACW05-88-C-0063, Specification Number 8367 and Drawing Number 50-4-5798.

The work was performed under general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session (PL 86-645, July 14, 1960), Section 2304(a), Title 10, and the Water Resources Development Act of 1986 (PL 99-662, October 17, 1986), and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway bank contiguous thereto is transferred as of January 5, 1990 to the State of California for operation and maintenance. A. SMITH

This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Number 141, Part H, Number 1, Sacramento River Flood Control Project. Copies will be furnished to your office at a later date.

Members of the Board:

This is in regard to the joint inspection of November 14, 1989, made for the purpose of transferring a portion of the Sacramento River Bank Protection Project (Unit 43) to the State of California for operation and maintenance. The flood control work consists of bank sloping, placement of stone protection and miscellaneous work on the Feather River right bank at Site Mile 51.1; Colusa Basin Drain left bank at Site Mile 8.5; Sutter Bypass right bank at Site Mile 64.0 and Yolo Bypass left bank at Site Mile 54.1.

The sites were completed on November 14, 1989, in accordance with Contract Number DACW05-88-C-0063, Specification Number 8367 and Drawing Number 50-4-5798.

The work was performed under general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session (PL 86-645, July 14, 1960), Section 2304(a), Title 10, and the Water Resources Development Act of 1986 (PL 99-662, October 17, 1986), and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway bank contiguous thereto is transferred as of November 14, 1989 to the State of California for operation and maintenance.

This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Numbers 123, 129, 131, 132 and 162, Sacramento River Flood Control Project. Copies will be furnished to your office at a later date.

Members of the Board:

You are hereby notified that the Corps of Engineers has completed emergency repairs to project levees under authority of Section 3 of the Flood Control Act of August 18, 1941, as amended (Public Law 99, 84th Congress, 1st Session). The work was completed on November 8, 1966, and consisted of restoring a portion of the Yankee Slough and Natomas Cross Canal right bank levees in Reclamation District 1001 and the Bear River right bank levee in Reclamation District 217, in accordance with Contract Number DACW52-66-C-0007 and Drawing Number BK-4-16. This work shall be maintained in accordance with the assurances which your Board provided for the Sacramento River Flood Control Project. This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Numbers 141, 142 and 146, Sacramento River Flood Control Project. Copies will be furnished to your office at a later date.

Dear Colonel Kavanaugh:

The Reclamation Board at its regular meeting of December 14, 1979, authorized me to accept the completed flood control work from the District Engineer. This work is a portion of Unit No. 34 of the Sacramento River Bank Protection Project. The work was transferred to the State of California by your letter of December 4, 1979.

The flood control work was constructed in a workmanlike manner and in conformance with File No. 50-4-5433, Specification No. 5403, and Contract No. DACW05-78-C-0046, insofar as could be determined visually, at Sites Miles 62.7 Right Bank and 79.0 Left Bank, Sacramento River.

Sincerely,

Gentlemen:

This is in regard to the joint inspection of 30 November 1979 made for the purpose of transferring a portion of the Sacramento River Bank Protection Project (Unit 34), to the State of California for Operation and Maintenance. The flood control work consists of levee bank sloping and placement of stone protection on the Sacramento River right bank at Site Mile 62.7 and left bank at Site Mile 79.0. The sites described on the inclosure were completed on 30 November 1979 in accordance with Contract No. DACW05-78-C-0046, Specification No. 5403 and Drawing No. 50-4-5433.

The work was performed under general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session (PL86-645, 14 July 1960), and Section 2304 (a), Title 10, and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway bank contiguous, thereto, is transferred as of 30 November 1979 to the State of California for operation and maintenance.

This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Nos. 116 and 141 Part No. 1, Sacramento River Flood Control Project. Copies will be furnished your office at a later date.

Sincerely,

PAUL F. KAVANAUGH

Summary of Scavenging River Bank Protection

South Dry Creek & Bear River
unit #16 - Feather River.
District Engineer
Corps of Engineers
U. S. Army
650 Capitol Mall
Sacramento, California 95814

Dear Sir:

Reference is made to your letter of April 29, 1969 concerning transfer to the State of California of a portion of the Sacramento River Bank Protection Project, Unit No. 12, consisting of Sites Mile 1.9, 2.2 and 5.75, left bank, Feather River for operation and maintenance.

This work was constructed in accordance with Specification No. 3288, Contract No. DACW05-68-C-0014, Drawing No. 50-4-4078.

The Reclamation Board, at its meeting of November 7, 1969, formally accepted the above-referred to work for operation and maintenance.

Sincerely yours,

/s/ A. E. McCOLLAM
A. E. McCOLLAM

Gentlemen:

Reference is made to the joint inspection of 28 April 1969, made for the purpose of transferring a portion of the Sacramento River Bank Protection work (Unit #12), to the State of California for operation and maintenance.

The flood control work consisting of levee enlargement, bank sloping, levee setback and placement of stone bank protection on the left bank of the Feather River at Site Miles 1.9, 2.2 and 5.75 is listed on the enclosure. The work was completed on 28 April 1969, in accordance with Specification #3288, Contract No. BIAW65-63-C-001k, Drawing #50-4-5075.

The work was performed under the general authority of the Flood Control Act of 1960, 86th Congress, 2nd Session; and Section 2304(a), Title 40, and now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said work together with the waterway banks contiguous thereto, is transferred to the State of California for operation and maintenance.

