OPERATION AND MAINTENANCE MANUAL
SACRAMENTO RIVER FLOOD CONTROL PROJECT

UNIT NO. 145 - PART NO. 1

EAST LEVEE OF FEATHER RIVER,
SOUTH LEVEE OF YUBA RIVER,
BOTH LEVEES OF W.P.R.R. INTERCEPTING CHANNEL,
WEST LEVEE OF SOUTH DRY CREEK
AND NORTH LEVEE OF BEAR RIVER

SECTION I

INTRODUCTION

1-01. Location. The improvement covered by this manual is Unit No. 145 - Part No. 1 of the Sacramento River Flood Control Project which, in general, comprises levees and channels or floodways in an area that lies south of the City of Marysville and northwesterly from the town of Wheatland. Levees and channels of this unit are located in Reclamation Districts No. 784 and No. 817, in Yuba County, California, as shown on Location Map, Exhibit A-1.

1-02. Project Works. The flood control works included in this manual were authorized by the Flood Control Act of 1917 as modified by the Acts of 1928, 1937, and 1941, and consists of:

a. The south levee and channel of the Yuba River from the east boundary of Reclamation District No. 784 downstream to the junction of the Yuba and Feather Rivers, excepting therefrom a portion of the south levee of the Yuba River extending from the east boundary of Reclamation District No. 784 at approximate station 69+34 downstream to the Southern Pacific Railroad crossing at station 0+00 (see Drwg. No. 4-4-210, sheet 5 of Exhibit B).

b. The east levee and adjacent channel of the Feather River from the junction of the Yuba and Feather Rivers downstream about 13.78 miles to its junction with the north levee of the Bear River, excepting therefrom a section of levee along the Sacramento Northern Railroad extending from station 197+43 to station 145+45 as shown on Drwg. No. 4-4-210A, sheet 4 of Exhibit B.

c. The north levee and adjacent channel of the Bear River from the west levee of South Dry Creek downstream to the east levee of the Feather River, a distance of about 7.37 miles.
d. The west levee and channel of South Dry Creek extending from the Bear River upstream about 1.71 miles.

e. The west levee and adjacent channel of the Western Pacific Railroad Intercepting Channel from the Bear River upstream about 6.21 miles. Also the east levee of the Western Pacific Railroad Intercepting Channel and the south bank of North Dry Creek extending from the Bear River upstream about 4.17 miles.

Part No. 1 of Unit No. 145 completes Unit No. 145 with exception of the west levee of Clark Slough Lateral and exceptions as indicated in 1-02a and 1-02b above. At such times when the excepted portions of this Unit are completed to project standards, a revised Operations and Maintenance Manual will be written to cover the entire unit.

This manual covers and supersedes a portion of the operation and maintenance manual designated as Manual No. 5 entitled, “Bear River levee system constructed in vicinity of Rio Oso, Sutter County, California, approximately 28 miles northerly of Sacramento, California.” The portion of Manual No. 5 which is included in Unit No. 145 – Part No. 1 comprises the north levee of South Dry Creek; that portion of the north levee of the Bear River that lies between South Dry Creek and the Western Pacific Intercepting Channel; the east levee of the Western Pacific Intercepting Channel; and the South Levee of North Dry Creek.

1-03. Protection Provided. The levees as described in this unit provide direct protection to Reclamation Districts No. 784 and No. 817 and vicinity against high water of the Yuba, Feather and Bear Rivers and their tributaries. The adopted flood plane along the main channel of the Yuba River within this unit varies from elevation 81.9 at the upper end to elevation 78.2 at the junction of the Yuba and Feather Rivers; in the Feather River channel the flood plane varies from elevation 78.2 at the junction of the Yuba and Feather Rivers to 56.4 at its junction with the Bear River; the adopted flood plane of the Bear River varies from elevation 69.2 at the upper end of 56.4 at the junction of the Feather and Bear Rivers; the adopted flood plane of the South Dry Creek varies from elevation 69.2 at its upper end to 69.2 at its junction with the Bear River; and the adopted flood plane along the W.P.R.R. Intercepting Channel varies from elevation 60.0 at the upper end of the west levee to elevation 59.0 at its junction with the Bear River. (All elevations are referred to U.S. Corps of Engineer datum). The levee grade within this unit provides for a free board which equals or exceeds 3 feet. The project design capacities of the channels are as follows: Yuba River 120,000 cubic feet per second, Feather River 300,000 cubic feet per second, Bear River 40,000 cubic feet per second, W.P.R.R. Intercepting Channel 10,000 cubic feet per second, and South Dry Creek 7,000 cubic feet per second.

1-04. Construction Data and Contractor. Construction required by the U.S. Corps of Engineers to bring levees of Unit No. 145 Part No. 1 to project standards and to perform emergency repair work to locally built levees was accomplished under the following contracts:

a. Construction of the east levee of the Feather River 1-1/2 miles south of Shanghai Bend to upper end of Starr bend was accomplished under Contract No. W-1105-eng-1776 by Macco Construction Co. and completed on 19 December 1936.
b. Enlargement of the east levee of the Feather River 2.8 miles southerly from Eliza Bend to mouth of Yuba River and south levee of the Yuba River from Feather River easterly was accomplished under Contract No. W-1105-eng-2762 by the Calowell Construction Co. and completed on 30 November 1941.

c. Enlargement of the east levee of the Feather River from 2-1/2 miles above Starr Bend to Bear River and north levee of Bear River to the W.P.R.R. was accomplished under Contract No. W-1105-eng-2836 by Morrison-Knudsen co. and completed on 20 September 1941.

d. Enlargement of the west levee of the W.P.R.R. Intercepting Channel was accomplished under Contract No. W-1105-eng-3260 by Paulos & McEwen and completed on 22 December 1941.

e. Enlargement of Bear River Levees from the W.P.R.R. upstream 4 miles, South Dry Creek levees upstream from mouth 2 miles, and east levee of the W.P.R.R. Intercepting Channel was accomplished under Contract No. W-04-167-eng-633 by H. Earl Parker. Construction on this contract was started on 8 October 1944 and completed on 6 October 1945.

f. Surfacing of a portion of the Bear River and South Dry Creek levees was accomplished under Contract No. DA-04-167-eng-828 by Browne and Krull and completed on 2 December 1952.

g. Installation of relief wells, left bank Feather River, vicinity of Starr Bend in R.D. 784 was accomplished under Contract No. DA-04-167-CIVENG-56-217 by L.C. Parkinson, contractor, during the period from 4 June 1956 to 23 June 1956, Specification No. 2103-A, Drawing No. 4-1-392.