This portion of the project work will be added by amendment to the Operation and Maintenance Manual, Supplement No. 141, Sacramento River Flood Control Project. Copies will be furnished your office at a later date.

Sincerely yours,

GEORGE F. FINK

Sacramento, California 95814

Gentlemen:

Reference is made to the joint inspection of 14 June 1966, made for the purpose of transferring a portion of the Sacramento River Bank Protection work, upon completion, to the State of California for operation and maintenance.

The flood control work, consisting of levee enlargement, levee set-back, bank sloping and placement of bank protection at: Sacramento River, Site Mile 77.6, left bank; Feather River, Site Mile 24.5, right bank; and Bear River, Site Miles 1.76 & 2.96, right bank and 4.90, 7.12 and 11.6, left bank; as listed on the attached enclosure. Work was completed on 14 June 1966, in accordance with Specification No. 3155, Contract No. DA-00-167-GIVEN-66-50, Drawing No. 50-4-4004.

The work was performed under the general authority of the Flood Control Act of 1965, 86th Congress, 2nd Session; and Section 230h(a), Title 10.

The flood control work now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said flood control work is transferred to the State of California for operation and maintenance.

This portion of the project work will be added by amendment to the Operation and Maintenance Manual by Supplement to the Sacramento River Flood Control Project, and furnished your office at a later date.

Sincerely yours,

T. S. Meade

THE RECLAMATION BOARD  
State of California  
January 11, 1966  

District Engineer  
Corps of Engineers  
U. S. Army  
650 Capitol Mall  
Sacramento, California  

Dear Sir:

Reference is made to your letter of November 29, 1965, concerning transfer to the State of California of the Sacramento River Bank Protection Project, Contract 14, ten sites between Sacramento and Gerber, in accordance with Specification No. 3283.

The Reclamation Board, at its meeting of January 6, 1966, formally accepted the above referred to work for operation and maintenance.

Sincerely yours,

/s/ A. E. McCollam  
A. E. McCOLLAM  
General Manager
The Reclamation Board  
State of California  
1416 - 9th Street, Room 1335  
Sacramento, California  95814

Gentlemen:

Reference is made to the joint inspections made on 17 & 19 November 1965, of flood control work pertaining to the Sacramento River Bank Protection Project for the purpose of transferring this work, upon completion, to the State of California for operation and maintenance.

The flood control work, consisting of levee enlargement, levee setback, shaping and placement of bank protection at 4 locations on Elder Creek near Highway U.S. 99; one location on the Sacramento River at Hamilton Bend, three locations on the Feather River near Nicolaus and one location near the Gridley Bridge, and one location on the American River downstream from the "H" Street Bridge, as listed on the attached enclosure, was completed on 19 November 1965, in accordance with Specification No. 3283, Contract No. DA-04-167-CIVIL-06-29 and Drawing No. 50-4-4116.

The flood control work as described on the attached enclosure now meets the requirements of the Sacramento River Bank Protection Project. Therefore, said flood control works, together with the waterside banks contiguous thereto are transferred to the State of California for operation and maintenance.

This portion of the project work will be added by amendment to the Operation and Maintenance Manual, Supplement Nos. 118-Elder Creek, 136, 141 and 152-Sacramento River Flood Control Project, and furnished your office at a later date.

Sincerely yours,

District Engineer
Corps of Engineers
U. S. Army
P. O. Box 1739
Sacramento 8, California

Dear Sir:

Reference is made to your letter of December 6, 1963, concerning transfer to the State of California of bank protection work on the Sacramento River Bank Protection Project, Contract 7, Left Bank Feather River at Mile 6.7 in the vicinity of Nicholau in accordance with Specification No. 2786.

The Reclamation Board, at its meeting of January 3, 1964, formally accepted the above referred to bank protection work for operation and maintenance.

Sincerely yours,

A. E. McCOLLAM
General Manager

JHMacClgg
The Reclamation Board  
State of California  
1215 "O" Street  
Sacramento 1, California

Gentlemen:

Reference is made to the joint inspection made on 21 November 1963 of flood control work pertaining to the Sacramento River Bank Protection Project for the purpose of transferring it, upon completion, to the State of California for operation and maintenance.

The flood control work consists of shaping levee section, placing bank protection and construction of asphalt road surface on levee crown on the left bank of Feather River for a distance of 1,400 feet at River Mile 6.7 site. The work was completed on 30 November 1963 in accordance with Specification No. 2985, Contract No. DA-04-189-CIVENG-64-33 and Drawing No. L-4-542. Work under this contract does not include bank protection on the right bank of Elder Creek, which will be transferred by separate letter.

The flood control work described above now meets the requirements of the project. Therefore, said flood control work together with the waterway banks contiguous thereto are transferred to the State of California for operation and maintenance. A maintenance manual has already been furnished which adequately covers operation and maintenance requirements for the above reach of project levees.

A copy of this letter is being transmitted to the Department of Water Resources.

Sincerely yours,

ROBERT E. NATHE  
Colonel, CE  
District Engineer

U. S. Corps of Engineers
P. O. Box 1739
Sacramento, California

Dear Sir:

Reference is made to your letter of November 10, 1959, SPKKO-P, regarding transfer to the State of levee sections on the left bank of the Feather River, Bear River and Yankee Slough, at the locations listed below:

<table>
<thead>
<tr>
<th>Levee Sect.</th>
<th>Location</th>
<th>Mile Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>646</td>
<td>Left Bank, Feather River</td>
<td>9.92 to 12.55</td>
</tr>
<tr>

</tr>
<tr>
<td>648</td>
<td>Left Bank, Yankee Slough</td>
<td>0.00 to 0.75</td>
</tr>
<tr>
<td>649</td>
<td>(Patrol road surfacing only)</td>
<td>0.75 to 1.95</td>
</tr>
</tbody>
</table>

The Reclamation Board at its meeting of November 19, 1959 formally accepted these levee sections for operation and maintenance.

Sincerely yours,

A. N. Murray
General Manager and Chief Engineer

HSH:emw
The Reclamation Board  
State of California  
1215 "O" Street  
Sacramento 14, California

Gentlemen:

Reference is made to the joint inspection made on 24 August 1959 of certain levee sections pertaining to the Sacramento River Flood Control Project for the purpose of transferring them to the jurisdiction of the State of California.

The required work, consisting of levee construction referred to above is completed in accordance with Specification No. 2465, Contract No. DA-04-167-CIV-RK-59-62 and Drawing No. 4-4-450. The levee sections referred to above are listed as follows:

<table>
<thead>
<tr>
<th>LEVEE SECT.</th>
<th>LOCATION</th>
<th>MILE POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>646</td>
<td>Left Bank, Feather River</td>
<td>9.92 to 12.55</td>

</tr>
<tr>
<td>649</td>
<td>Left Bank, Yankee Slough</td>
<td>(Patrol road surfacing only) 0.75 to 1.95</td>
</tr>
</tbody>
</table>

The levee sections Nos. 646 to 649 inclusive, described above, now meet the requirements of the Sacramento Flood Control Project. Therefore said levee sections, together with the waterway banks contiguous thereto, are hereby transferred to the State of California for operation and maintenance.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations, inclosed herewith, which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act.
SPKCO-P

The Reclamation Board

of Congress, approved 22 June 1936, as amended and supplemented by the current issue of the Standard Operation and Maintenance Manual for the Sacramento River Flood Control Project. As provided under Paragraph 208.10(10) of these regulations, a supplement to the Standard Operation and Maintenance Manual covering these units of work is in process of preparation and will be furnished to you upon completion.

A copy of this letter is being transmitted to the Department of Water Resources.

Sincerely yours,

H. A. MORRIS

Gentlemen:

Reference is made to District Engineer letter dated 3 September 1952, wherein it was suggested that a joint inspection be made for the purpose of transferring to the jurisdiction of the State of California, when completed, various levee units of the Sacramento River Flood Control Project. Reference is also made to joint inspections of these units of work which were made on 18 July and 11 September 1952.

In accordance with the above, you are hereby advised that the units listed below, which are covered under Specification No. 1636, Drawing No. 50-4-2897, have been completed as follows:

Part "F" - Levees protecting the City of Marysville:

1. Levee and patrol road along the left bank of Nigger Jack Slough, also known as "Simmerly Slough", from the Western Pacific Railroad to the Feather River at Marysville, California, completed 24 September 1952.

2. Levee and patrol road along the left bank of the Feather River and the right bank of the Yuba River, from Nigger Jack Slough to "D" Street Bridge at Marysville, California, completed 24 September 1952.

Part "G" and "H" - Westerly Levees of the Feather River:

1. Levee and patrol road along the right bank of the Feather River, from 5th Street bridge, Yuba City, upstream 1400 feet, at Yuba City, Sutter County, California, completed 5 September 1952.
2. From Station 0+00 to 172+70, levee and patrol road along the right bank of the Feather River, from Nicols Bridge upstream approximately 3.31 miles, near Nicols, Sutter County, California, completed 26 September 1952.

Part "I" - Southerly Levees of Bear River:

From Station 46+80 to 343+70, levee and patrol road along the left bank of Bear River from a point 5,400 feet upstream from Carlin Bridge upstream to high ground, near Wheatland, Yuba County, California, completed 8 September 1952.

Part "J" and "K" - Southerly and Northerly Levees of Yankee Slough:

1. From Station 316+70 to 511+10, levee and patrol road along the left bank of Yankee Slough, from the W.F.R.R. upstream to high ground, near Rio Oso, Sutter County, California, completed 26 September 1952.

2. From Station 166+70 to 536+09, levee and patrol road along the right bank of Yankee Slough, from its junction with Bear River upstream to high ground, completed 16 September 1952.

Part "L" - Southerly Levee of South Dry Creek and Easterly and Westerly Levees of Grasshopper Diversion Channel:

1. From Station 96+45 to 671+28, levee and patrol road along the left bank of South Dry Creek Channel, from a point 1.86 miles upstream from Bear River to the westerly levee of Grasshopper Diversion Channel, near Wheatland, California, completed 8 September 1952.

2. From Station 377+60 to 418+16, levee and patrol road along the left bank of South Dry Creek, from the easterly levee of Grasshopper Diversion Channel upstream approximately 4056 feet, near Wheatland, California, completed 8 September 1952.