h. Levee construction on left bank of Feather and Yuba Rivers was accomplished under Contract No. DA-04-167-CIVENG-62-62 by Lee Stephens, contractor, during the period from 3 May 1962 to 17 August 1962, Specification No. 2740, Drawing No. 8-4-666.

i. Levee construction, right and left banks Bear River, W.P.R.R. Interceptor Channel and Yankee Slough was accomplished under Contract No. DA-04-167-CIVENG-63-28 by H. Earl Parker, Inc., during the period from 11 September 1962 to 18 October 1963, Specification No. 2792, Drawing No. 2-4-174.

j. Berm construction, left bank Feather River in R.D. 784 was accomplished under Contract No. DA-04-167-CIVENG-64-37 by Melvin R. Weir, contractor, during the period from 13 September 1963 to 23 December 1963, Specification No. 3016, Drawing No. 4-4-544.

k. Installation of landside toe drainage trench and levee repairs as part of PL84-99 emergency repairs, left bank Yuba River, between State Hwy 70 and Southern Pacific
Railroad tracks and left bank Feather River in R.D. 784 was accomplished under the period from 25 September 1986 to 3 November 1986 by K.G. Walters Construction in accordance with Specification No. 8031, Contract No. DACW05-86-C-0115 and Drawing No. YU-25-47.

1. PL84-99 Emergency Levee Repairs on North levee of Bear River located approximately 2.2 miles upstream from Pleasant Grove Rd. was accomplished under Contract No. DACW05-86-C-0107 by Ford Construction Company Inc., during the period from 20 September 1986 to 13 November 1986 (Ref. Drawing File No. BE-4-14, sheets 1 & 2, and Specification No. 8010). Federal cost, which included levee repairs on Yankee Slough and Natomas Cross Canal, totaled $212,997.18

m. Filling of a scour hole, plugging of a drain pipe in the scour hole and installing two toe drain risers at the landside toe of the project levee adjacent to the 1986 levee break was accomplished under Contract/Purchase Order No. DACW05-92-P-0588. See Exhibit B-1 for the plans and Exhibit B-1A for the scope of work and the specifications.

o. Removal of obstructing residual levees and channel clearing in the Feather River between Yuba and Bear River was accomplished under contract No. DA-04-167-CIVENG-62-26, Specification No. 2729 and Drawing No. 4-6-514. Work was completed on 3 November 1961.

p. Emergency repairs under authority of Public Law 99, 84th Congress, was completed on the left bank of Feather River in RD 784. Work consisted of the construction of relief wells and a landside berm and was done under Contract No. DA-04-167-CIVENG-59-29, Drawing No. 4-1-488 and was completed 10 October 1958.
1-05. Flood Flows. For purposes of this manual, the term "flood" or "high water period" shall refer to flows when the water surface in the Yuba River reaches or exceeds the reading of 66.0 on the U. S. Weather Bureau gage located on the right bank of the Yuba River on the first pier of the "D" Street Bridge at Marysville (Staff gage set on U. S. Corps of Engineers datum). On the Bear River drainage area "high water period" shall refer to flows when the water surface reaches or exceeds the reading of 11.0 on the U. S. Geological Survey gage located on the right bank of the Bear River, 100 feet downstream from the U. S. Highway 99E at Wheatland, California (Zero on this gage and on the staff gage on downstream side of highway bridge, is approximately elevation 80.4 U. S. Corps of Engineers datum).

1-06. Assurances Provided by Local Interests. Assurance of cooperation by local interests is provided by State Legislation, as contained in Chapter 3, Part 2, Division 5 of the State Water Code (see paragraph 2-02a of the Standard Manual).

1-07. Acceptance by State Reclamation Board. Responsibility for operating and maintaining the completed works of Unit No. 145 - Part No. 1 was officially accepted by the Reclamation Board of the State of California on 18 December 1951 and 2 January 1952, as shown on the attached letters of acceptance, Exhibit F.

1-08. Superintendent. The name and address of the Superintendent appointed by local interests to be responsible for the continuous inspection, operation, and maintenance of the project works shall be furnished the District Engineer, and in case of any change of Superintendent, the District Engineer shall be so notified.
SECTION II

FEATURES OF THE PROJECT SUBJECT TO FLOOD CONTROL REGULATIONS

2-01. Levees.

a. Description. The limits of the levees covered in Unit No. 145 - Part No. 1 are as described in paragraph 1-02 of this manual. The east levee of the Feather River has been enlarged to form a crown width of 20 feet and slopes of one vertical on three horizontal for both riverside and landside slopes. The slab levee along the W.F.R.R. at the Intercepting Channel has a crown width of 12 feet. All other levees within this unit have been enlarged to form a crown 20 feet wide, a landside slope of one vertical on two horizontal and a riverside slope of one vertical on three horizontal. Construction also included a gravel road surfacing 12 feet wide on top of the levee with turnouts at 1,000 - foot intervals, 50 feet long and 18 feet wide, and the necessary drainage structures, road approaches and appurtenances. For more complete detail of items included in construction of above mentioned levees reference is made to the "As Constructed" drawings of Exhibit B. Structures affecting levee maintenance are listed in Exhibit E.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(1) Maintenance - paragraph 4-02 of the Standard Manual.

(2) Check Lists - Exhibit E of this Supplement Manual.

(3) Operation - paragraph 4-04 of the Standard Manual.

(4) Special Instructions - paragraph 4-05 of the Standard Manual.

2-02. Drainage and Irrigation Structures.

a. Description. Drainage and irrigation structures which extend through the levee are listed as follows:

Notes on Gate Model Numbers:

Gate Model No. 100 is a Calco automatic drainage gate or outlet end of pipe. It closes against face pressure and opens automatically to permit outflow when pressure is released.

Gate Model No. 101 is a Calco slide gate which operates by handscrew on a steel frame.

Gate Model No. 1001 is a combination gate which includes the features of gates No. 100 and 101.

Abbreviations are as follows:

- C.M.P. = Corrugated Metal Pipe
- R.S. = Riverside
- L.S. = Landside
- W.P.R.R. = Western Pacific Railroad
b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(2) Check Lists - Exhibit E of this Supplement Manual.

2-03. Channels.

a. Description. The main channels of the Yuba River, Feather River, Bear River, South Dry Creek, the Western Pacific Railroad Intercepting Channel and North Dry Creek for this unit lie adjacent to levees as described in paragraph 1-02. The project design capacities of channels within this unit are as listed in paragraph 1-03 of this manual.

The maintenance and operation of the channel of the Feather River, within this unit, shall be limited to flood control, and the requirements which follow shall be observed only to that extent.

b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(2) Check Lists - Exhibit E of this Supplement Manual.