3. From Station 0+00 to 25+69, levee and patrol road along the westerly bank of Grasshopper Diversion Channel, from the southerly levee of South Dry Creek upstream approximately 2569 feet near Wheatland, California, completed 8 September 1952. Station 25+69 corresponds to Station 390+50 shown on drawing.

4. From Station 0+00 to 13+85, levee and patrol road along the easterly bank of Grasshopper Diversion Channel from the southerly levee of South Dry Creek upstream approximately 1385 feet, near Wheatland, California, completed 8 September 1952.
The levee units referred to above, together with the patrol roads thereon, form an integral part of the Sacramento River Flood Control Project and meet with the requirements of the project. Therefore, said levee units, together with the waterway banks contiguous thereto, are hereby transferred to the State of California for operation and maintenance.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress, approved 22 June 1936, as amended and supplemented. As provided under Paragraph No. 208.10 (10) of these regulations, a maintenance manual covering these levee units is in process of preparation and will be furnished to you upon completion.

A copy of this letter is being transmitted to the State Engineer.

The Reclamation Board
State of California
1100 "O" Street
Sacramento 14, California

Gentlemen:

Reference is made to your letter of 2 July 1951 acknowledging that certain reaches of the levees of the Sacramento River Flood Control Project and the waterway bank contiguous to said levee reaches meet the requirements of the project as authorized prior to the Flood Control Act of 1944.

The levee reaches in question are located as follows:

a. Sherman Island levee of Three Mile Slough.

   (1) State Highway Bridge to Sacramento River. 199 101

   (2) From the State Highway Bridge, 1800 feet toward the San Joaquin River. 200 101

   (3) From a point 3900 feet toward the San Joaquin River from the State Highway Bridge to a point 5900 feet toward the San Joaquin River from the State Highway Bridge. 201 101

   (4) From a point 10,500 feet toward the San Joaquin River from the State Highway Bridge to the San Joaquin River. 202 101

b. Plug across Seven Mile Slough near Three Mile Slough. 203 102

c. Brennan Island levee of Seven Mile Slough and Three Mile Slough from the Plug across Seven Mile Slough southerly to Sacramento River. 204 105

Items 199 to 205

13
1. Easterly levees of the Sacramento River.

(1) From a point 23,650 feet, measured along the Sherman Island levee, downstream from Three Mile Slough to a point 21,950 feet downstream from Three Mile Slough.

(2) From a point 14,850 feet, measured along the Sherman Island levee, downstream from Three Mile Slough to a point 7,700 feet downstream from Three Mile Slough.

(3) From a point 6,300 feet, measured along the Sherman Island levee, downstream from Three Mile Slough to a point 3,450 feet downstream from Three Mile Slough.

(4) From a point 5,500 feet, measured along the Sherman Island levee, downstream from Three Mile Slough to a point 700 feet downstream from Three Mile Slough.

(5) From a point 600 feet, measured along the Sherman Island levee, downstream from Three Mile Slough to Three Mile Slough.

(9) Mile 14.5 (Junction Point) to Mile 16.0.

(10) Mile 15.1 to Mile 16.9.

(11) Mile 16.06 to Mile 17.5.

(12) Mile 17.6 to Mile 18.0.

(14) Mile 18.6 to Mile 21.5.

(15) Mile 21.6 to Mile 26.3.

(16) Mile 26.4 to Georgiana Slough.

(17) Mile 26.5 to Mile 27.65.

(18) Mile 27.7 to Mile 28.5.
d. Easterly levee of the Sacramento River. (cont'd)

243 (20) Mile 29.1 to Mile 29.9.
244 (22) Mile 30.25 to Mile 30.56.
245 (23) Mile 31.8 to Mile 32.2.
246 (24) Mile 32.4 to Mile 35.0.
247 (25) Mile 33.1 to Mile 34.15.
248 (26) Mile 34.15 to Mile 34.95.
250 (28) Mile 35.38 to Mile 35.74.
251 (29) Mile 35.86 to Mile 36.56.
252 (30) Mile 36.5 to Mile 36.75.
253 (31) Mile 36.86 to Mile 37.16.
254 (32) Mile 37.5 to Mile 37.85.
255 (33) Mile 38.0 to Mile 39.3.
256 (34) Mile 39.5 to Mile 39.15.
258 (36) Mile 40.0 to Mile 40.15.
259 (37) Mile 40.25 to Mile 40.35.
260 (38) Mile 40.5 to Mile 40.8.
261 (39) Mile 41.2 to Mile 41.6.
262 (40) Mile 41.75 to Mile 42.35.
263 (41) Mile 42.5 to Mile 43.05.
d. Easterly levees of the Sacramento River. (cont’d)

246  Mile 43.5 to Mile 45.55

247  Mile 45.55 to Mile 46.2

248  Mile 46.8 to Mile 48.5, x O 115

249  Mile 56.4 to Mile 56.5

250  Mile 56.1 to American River, x D 118.1

254  Mile 92.9 to Mile 94.0, x

255  Mile 96.6 to Mile 97.4

256  Mile 97.6 to Mile 97.7

257  Mile 97.7 to Mile 97.8

258  Mile 99.9 to Mile 102.6, x

259  Mile 103.45 to Mile 103.7

260  Mile 103.9 to Mile 104.2

261  Mile 104.2 to Mile 104.7, x

262  Mile 104.7 to Mile 105.6

263  Mile 110.9 to Mile 111.5, x

264  Mile 118.4 to Mile 119.5 (South end Tisdale Weir)

265  At Tisdale Weir, x 15.0

e. Northerly levees of Meris Slough from a point 1,200 feet easterly from the northerly levees of Yolo Bypass to a point 4,400 feet easterly from the easterly levees of Yolo Bypass.
The Reclamation Board

f. Wasterly levee of Sutter Slough.
   2. Mile 27.05 to Mile 27.2.
   3. Mile 27.3 to Elkhorn Slough.

g. Wasterly levee of Elkhorn Slough.
   1. Sutter Slough to Station "A" 431+00.
   2. Station "A" 429+50 to Station "A" 405+00.
   3. Station "A" 403+00 to Station "A" 344+75.
   4. Station "A" 340+75 to Station "A" 326+00.
   5. Station "A" 324+00 to Station "A" 60+50.

h. Wasterly levee of the Sacramento River.
   1. Mile 119.2 to Mile 119.7.
   3. Mile 133.1 to Mile 155.3.
   4. Mile 134.0 (Meridian Bridge) to Mile 154.3.
   5. Mile 154.3 to Mile 140.0.
   6. Mile 140.6 to Mile 141.8.
   7. Mile 141.3 to Mile 142.0.
   8. Mile 142.0 to Mile 142.5.
   9. Mile 142.3 to Mile 142.7 (Union Oil Co. Wharf).

i. Wasterly levee of Georgiana Slough from the S.P.R.R. apex 22,500 feet.

j. Northerly levee of the American River and the back levee of Reclamation District No. 1000 from Jibboom Street Bridge to El Camino Avenue.
SPEKA 524,3 (Sac. River, P. & E. P.)
The Reclamation Board

k. Northerly levees of Natomas Cut.

(1) From Sacramento River easterly to a point 1,650 feet easterly from the Garden Highway Bridge.

(2) From a point 2,650 feet easterly from the Garden Highway Bridge to a point 3,250 feet easterly from the Garden Highway Bridge.

1. Back levees of Reclamation District No. 2068 along the S. N. B. R. from the County Road northeasterly 7,300 feet to high ground.

m. Southerly levee of North Dry Creek near Wheatland from high ground to the W. P. & R. R. Interceptor.

n. Easterly levee of the W. P. & R. R. Interceptor from North Dry Creek southerly to Bear River.

o. Northerly levees of Bear River from the W. P. & R. R. Interceptor easterly to South Dry Creek.

p. Northerly levees of South Dry Creek near Wheatland from Bear River easterly to high ground, including the Singh saddle closure levee.

q. Southerly levee of Bear River from the W. P. & R. R. easterly to a point 5,400 feet easterly from Carlin Bridge.

r. Southerly levee of South Dry Creek near Wheatland from Bear River easterly 1.86 miles.

s. Northerly levee of Bear River from South Dry Creek easterly to a point 4,000 feet easterly from Carlin Bridge.

The records of this office show that your Board has accepted the levees and/or works covered by Items d(16), d(15), d(16), d(15), d(17), d(16), d(27), d(28), d(32), d(27), d(32), d(34), d(36), d(37), d(36), h(5), h(5), h(5), h(7), h(9), h(9), m(2), m(5), m(4), p(3), q(3), p(2), and r(3), above, as complete. Accordingly the waterway bank contiguous to said Items is hereby transferred to the State of California for maintenance and operation.

The levees covered by Items a to c inclusive, d(1) to d(15), inclusive, d(17), to d(27), inclusive, d(28) to d(49), inclusive, d(51), d(52), d(56), d(58), d(60), d(60), c, f, g, h(1), h(2), h(4), h(6), h(8) and j, to l(1), inclusive, above, although complete has not been formally transferred as contemplated by the Project documents.
Accordingly the levee covered by said Items, together with the waterway bank contiguous thereto, is hereby transferred to the State of California for maintenance and operation.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations which have been prescribed by the Secretary of the Army pursuant to Section 5 of the Act of Congress approved 22 June 1936, as amended and supplemented. As provided under paragraph 200.10(10) of these regulations, a maintenance manual covering these works is in process of preparation and will be furnished your Board upon completion.

A copy of this letter is being transmitted to the State Engineer.

Sincerely yours,

H. R. Reifsnider
Lt. Colonel, Corps of Engineers
Executive Officer

COPY FURNISHED:

C. de Arrieta
The Reclamation Board
State of California
1100 "G" Street
Sacramento 14, California

Gentlemen:

Reference is made to your letter of 22 June 1961 acknowledging that certain reaches of the levees of the Sacramento River Flood Control Project and the waterway bank contiguous to said levee reaches meet the requirements of the project as authorized prior to the Flood Control Act of 1944.

The levee reaches in question are located as follows:

a. Northerly levee of the American River from Jibboom Street Bridge to Sacramento River. 118.2 (?)

b. Easterly levee of the Sacramento River.

(1) American River to Matona Cut. 60.25 to 79.0 134

(2) At Houlton Weir. (Man 2) 154

(3) Mile 154.5 (North End Houlton Weir) to Mile 164.4 (Princeton Ferry). (Man 2) 138

(4) Mile 164.5 to Mile 165.9 (at Butte City). (Man 2) 138

c. Southerly levee of the Sacramento River.