It shall be the duty of the Superintendent to maintain a patrol of the project works during all periods of flood in excess of a reading of 66.0 on the gage located at the "D" Street Bridge at Marysville or a reading of 11.0 on the gage located near U. S. Highway 99E at Wheatland as indicated in paragraph 1-05 of this manual. The Superintendent shall dispatch a message by the most suitable means to the District Engineer whenever the water surface in the Yuba River or the Bear River reaches the gage readings indicated above. The Superintendent shall cause readings to be taken at said gages at intervals of two to four hours during the period when the water surface is above the flood-flow stages indicated above and record the time of observations. One copy of the readings shall be forwarded to the District Engineer immediately following the flood, and
a second copy transmitted as an inclosure to the semi-annual report in compliance with paragraph 3-06 of the Standard Manual.

2-04. Miscellaneous Facilities.

a. Description. Miscellaneous structures or facilities which were constructed as a part of, or existed in conjunction with the protective works, and which might affect their functioning, include the following:

(1) Bridge Crossings:

(a) Southern Pacific Railroad Bridge crossing the Yuba River at station 0+00 near Marysville.

(b) U. S. Highway 99E Bridge crossing the Yuba River at 57th Street (Marysville).

(c) Western Pacific Railroad Bridge crossing the Yuba River at station 212+56 near Marysville.

(d) Sacramento Northern Railroad Bridge crossing the Yuba River at station 197+80 at Marysville.

(e) County Highway Bridge crossing the Bear River at station 41+30 near Rio Oso (Rio Oso to Marysville Road).

(f) Sacramento Northern Railroad Bridge crossing the Bear River at station 420+78 near Rio Oso.

(g) Western Pacific Railroad Bridge crossing the Bear River at station 395+73 near Rio Oso.

(2) Utility Relocations. Because of the nature of the construction of the levees by local interests, no records of any utility relocations are available.

(3) Hydrographic Facilities.

(a) A continuous water stage recorder and staff gage to be maintained by the U. S. Weather Bureau that is located on the right bank of the Yuba River on the first pier of the "p" Street Bridge at Marysville.

(b) A continuous water stage recorder and staff gage to be maintained by the U. S. Geological Survey that is located on the right bank of the Bear River, 100 feet downstream from the U. S. Highway 99E at Wheatland, California.
b. For pertinent Requirements of the Code of Federal Regulations and other requirements see the following:

(2) Check Lists - paragraph 7-03 of the Standard Manual.

2-05.

a. Vegetation preserved as a part of selective clearing on the waterside berm or slope above the bank protection during prosecution of the contract shall not be removed as a part of normal maintenance. Dead trees with wildlife value will be retained except where they constitute a hazard to existing flood control works.

2-05.

b. The rock filled drain (2050 lineal feet), the two PVC risers with covers, and the piezometer constructed adjacent to the landside levee toe (refer to paragraphs 1-04. k. and 1-04. m. of this manual) shall remain in place and be undisturbed by maintenance activities. The toe drain area shall be kept free of growth of trees, brush and other items that may affect the performance of the drains or obstruct inspection during floods and general inspection activities. The risers and covers and the piezometer shall be protected and preserved from damage or destruction. Any damage to these facilities shall be repaired.
SECTION III

REPAIR OF DAMAGE TO PROJECT WORKS AND

METHODS OF COMBATING FLOOD CONDITIONS

3-01. Repair of Damage. In the event of serious damage to the project works, whether due to flood conditions or other causes, and which may be beyond the capability of local interests to repair, the Superintendent will contact a representative of the Division of Water Resources, State of California, who coordinates maintenance of project works of the Sacramento River Flood Control Project. The State representative will give assistance or advice, or will determine appropriate action to be taken.

3-02. Applicable Methods of Combating Floods. For applicable methods of combating flood conditions, reference is made to Section VIII of the Revised Standard Manual, where the subject is fully covered.

SCOUR HOLE REPAIR
LINDA, CALIFORNIA

CONSTRUCTION NOTES:
1. CONTRACTOR SHALL ESTABLISH BASE LINES FOR SURVEYS AND CONSTRUCTION PURPOSES. WHERE LIMITS OF SITE OR AS DIRECTED BY THE CONTRACTING OFFICER.
2. EXISTING LIMITS OF SITE WILL BE SHOWN IN THE FIELD BY A GOVERNMENT REPRESENTATIVE.
3. CONTRACTOR TO EXERCISE CAUTION IN CROSSING SITE OF CALIFORNIA DEPARTMENT OF TRANSPORTATION, ASPHALT HIGHWAY OR STATE HIGHWAY 101. CONSTRUCTION ACCESS ROUTE SHALL BE SHOWN TO THE SATISFACTION OF THE CONTRACTOR AND SHALL BE REPLACED AT NO ADDITIONAL COSTS TO THE GOVERNMENT.
4. EXISTING MATERIALS SHALL BE AVAILABLE AT THE PROJECT SITE. MATERIALS SHALL BE STORED IN SHEROES FOR USE BY THE CONTRACTOR.
5. CONTRACTOR TO EXERCISE CAUTION IN VARIOUS ACTIVITY OF EXISTING PRESEWATER AND GROUNDWATER ELECTRICAL. "EXISTING REWATER LINES. ANY DAMAGE SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR AND SHALL BE REPLACED AT NO ADDITIONAL COSTS TO THE GOVERNMENT."
SCOPe OF WORK AND SPECIFICATIONS

PART 1

SCOUR HOLE FILL

1. GENERAL: The work covered by this section of the specifications consists of furnishing all plant, labor, and equipment and performing all operations in connection with filling the scour hole to the lines and grades indicated on the drawings, installing toe drain risers and capping the existing 6-inch PVC outfall pipe.

2. BORROW: The borrow material shall be supplied at the site by others as stated on the drawings.

3. PREPARATION OF THE FOUNDATION:

3.1 General: Prior to placement of fill material, the contractor shall precondition the scour hole foundation. Any tires, tree stumps, or miscellaneous organic materials shall be removed from the scour hole and shall become property of the contractor. The foundation shall be preconditioned with 4 passes of a tamping foot roller. If in the opinion of the Contracting Officer the foundation is too dry, it shall be pre-moistened prior to rolling with the tamping foot roller.

3.2 Drainage: The scour hole shall be kept thoroughly drained throughout the progress of the work. It is the contractor's responsibility to divert any flows away from the scour hole, and to dewater the site if necessary to accomplish the work.

4. FILL PLACEMENT:

4.1 General: Fill placement shall be brought to the indicated finished lines and grade as indicated on the drawings. Fill shall consist of material stockpiled on site by others. Fill shall be placed and compacted with a minimum of four (4) passes of a tamping foot roller as defined in paragraph 4.2. Each lift of fill shall be placed in approximately horizontal layers not to exceed a thickness of nine (9) inches. If, in the opinion of the Contracting Officer, the surface of any layer is too smooth to bond properly with succeeding layer, it shall be scarified before the succeeding layer is placed thereon.