(1) Mile 50.9 to Mile 60.75. 116

(2) Mile 61.9 to Mile 82.05 (at Bryte Bend) 515

Items 140 to 198
c. Westerly levee of the Sacramento River (cont'd)

1. Mile 62.65 to Mile 65.1 (South End Sacramento Weir). 116
2. At Sacramento Weir. 118
3. Mile 65.5 (North End Sacramento Weir) to Mile 67.11. 122
4. Mile 68.42 to Mile 70.9. 122
5. Mile 76.5 to Mile 81.7 (East End Fremont Weir). 123
6. Along Fremont Weir. 127
7. Mile 84.0 (West End Fremont Weir) to Mile 85.5. 128
8. Mile 85.5 to Mile 86.9. 128
9. Mile 87.6 to Mile 89.4. 128
10. Mile 89.2 to Mile 89.5 (Knights Landing Highway Bridge). 128
11. Mile 89.5 (Knights Landing Highway Bridge) to Sycamore Slough. 89.9 128
12. Mile 100.9 to Mile 101.4. 128
13. Mile 110.9 to Mile 111.2. 128

d. Westerly levee of the Feather River.

1. Sutter Bypass to Nicolaus Bridge. 127
2. From a point 5.31 miles northerly from Nicolaus Bridge to the Fifth Street Bridge between Marysville and Yuba City. 143, 144
3. From a point 1,400 feet northerly from the Fifth Street Bridge between Marysville and Yuba City to Station 774+30 "Y.C.N.B." Traverse. 144
4. From a point east of Station 118+40 "Y.C.N.B." Traverse to high ground just northerly from the Western Canal Roadgate. 144

4. Westerly levee of the Sacramento River from Matoma Cut to Feather River. 144
1. Easterly levee of the Feather River.
   Reach 42
   (1) Sacramento River to a point 2.37 miles southerly from Nicolaus Bridge.
   (165)
   Reach 41
   (2) Bear River to Mile 14.4.
   Mile 14.7 to Mile 21.5.
   Mile 21.5 to Mile 22.75.
   Mile 22.75 to Mile 28.6 (Point where levees and S.P.R.R. meet).
   (166)
   (167)
   (168)
   (169)
   (170)
   (171)
   (172)

2. Levees protecting the City of Marysville.
   Reach 43
   (1) From the S.F.P.R. at Simmerly Slough easterly to the Yuba River.
   (174)
   (2) Along the Yuba River from the "P" Street Bridge to the back levee near the Valley Meat Company.
   (175)

3. Levees protecting Reclamation District No. 10.
   Reach 40
   (1) Northerly levee of Simmerly Slough from the S.F.P.R. to the S.P.R.R.
   (173)
   Reach 47
   (2) Easterly levees of the Feather River from Simmerly Slough to a point 4.8 miles northerly from Simmerly Slough.
   (174)

4. Northerly levees of the Yuba River from the back levee of the City of Marysville to a point 1.3 miles easterly from said back levee.
   (176)

5. Southerly levees of the Yuba River from Feather River (i.e. S.F.P.R. easterly to the S.P.R.R. Main Line).
   (177)

6. Northerly levees of Bear River from Feather River easterly to the S.F.P.R. Interceptor.
   (178)

7. Northerly levees of the S.F.P.R. Interceptor and Clark Slough Interceptor (i.e., back levee of Reclamation District No. 784) from Bear River to the southerly end of the Clark Slough Interceptor.
   (179)
n. Southerly levees of the American River.

(1) Sixteenth Street Bridge to the S.N.R.R. 118.1

(2) From a point 800 feet easterly from the S.N.R.R. to Mayflower Station. 118.1

n. Southerly levees of the Yolo Bypass.

(1) Sacramento River to Knights Landing Ridge Cut. 127

(2) Knights Landing Ridge Cut to the northeast corner of the Cache Creek Settling Basin. 127

(3) "S.N.R.R." Woodland Branch to a point 1.6 miles southerly from said railroad. 121

(4) From a point 1.6 miles southerly from the S.N.R.R. Woodland Branch to the Willow Slough Pipes. 121

(5) From a point 1.43 miles southerly from the Willow Slough Pipes to a point 1.9 miles southerly from said pipes. 121

(6) From a point 1.9 miles southerly from the Willow Slough Pipes to the Willow Slough Interceptor. 121

(7) From the Willow Slough Interceptor to Highway U.S. 40. 120

(8) From Highway U.S. 40 to Putah Creek. 119

n. Eaterly and Wasterly trainine levees of Cache Creek Settling Basin from Cache Creek southerly. 120

n. Northerly and Southerly levees of the Willow Slough Interceptor from the S.P.N.R.R. to the Yolo Bypass 120

n. Northerly levee of Putah Creek from Yolo Bypass wasterly to high ground. 119

n. Southerly levee of Putah Creek from high ground on Dixon Ridge wasterly to high ground. 119

n. Southerly levees of Knights Landing Ridge Cut. 127

(1) From Yolo Bypass wasterly 600 feet. Also covered under Unit 96-A

(2) From a point 2,500 feet wasterly from Yolo Bypass to a point 2,800 feet wasterly from Yolo Bypass. 127

Also covered under 96-A

S. Southerly levees of Knights Landing Ridge Outfall (cont'd)

(3) From a point 3,500 feet westerly from Yolo Bypass to a point 7,100 feet westerly from Yolo Bypass.

Also covered under Unit No. 46-A

107

That portion of the back or westerly levees of Hastings Tract which runs east and west along the County Road for a distance of approximately one mile.

130

u. Northerly levees of Sycamore Slough from Sacramento River to Knights Landing Outfall Gates.

132

v. Southerly levees of Sycamore Slough from Sacramento River to Knights Landing Outfall Gates.

The records of this office show that your Board has accepted the levees and/or works covered by Items b_4(1), b_6(1), b_8(2), c_8(2), c_8(4), c_8(5), c_8(11), c_8(12), c_8(14), d_8(1), d_8(3), d_8(8), e_8(3), e_8(5), e_8(13), e_8(22), e_8(24), e_8(25), e_8(26), e_8(27), e_8(29), e_8(30), e_8(31), f_8(1), f_8(2), f_8(4), f_8(6), f_8(7), f_8(9), f_8(10), f_8(15), f_8(16), f_8(25), g_8(2), g_8(3), g_8(4), g_8(5), h_8(2), h_8(3), h_8(4), h_8(5), h_8(6), i_8(1), i_8(2), i_8(3), i_8(4), j_8, k_8, l_8, m_8, n_8, n_8(2), n_8(3), o_8(2), o_8(3), p_8, q_8, q_8, r_8, s_8(1), s_8(2), t_8, u_8, and v_8 above, as complete. Accordingly the waterway bank contiguous to said Items is hereby transferred to the State of California for maintenance and operation.

The levees covered by Items b_4(4), c_4(1), c_4(3), c_4(5), c_4(6), c_4(7), c_4(9), c_4(10), c_4(13), c_4(15), c_4(16), d_4(2), e_4(2), f_4(1), f_4(3), f_4(4), f_4(6), f_4(7), f_4(9), f_4(10), f_4(15), f_4(16), g_4(2), g_4(3), g_4(4), g_4(5), h_4(2), h_4(3), h_4(4), h_4(5), i_4(1), i_4(2), i_4(3), i_4(4), j_4, k_4, l_4, m_4, n_4, n_4(2), n_4(3), o_4(2), o_4(3), p_4, q_4, q_4, r_4, s_4(1), s_4(2), t_4, u_4, and v_4 above, although complete has not been formally transferred as contemplated by the Project documents. Accordingly the levees covered by said Items, together with the waterway bank contiguous thereto, is hereby transferred to the State of California for maintenance and operation.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress approved 22 June 1936, as amended and supplemented. As provided under paragraph 308.10(10) of these regulations, a maintenance manual covering these works is in process of preparation and will be furnished your Board upon completion.

A copy of this letter is being transmitted to the State Engineer.

FOR THE DISTRICT ENGINEER:

Sincerely yours,

H. R. Riefenstahl
Lt. Colonel, Corps of Engineers
Executive Officer
RESOLUTION
ADOPTED BY THE RECLAMATION BOARD
FEBRUARY 6, 1946

WHEREAS The Reclamation Board on February 6, 1946, did approve a certain item of "new construction", said work consisting of the construction of the Bear River levees from Western Pacific Railroad upstream four miles, South Dry Creek levees upstream from its mouth two miles, East levees, Western Pacific Intersecting Canal and South levees of North Dry Creek; and

WHEREAS the War Department, U. S. Engineer Office, District Engineer, under date of January 25, 1946, has notified The Reclamation Board of the completion of such work of "new construction" and its desire to turn over to The Reclamation Board such work as completed, for maintenance by the proper local interests; and

WHEREAS the Chief Engineer of The Reclamation Board has caused to be made inspection on the ground of such work of "new construction", and has found and determined that such work, as completed, has been prosecuted and carried out in conformance with the plans and specifications therefor; now, therefore, be it

RESOLVED AND ORDERED, That The reclamation board does hereby accept, for the State of California, the said item of "new construction" as aforesaid, which has, on the date hereinabove set forth, been turned over to said Board by the War Department, U. S. Engineer Office; and be it further

RESOLVED AND ORDERED, That the south levee of Bear River, together with the channel of said river, be turned over to Reclamation District No. 1001 for maintenance and operation, as the legally authorized function of said District; and be it further
RESOLVED AND ORDERED, That the north levees of Bear River upstream from the mouth of South Dry Creek, together with the channel of said river in that vicinity and the levees of South Dry Creek, together with the channel of said creek, be turned over to Reclamation District No. 817 for maintenance and operation, as the legally authorized function of said District; and be it further

RESOLVED AND ORDERED that the North levees of Bear River downstream from the mouth of Dry Creek, the east levees of the Western Pacific Intercepting Canal and the South levees of North Dry Creek, together with the channels adjacent to said levees, be turned over to Reclamation District No. 784, for maintenance and operation, as the legally authorized function of said District.

STATE OF CALIFORNIA 
COUNTY OF SACRAMENTO 
Office of The Reclamation Board

I, GEORGE H. HOLMES, Secretary of the Reclamation Board, do hereby certify that the above and foregoing is a true and correct copy of a resolution duly passed and adopted by said Board at its meeting held February 6, 1946.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of The Reclamation Board this 6/15 day of February, 1946.