4.2 Compaction Equipment: Tamping foot rollers shall be used to compact the fill material. The drums shall be water or sand and water ballasted and have staggered feet uniformly spaced over the cylindrical surface such as to
provide approximately three tamping feet for each two square feet of drum surface. The roller shall be equipped with cleaning fingers, so designed and attached as to prevent the accumulation of material between the tamping feet, and these cleaning fingers shall be maintained at their full length throughout the use of the roller. The weight of the roller shall be a minimum of 2000 pounds per foot of drum width. The roller shall be drawn with either a crawler type tractor or pneumatic tired equipment at speeds not to exceed 3.5 miles per hour.

5. CAPPING EXISTING 6-INCH OUTFALL PIPE: The 6-inch drain pipe shall be capped at the location shown on the drawings. The end shall be cemented with PVC cementing compound and capped with a Schedule 40 end cap.

5.1 Shoring: Shoring shall be furnished and installed as necessary to protect workmen inside the open excavation at the outfall pipe. Shoring shall be in compliance with the Corps of Engineers Manual EM 385-1-1, April 1981, Revised Oct 1987, SAFETY AND HEALTH REQUIREMENTS MANUAL. Shoring and any bracing shall be removed as the excavation is backfilled with the same material removed from the excavation.

5.2 Backfilling: After the PVC pipe has been capped, the trench excavation shall be backfilled to the original ground surface elevation. The backfill shall consist of the same material removed from the trench with lifts not to exceed four (4) inches loose thickness and compacted with two passes of a hand operated vibratory plate.

6. INSTALLATION OF TOE DRAIN RISER: The 18-inch toe drain risers shall be installed as shown on the drawings. The approximate locations of the risers are as shown on the drawings. The actual locations shall be established in the field by the Contracting Officer. The risers shall be PVC pipe with slotted open bottom as shown on the drawings. The pipe shall be Class 160 PVC which conforms to ASTM D 2241. A protective metal cover shall be provided. The cover shall be corrugated metal of 16 gage, galvanized, conforming to the requirements of Fed. Spec. WW-P-405, Class I, Shape 1. Galvanized steel for the hinged lid shall conform to the requirements of ASTM A 444. Hardware for the hinged lid shall consist of 2 1/2 inch plain hinges, type 2172G conforming to Fed Spec FF-H-116 and hasp of type FL403 conforming to Fed Spec FF-H-111.

7. PAYMENT: Payment for filling the scour hole will be paid for at the contract unit price per cubic yard.
for the item "Scour Hole Fill", which price shall include all costs of placing, compacting fill and preparing the foundation. Payment for the excavation for capping the 6-inch outfall pipe shall be paid for at the contract lump sum price for the item "Capping 6-inch Outfall Pipe," which payment shall constitute full compensation for all work to accomplish capping and backfilling the outfall pipe excavation trench. Payment for the installing the toe drain riser will be paid for at the contract lump sum price for the item "Installation of Toe Drain Risers", which price includes all costs for excavation, installation, backfilling and removal of waste material.
1. STORAGE OF MATERIALS, EQUIPMENT, OR SUPPLIES: The Contracting Officer representative shall designate a location for storage of equipment, material and supplies. The protection and storage facilities shall be the Contractor's responsibility, and only equipment and supplies approved by the Contracting Officer may be stored in the project area. All equipment and materials used by the Contractor shall be protected from public accessibility. The Contractor shall erect barriers and post necessary warning signs. If the Contracting Officer's representative determines that additional barriers and/or warning signs are necessary, the Contractor shall install such barriers and/or signs at no additional cost to the Government.

2. WATER AND SANITARY FACILITIES: The Contractor shall locate the nearest available non-potable water. No sanitary facilities are located at the project site.

3. NONCOMPLIANCE WITH CONTRACT: The Contracting Officer representative will notify the Contractor of any noncompliance with the contract and the actions to be taken. The Contractor; shall, after receipt of such notice, immediately take corrective action. Such notice, when delivered to the Contractor or his or her Representative at the site of the work, shall be deemed sufficient for the purpose. If the Contractor fails or refuses to comply promptly, the Contracting Officer's representative may issue an order stopping all or part of the work until satisfactory corrective action is taken. No part of the time lost due to any stop orders shall be made to the subject of claim for extension of time on or for excess costs or damages by the Contractor.

4. DAMAGE TO ROADS: The Contractor shall preserve and protect all existing private or project access or right-of-way roads. At the completion of work and prior to the Contractor leaving the project, he/she shall restore to pre-project conditions all such roads.

5. QUANTITY SURVEYS: Quantity surveys shall be conducted by a licensed surveyor, and the data derived from these surveys shall be used in computing the quantities of work performed and actual construction completed and in place. The Contractor shall conduct the original and final surveys. The Government shall make computations as are necessary to determine the quantities of work performed or finally in place. Promptly after completion of the survey, the Contractor shall furnish the originals of all field...
notes and all other records relating to the survey or to the layout of the work to the Contracting Officer. The Contractor shall retain copies of all such material furnished to the Contracting Officer.

6. CONSTRUCTION PERIOD: All construction shall be completed not later that 14 calendar days from notice to proceed.

7. SITE VISIT: A tour of the project site may be arranged by telephoning the Sacramento District, Corps of Engineers, Mr. Bill Fakes, (916) 557-6609.

INSTRUCTIONS FOR COMPLETING SHEET 2, EXHIBIT E

Item (a) Indicate levee station of observation, obtained by pacing from nearest reference point; indicate right or left bank.

Item (b) If sufficient settlement of earthwork has taken place to be noticeable by visual observation, indicate amount of settlement in tenths of a foot. If sloughing has caused a change in slope of the embankment sections, determine the new slope. Note areas where erosion of gullying of the section has occurred.

Item (c) If sufficient erosion or gullying of back face of back toe of levee has taken place to be noticeable by visual inspection, indicate area affected and depth.

Item (d) Note any natural change in any section of roadway or ramps. Indicate any inadequacy in surface drainage system.

Item (e) Indicate any evidence of seepage through the embankment section.

Item (f) Indicate the serviceability of all farm gates across the embankments and roadway, and indicate if repainting is required.

Item (g) Indicate maintenance measures that have been performed since last inspection and their condition at the time of this inspection.

Item (h) Record opinion, if any, of contributory causes for conditions observed and also any observations not covered under other columns.

NOTE: One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion, and one copy is to be attached to and submitted with the Superintendent's semi-annual report.

INSTRUCTIONS FOR COMPLETING SHEET 4, EXHIBIT E

Item (a) Indicate station of observation obtained by pacing from nearest reference point.

Item (b) Note nature, extent, and size of vegetal growth within the limits of flood flow channel.

Item (c) Note nature and extent of debris and refuse that might cause clogging of the conduits of the irrigation intake works, fouling of theainter gates, or the bridges over the channel.

Item (d) Report any construction along the diversion channel or above the diversion channel or above the diversion works that has come to the attention of the inspector and that might affect the functioning of the project.

Item (e) Indicate any change in grade or alignment of the channels, either by deposition or sediment or scour, that is noticeable by visual inspection. Estimate amount and extent.

Item (f) Indicate any change that has taken place in the riprap such as disintegration of the rock, erosion, or movement of the rock. Note the presence of vegetal growth through the riprap.

Item (g) Note any damage or settlement of the footings of the bridges. Indicate condition of wooden structures and if repainting is required. Indicate condition of bridge approaches, headwalls, and other appurtenances.

Item (h) Indicate maintenance measures that have been performed since the last inspection and their condition at time of this inspection.

Item (i) Record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

NOTE: One copy of the Inspector's Report is to be mailed to the District Engineer immediately on completion, and one copy is to be attached to and submitted with the Superintendent's semi-annual report.

INSTRUCTIONS FOR COMPLETING SHEET 6, EXHIBIT E  
(To be printed on back of sheet 6)

(1) Enter station of all structures under Column (a) for check list.

(2) Inspect inlet, barrel, and outlet for accumulation of sediment, rubbish, and vegetal matter. Note condition under Column (c).

(3) If any settlement or damage to the pipe, barrel, or invert of the drain has occurred, estimate the location and amount. Note particularly if any backfill has come into the pipe or been disturbed. Record observations under Column (d).

(4) Inspect the concrete portions of the structures for evidence of settlement, cracks, "pop-outs", spaces, abrasive wear, or other deterioration. Record conditions under Column (e).

(5) Inspect backfill area adjacent to structure for evidence of erosion caused by overflow of the drainage structures and note conditions in Column (f).

(6) Under Column (g) indicate physical measures that have been taken to correct conditions reported in last inspection, and their condition at time of this inspection.

(7) Under Column (h) record opinion, if any, of contributory causes for conditions observed, also any observations not covered under other columns.

(8) A copy of the inspector's report is to be mailed to the District Engineer immediately on completion, and a record copy shall be attached to the Superintendent's semi-annual report.
EXHIBIT F
LETTER OF ACCEPTANCE
BY STATE RECLAMATION BOARD
Ms. Leslie M. Gallagher  
Executive Officer  
Central Valley Flood Protection Board  
3310 El Camino Avenue, Room 151  
Sacramento, CA 95821  

Dear Ms. Gallagher:

The purpose of this letter is to notify the Central Valley Flood Protection Board of the completion of an effort to update the Operation and Maintenance Manual Supplements for the Sacramento River Flood Control Project and the Lower San Joaquin River Levees and Lower San Joaquin River and Tributaries Project. These updates are a compilation of revisions made to the project over time and where we had record of a transfer letter to the Board. These updated supplements are the most current version and should be utilized as the baseline version for any future project modifications.

This process and the compiled updates have been coordinated with the Central Valley Flood Protection Board and Department of Water Resources staffs for review and comment. All comments have been addressed or incorporated into the manuals.

The Board staff has been provided a copy of the manuals in electronic format. Future updates will include entire unit supplements so updates can be seen in context with the entire unit supplement. The list of completed supplements, by the unit number and title, are attached. If you have any questions regarding this transmittal, please contact Gary Kamei at 916-557-6845.

Sincerely,

[Signature]

David G. Ray, P.E.  
Colonel, U.S. Army  
District Commander

DEPARTMENT OF THE ARMY
U.S. Army Engineer District, Sacramento
Corps of Engineers
1325 J Street
Sacramento, California 95814-2922

Flood Protection and Navigation Section

Mr. Jay Punia, Executive Officer
Central Valley Flood Protection Board
3310 El Camino Avenue, Room 151
Sacramento, California 95821

Dear Mr. Punia:

The U.S. Army Corps of Engineers has completed a portion of work under PL 84-99, Flood Control and Coastal Emergencies (FCCE) (33 U.S.C. 701n) (69 Stat. 186) for emergency management activities. Repairs were made to rehabilitate various sites within RD 784. Additional information about the repair and location of the site(s) may be found in the document titled, Project Information Report (PIR) for PL 84-99 Levee Rehabilitation, Reclamation District 784, dated August 25, 2005.

The rehabilitation work meets the requirements of the existing Operation and Maintenance Manuals (O&M) and enclosed revisions. The subject flood damage reduction project is considered complete as of the date of this letter. The repairs were completed under Contract Number W91238-08-D-0016, Task Order Number 4. As-constructed drawings and revisions to the Operation and Maintenance Manual are enclosed. The Central Valley Flood Protection Board shall continue to operate and maintain the completed Rehabilitation Effort as part of the project.

Please note that the Yuba River repair (site 20051230-025-005), as shown in the drawings, was not completed as part of this contract. The site is not part of the Federally Constructed project and not eligible for rehabilitation assistance.

If you have any questions regarding this project, please contact Ms. Paige Caldwell (916) 557-6919 or Ms. Christy Jones (916) 557-7107, Readiness Section. If you have any questions regarding this transfer, please contact Ms. Meegan Nagy at (916) 557-7257 or Mr. Robert Murakami at (916) 557-6738, Flood Protection and Navigation Section.

A copy of this letter is being furnished to Reclamation District 784, 1594 Broadway, Arboga, CA 95961.

Sincerely,

[Signature]

William J. Leady, P.E.
Colonel, U.S. Army

Colonel Laurence R. Sadoff
District Engineer
Sacramento District
U.S. Army Corps of Engineers
1325 J Street
Sacramento, California 95814-2922

Dear Colonel Sadoff:

This is in regard to your letter of July 9, 1992, in which you transferred the completed Yuba River, California, Scour Hole Repair to the State of California for operation and maintenance. The Reclamation Board, at its meeting on September 18, 1992, formally accepted the completed flood control work from the District Engineer.

The work consisted of filling of the scour hole; capping of the existing outfall pipe into the scour hole; and installation of two toe drain risers.

We concur that the specified contract work, immediately interfacing the Corps' 1986 PL-99 repair work, was completed on December 24, 1991, in a workmanlike manner in conformance with Contract No. DACW05-92-P-0588, insofar as could be determined visually.

If you have any questions concerning this letter, please contact me at the above address or have your staff contact Peter Rabbon at (916) 653-6075.

Sincerely,

Raymond E. Barsch
General Manager
July 9, 1992

Civil Projects Section A

Mr. Raymond E. Barsch
General Manager
The Reclamation Board
1416 Ninth Street, Room 455-6
Sacramento, California 95814

Dear Mr. Barsch:

This is in regard to the Yuba River, California, Scour Hole Repair. The work was performed in accordance with the Agreement of Services signed August 28, 1991, and the regulations prescribed by the Secretary of the Army. The project consisted of filling the scour hole created by the 1986 breaching of the south levee along the Yuba River near Linda, California, capping the existing outfall pipe into the scour hole, and installing two toe drain risers. The fill materials for this work, as approved by the Sacramento District, Corps of Engineers (Corps), were provided at the project site by the State of California (State).

The specified contract work, immediately interfacing the Corps' 1986 PL-99 repair work, was completed on December 24, 1991, in accordance with Contract Number DACW05-92-P-0588. The stockpiled fill material was insufficient to properly level the work area at that time, and additional fill material was subsequently placed to complete the work in accordance with the Corps' plans and specifications. As of the date of this letter, the completed project is turned over to the State which will ensure its continued operation and maintenance. It is our understanding that this area will be operated and maintained by Reclamation District 784, under the terms of its assurance agreement with The Reclamation Board.

Sincerely,

Kurt A. Schaefer
Lieutenant Colonel,
Corps of Engineers
Acting District Engineer

Members of the Board:

You are hereby notified that the Corps of Engineers has completed emergency repairs to project levees under authority of Section 5 of the Flood Control Act of August 18, 1941, as amended (Public Law 99, 84th Congress, 1st Session). The work was completed on November 3, 1986, and consisted of restoring a portion of the Yuba River left bank levee in Reclamation District 784, in accordance with Contract Number DAC-WO-86-C-0153 and Drawing Number YU-25-47. This work shall be maintained in accordance with the assurance which your Board provided for the Sacramento River Flood Control Project. This portion of the work will be added by amendment to the Operation and Maintenance Manual, Supplement Number 145, Sacramento River Flood Control Project. Copies will be furnished to your office at a later date.

Sincerely,

Wayne J. Scholl

Gentlemen:

Reference is made to the joint inspection made on 29 November 1963 of flood control work on the Feather River, a unit of the Sacramento River Flood Control Project, for the purpose of transferring it to the State of California for operation and maintenance. Reference is also made to Supplement dated 29 November 1957 to the Memorandum of Understanding entered into with the State of California under date of 30 November 1953, covering added items of work required to complete the Sacramento River Flood Control Project.

The flood control work, listed as Item No. 362 in the above referenced supplement, consists of berms construction for correcting seepage condition at two locations on the left bank of Feather River in the vicinity of Reclamation District No. 764. The work was completed on 20 December 1963 in accordance with Specification No. 3016, Contract No. DA-04-107-CIVENG-64-37 and Drawing No. 4-4-544.

The foregoing supplemental work, having been completed to current standards for the Sacramento River Flood Control Project, is hereby transferred to the State of California for operation and maintenance. A manual for this portion of the project has already been furnished, which adequately covers operation and maintenance requirements for the above item.

A copy of this letter is being transmitted to the Department of Water Resources.

Sacramento 14, California

Gentlemen:

Reference is made to the joint inspection made on 21 October 1963, of flood control work pertaining to the Sacramento River Flood Control Project for the purpose of transferring it to the State of California for operation and maintenance. Reference is also made to Supplement dated 29 November 1957 to Memorandum of Understanding entered into with the State of California under date of 30 November 1953, covering added items of work required to complete the Sacramento River Flood Control Project.

The flood control work consists of levee construction on right and left banks of Bear River, W.P.R.H. Interceptor Channel, and Yankee Slough, designated in the above referenced supplement as Items 100-16, 100-18, 100-19, 100-21, and 100-24. This work was completed on 18 October 1963, in accordance with Specification No. 2792, Contract No. DA-04-167-CIVE-M-63-28, and Drawing No. 2-4-174.

The foregoing supplemental work having been completed to current standards for the Sacramento River Flood Control Project, is hereby transferred to the State of California for operation and maintenance. A manual for this portion of the project has already been furnished which adequately covers operation and maintenance requirements for the above item.

It is also to be noted that the above work completes all of Bear River flood control work under the Sacramento River Flood Control Project.

Dear Sir:

Reference is made to your letter of August 30, 1962 concerning transfer to the State of California of levee improvement work along the left bank of the Yuba and Feather Rivers designated as Unit No. 667, which was completed in accordance with Specification No. 2740. This work consists of levee construction on the left bank of the Yuba River from River Mile 0.75 to high ground, and levee enlargement and surfacing of the left bank of the Feather River from River Mile 25.61 to 26.50.

The Reclamation Board at its meeting of September 6, 1962 formally accepted the above referred to levee improvement work for operation and maintenance.

Sincerely yours,

A. N. Murray
General Manager and Chief Engineer

HSH: jc
The Reclamation Board  
State of California  
1215 "O" Street  
Sacramento 14, California

Gentlemen:

Reference is made to the joint inspection made on 21 August 1962 of flood control work on a unit of the Sacramento River Flood Control Project for the purpose of transferring it to the State of California for operation and maintenance.

The above work, designated as Unit No. 667, consists of levee construction on left bank of Yuba River, from mile point 0.75 to High Ground; and levee enlargement and surfacing of left bank Feather River, from mile point 25.61 to 26.50. This work was completed on 17 August 1962 in accordance with Specification No. 2740, Contract No. DA-04-167-CIVENS-52-62, and Drawing No. 6-4-666.

The flood control work described above now meets the requirements of the Sacramento River Flood Control Project. Therefore, said flood control work, together with the waterway banks contiguous thereto are transferred to the State of California for operation and maintenance.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations, included herewith, which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress, approved 22 June 1936, as amended and supplemented by the current issue of the Standard Operation and Maintenance Manual for the Sacramento River Flood Control Project. As provided under Paragraph 206.10(10) of these regulations, a supplement to the Standard Operation and Maintenance Manual covering the above described unit of work is in process of preparation and will be furnished to you upon completion.

U. S. Corps of Engineers
P. O. Box 1739
Sacramento, California

Dear Sir:

Reference is made to your letter of November 13, 1961, regarding transfer to the State of California of the cleared Flood Plain of the Feather River between Yuba River and Bear River after residual levee removal and channel clearing under Corps Specification No. 2729.

The Board, at its meeting of November 16, 1961, formally accepted the above cleared channel for operation and maintenance.

Sincerely yours,

[Signature]

ROBERT W. JAMES
General Manager and Chief Counsel
The Reclamation Board
State of California
1215 9th Street
Sacramento 14, California

Gentlemen:

Reference is made to the joint inspection made on 19 October 1961 of flood control work on the Feather River, a unit of the Sacramento River Flood Control Project, for the purpose of transferring it to the State of California for operation and maintenance. Reference is also made to Supplementary dated 29 November 1957 to the Memorandum of Understanding entered into with the State of California under Date of 30 November 1953, covering added item of work required to complete the Sacramento River Flood Control Project.

The flood control work, consisting of removal of obstructing residual levees and channel clearing in the Feather River Flood Plain, between Raisin and Bear Rivers, (items listed below as indicated in the referenced supplement,) was completed on 3 November 1961 in accordance with Specification No. 2780, Contract No. BK-04-117-CW.111-62-93 and Drawing No. 6-6-974:

Item 1a--Remove obstructing residual levees in Feather River Flood Plain.

Item 1b--Clear additional obstructing traces in Feather River Flood Plain.

The foregoing supplemental work, having been completed to current standards for the Sacramento River Flood Control Project, is hereby transferred to the State of California for operation and maintenance.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations, included herewith, which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress, approved 22 June 1928, as amended and supplemented by the current issue
The Declaration Board

of the Standard Operation and Maintenance Manual for the Sacramento River Flood Control Project. As provided under paragraph 25010(10) of these regulations, a supplement to the Standard Operation and Maintenance Manual covering these units of work is in process of preparation and will be furnished to you upon completion.

A copy of this letter is being transmitted to the Department of Water Resources.

Sincerely yours,

R. H. Turner

Dear Sir:

Reference is made to your letters of February 16, 1959, SPKKO-P, and February 18, 1959, SPKGD-L, regarding the responsibility of operation and maintenance of emergency repairs to both levees of the Sutter Bypass from Wadsworth Canal to Gilsizer Slough, and to the left bank of the Feather River in Reclamation District No. 784.

The Reclamation Board, at its meeting of April 1, 1959, formally accepted the maintenance responsibility for the above indicated work.

Yours very truly

THE RECLAMATION BOARD
A. M. BARTON  
Chief Engineer and General Manager

By WILLIAM A. CARVER  
Assistant Secretary
The Reclamation Board
State of California
1215 "O" Street
Sacramento 14, California

Gentlemen:

Reference is made to the emergency repair program on the Sacramento River Flood Control Project formulated as a result of requests from local interests, joint inspections and investigations participated in by State, local and Corps of Engineers representatives.

Emergency repairs have been completed under the general authority of Public Law 99, 84th Congress, 1st Session, on the left bank of the Feather River in Reclamation District No. 764.

The emergency work consisted of the construction of relief wells and a landslide berm and was completed 10 October 1958 in accordance with Specification No. 2462, Contract No. DA-04-167-CIVENG-59-29 and Drawing No. 4-1-688.

The above work as completed is hereby transferred to the State of California for operation and maintenance as an appurtenance of the levee reach in this area transferred to the State on 5 December 1951.

A copy of this letter is being transmitted to the Department of Water Resources.

Sincerely yours,

A. E. McCOLLAM
Colonel, CE
District Engineer

Letter No. 12
The Reclamation Board  
State of California  
1215 "O" Street  
Sacramento, California  

Gentlemen:  

Reference is made to the District Engineer's letter dated 20 September 1956, relative to the joint inspection, made on 1 October 1956, of the clearing and debris removal work in the Bear River from the Feather River upstream approximately four miles.  

The clearing and debris removal work referred to above was completed on 11 October 1956 under Contract No. DA-07-165-SIVEMS-56-197, Specification No. 2032, Drawing No. 2-6-133. This work forms an integral part of the Sacramento River Flood Control Project and meets the requirements of the project; therefore said work is hereby transferred to the jurisdiction of the State of California for operation and maintenance.  

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations, enclosed herewith, which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress, approved 22 June 1936, as amended and supplemented by the current issue of the Standard Operation and Maintenance Manual for the Sacramento River Flood Control Project. As provided under paragraph 208.10 (10) of these regulations, a supplement to the Standard Operation and Maintenance Manual covering this unit of work is in process of preparation and will be furnished to you upon completion.

Gentlemen:

Reference is made to your letter of 2 July 1951 acknowledging that certain reaches of the levees of the Sacramento River Flood Control Project and the waterway bank contiguous to said levee reaches meet the requirements of the project as authorized prior to the Flood Control Act of 1944.

The levee reaches in question are located as follows:

a. Sherman Island levee of Three Mile Slough.

(1) State Highway Bridge to Sacramento River.

(2) From the State Highway Bridge, 1800 feet toward the San Joaquin River.

(3) From a point 5900 feet toward the San Joaquin River from the State Highway Bridge to a point 5900 feet toward the San Joaquin River from the State Highway Bridge.

(4) From a point 10,000 feet toward the San Joaquin River from the State Highway Bridge to the San Joaquin River.

b. Plug across Seven Mile Slough near Three Mile Slough.

c. Sherman Island levee of Seven Mile Slough and Three Mile Slough from the Plug across Seven Mile Slough southwesterly to Sacramento River.
d. Easterly levees of the Sacramento River.

(1) From a point 23,650 feet, measured along the Sherman Island levees, downstream from Three Mile Slough to a point 21,950 feet downstream from Three Mile Slough.

(2) From a point 14,850 feet, measured along the Sherman Island levees, downstream from Three Mile Slough to a point 7,700 feet downstream from Three Mile Slough.

(3) From a point 3,500 feet, measured along the Sherman Island levees, downstream from Three Mile Slough to a point 3,450 feet downstream from Three Mile Slough.

(4) From a point 5,500 feet, measured along the Sherman Island levees, downstream from Three Mile Slough to a point 700 feet downstream from Three Mile Slough.

(5) From a point 600 feet, measured along the Sherman Island levees, downstream from Three Mile Slough to Three Mile Slough.

(6) Three Mile Slough to Mile 13.56. 102.

(7) Mile 10.71 to Mile 13.5. 102

(8) Mile 13.59 to Mile 14.8 (Junction Point).

(9) Mile 14.8 (Junction Point) to Mile 16.0. 102

(10) Mile 16.1 to Mile 16.9. 103

(11) Mile 16.96 to Mile 17.8. 102

(12) Mile 17.8 to Mile 19.0. 103

(13) Mile 19.15 to Mile 19.5. 103

(14) Mile 19.5 to Mile 21.5. 102

(15) Mile 21.6 to Mile 23.6. 103

(16) Mile 26.4 to Georgiana Slough. 103

(17) Mile 26.5 to Mile 27.65. 101

(18) Mile 27.7 to Mile 28.5. 101

The records of this office show that your Board has accepted
the levees and/or works covered by Items d.16, d.15, d.13, d.12, d.13,
d.69, d.68, d.67, d.66, d.65, d.64, d.63, h.5, h.4, h.3, h.2,
h.1, h.0, i.0, n.0, n.1, n.2, o.0, o.1, o.2, q.0, q.1, q.2, r.1, s.1,
s.2, s.3, s.4, s.5, s.6, s.7, and s.8, above, as complete. Accordingly
the waterfront bank contiguous to said Items is hereby transferred to the
State of California for maintenance and operation.

The levee covered by Items a. to c. inclusive, d.1 to d.15,
inclusive, d.17, to d.27, inclusive, d.28, to d.48, inclusive,
d.49, to d.60, inclusive, d.61, d.62, d.63, d.64, d.65, d.66, d.67,
d.68, d.69, e.0, e.1, e.2, e.3, f.0, g.0, h.0, h.1, h.2, h.3,
h.4, h.5, h.6, and j. to l. inclusive, above, although complete has
not been formally transferred as contemplated by the Project documents.
Accordingly the levee covered by said Items, together with the waterway bank contiguous thereto, is hereby transferred to the State of California for maintenance and operation.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations which have been prescribed by the Secretary of the Army pursuant to Section 5 of the Act of Congress approved 22 June 1936, as amended and supplemented. As provided under paragraph 206.10(10) of these regulations, a maintenance manual covering these works is in process of preparation and will be furnished your Board upon completion.

A copy of this letter is being transmitted to the State Engineer.

The levees covered by Items a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, and u above, although complete has not been formally transferred as contemplated by the Project documents. Accordingly the levees covered by said Items, together with the waterway bank contiguous thereto, is hereby transferred to the State of California for maintenance and operation.

The maintenance work required under the provisions of the Sacramento River Flood Control Project shall be performed in accordance with existing Flood Control Regulations which have been prescribed by the Secretary of the Army pursuant to Section 3 of the Act of Congress approved 22 June 1936, as amended and supplemented. As provided under paragraph 208.10(10) of these regulations, a maintenance manual covering these works is in process of preparation and will be furnished your Board upon completion.

A copy of this letter is being transmitted to the State Engineer.

FOR THE DISTRICT ENGINEER:

Sincerely yours,

H. R. Ralston
Lt. Colonel, Corps of Engineers
Executive Officer
RESOLUTION
ADOPTED BY THE RECLAMATION BOARD
FEBRUARY 6, 1946

WHEREAS The Reclamation Board on February 6, 1946, did approve a certain item of "new construction", said work consisting of the construction of the Bear River levees from Western Pacific Railroad upstream four miles, South Dry Creek levees upstream from its mouth two miles, East levee, Western Pacific Intercepting Canal and South levees of North Dry Creek; and

WHEREAS the War Department, U. S. Engineer Office, District Engineer, under date of January 25, 1946, has notified The Reclamation Board of the completion of such work of "new construction" and its desire to turn over to The Reclamation Board such work as completed, for maintenance by the proper local interests; and

WHEREAS the Chief Engineer of The Reclamation Board has caused to be made inspection on the ground of such work of "new construction", and has found and determined that such work, as completed, has been prosecuted and carried out in conformance with the plans and specifications therefor; now, therefore, be it

RESOLVED AND ORDERED, That The Reclamation Board does hereby accept, for the State of California, the said item of "new construction" as aforesaid, which has, on the date hereinabove set forth, been turned over to said Board by the War Department, U. S. Engineer Office; and be it further

RESOLVED AND ORDERED, That the south levee of Bear River, together with the channel of said river, be turned over to Reclamation District No. 1001 for maintenance and operation, as the legally authorized function of said District; and be it further
RESOLVED AND ORDERED, That the north levee of Bear River upstream from the mouth of South Dry Creek, together with the channel of said river in that vicinity and the levees of South Dry Creek, together with the channel of said creek, be turned over to Reclamation District No. 617 for maintenance and operation, as the legally authorized function of said District; and be it further

RESOLVED AND ORDERED that the North levee of Bear River downstream from the mouth of Dry Creek, the east levee of the Western Pacific Intersecting Canal and the South levees of North Dry Creek, together with the channels adjacent to said levees, be turned over to Reclamation District No. 784, for maintenance and operation, as the legally authorized function of said District.

STATE OF CALIFORNIA
COUNTY OF SACRAMENTO
Office of The Reclamation Board

I, GEORGE H. HOLMES, Secretary of the Reclamation Board, do hereby certify that the above and foregoing is a true and correct copy of a resolution duly passed and adopted by said Board at its meeting held February 6, 1946.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of The Reclamation Board this 6/15 day of February, 1946.

GEORGE H. HOLMES
Secretary
The Reclamation Board

Manual No. 5
Exhibit "F"
Maintenance of the Bear River Levee System

The Reclamation Board
1100 "O" Street
Sacramento, California

Gentlemen:

Enlargement has been completed of the Bear River Levee System in the vicinity of Rio Oso and Wheatland, California. Therefore, in accordance with established procedure, this portion of completed levee is hereby transferred to the State of California for maintenance.

This construction forms an integral part of the Sacramento River Flood Control Project. The details and extent of the work are shown on enclosed drawing No. 2-4-108 in six sheets, entitled "Proposed Levee Enlargement, Bear River Levees from W.P.R.R. upstream 4 miles, South Dry Creek Levees upstream from Mouth 2 Miles, East Levee W.P.R.R., Intercepting Channel and South Levees of North Dry Creek."

There is also enclosed copy of Flood Control Regulations prescribed by the Secretary of War pursuant to the provisions of Section 3 of the Act of Congress approved 22 June 1936, as amended and supplemented, to govern the maintenance and operation of flood control works, of which the levee referred to is a part. In accordance with paragraph 208.10(10) of said regulations, at a later date this office will furnish your Board and local interests with an Operation and Maintenance Manual to assist in carrying out their obligations established by these regulations.

For the records of this office, acknowledgment of receipt of this letter is requested on or before 28 February 1946.

Copy of this letter, with inclosures, is being transmitted to the State Engineer.

Sacramento District
Corps of Engineers, U. S. Army
P. O. Box 1739
Sacramento 8, California

Dear Sir:

Reference is made to your letter (1) SPKKG-P 824.3 (Sac. Riv. F.C.P.) 13 Dec 1951, (2) your letter SPKKG-P 824.3 (Sac. Riv. F.C.P.) 19 Dec 1951, and (3) your letter SPKKA 824.3 (Sac. Riv. F.C.P.) 13 Dec 1951, transferring 101 reaches of levee and contiguous banks to The Reclamation Board for flood control operation and maintenance.

On January 2, 1952, The Reclamation Board accepted the transfer of the reaches of levee listed in first tabulation attached and did not accept those reaches of levee and contiguous bank in the second tabulation.

Yours very truly,

The