GEORGE H. HOLMES
Secretary
The Reclamation Board

Manual No. 5
Exhibit "F"
Maintenance of the Bear River Levee System

The Reclamation Board
1100 "Q" Street
Sacramento, California

Gentlemen:

Enlargement has been completed of the Bear River Levee System in the vicinity of Rio Oso and Wheatland, California. Therefore, in accordance with established procedure, this portion of completed levees is hereby transferred to the State of California for maintenance.

This construction forms an integral part of the Sacramento River Flood Control Project. The details and extent of the work are shown on inclosed drawing No. 2-4-106 in six sheets, entitled "Proposed Levee Enlargement, Bear River Levees from W.P.B.R.R. upstream 4 miles, South Dry Creek Levees upstream from Mouth 2 Miles, East Levee W.P.B.R.R. Intercepting Channel and South Levees of North Dry Creek."

There is also inclosed copy of Flood Control Regulations prescribed by the Secretary of War pursuant to the provisions of Section 3 of the Act of Congress approved 22 June 1930, as amended and supplemented, to govern the maintenance and operation of flood control works, of which the levees referred to is a part. In accordance with paragraph 206.10(10) of said regulations, at a later date this office will furnish your Board and local interests with an Operation and Maintenance Manual to assist in carrying out their obligations established by these regulations.

For the records of this office, acknowledgment of receipt of this letter is requested on or before 28 February 1946.

Copy of this letter, with inclosures, is being transmitted to the State Engineer.

2 Incls.

STATE OF CALIFORNIA

May 22, 1952

District Engineer
Sacramento District
Corps of Engineers, U.S. Army
P.O. Box 1739
Sacramento 8, California

Dear Sir:

Reference is made to your letter (1) SPKCO-P 824.3 (Sac. Riv. F.C.P.) 13 December 1951, (2) your letter SPKCO-P 824.3 (Sac. Riv. F.C.P.) 19 December 1951, and (3) your letter SPKKA 824.3 (Sac. Riv. F.C.P.) 13 December 1951, transferring 101 reaches of levee and contiguous banks to the Reclamation Board for flood control operation and maintenance.

On January 2, 1952, The Reclamation Board accepted the transfer of the reaches of levee listed in first tabulation attached and did not accept those reaches of levee and contiguous bank in the second tabulation.

Yours very truly

THE RECLAMATION BOARD

By /s/ A. M. Barton
A. M. BARTON

Chief Engineer and General Manager
January 2, 1952

The Board accepted the transfer from the Corps of Engineers, in letters as listed below, the following reaches of levees and their contiguous waterway banks, where applicable, for flood control operation and maintenance, as complete and meeting the requirements of the Sacramento River Flood Control Project:

THE RECLAMATION BOARD  
of the  
STATE OF CALIFORNIA  

District Engineer  
Sacramento District  
U.S. Corps of Engineers  
P.O. Box 1739  
Sacramento, California  

Dear Sir:  

Reference is made to your SPKKO-P 824.3 (Sac. Riv F.C.P.) dated 2 October 1952, transferring certain completed levee units, together with the patrol roads thereon and with the waterway banks contiguous thereto, to the State of California for operation and maintenance.  

The Reclamation Board at its meeting December 2, 1952, accepted said levee units on behalf of the State of California.  

The units so accepted are:  

Part "I" - Southerly Levee of Bear River:  

From Station 46+80 to 363+70, levee and patrol road along the left bank of Bear River from a point 5,400 feet upstream from Carlin Bridge upstream to high ground, near Wheatland, Yuba County, California completed 8 September 1952.  

Part "J" and "K" - Southerly and Northerly Levees of Yankee Slough:  

1. From Station 316+70 to 511+10, levee and patrol road along the left bank of Yankee Slough, from W.P.R.R. upstream to high ground, near Rio Oso, Sutter County, California, completed 24 September 1952.  

2. From Station 166+70 to 536+09, levee and patrol road along the right bank of Yankee Slough, from its junction with Bear River upstream to high ground, completed 16 September 1952.  

Very truly yours  
THE RECLAMATION BOARD  

A. M. BARTON  
Chief Engineer and General Manager

SUGGESTED SEMI-ANNUAL REPORT FORM
TO: The District Engineer  
Sacramento District  
Corps of Engineers  
1209-8th Street  
Sacramento, California  

(1 May 19__)  
(1 Nov 19__)  

Dear Sir:  

The semi-annual report for the period (1 May 19__ to 31 October 19__) (1 November 19__ to 30 April 19__) Sacramento River Flood Control Project, Unit No. 141 - Part No. 1, the east levee of the Feather River from Bear River to Natomas Cross Canal and south levee of Bear River and both levees of Yankee Slough is as follows:  

a. The physical condition of the protective works is indicated by the inspector's report, copies of which are inclosed, and may be summarized as follows:  
(Superintendent's summary of conditions)  

It is our intention to perform the following maintenance work in order to repair or correct the conditions indicated:  
(Outline the anticipated maintenance operations for the following 6 months.)  

b. During this report period, major high water periods (water level at 11.0 on the gage at Wheatland on Bear River, and 43.0 on gage at Nicolaus on the Feather River) occurred on the following dates:  

<table>
<thead>
<tr>
<th>Dates</th>
<th>Maximum Elevation</th>
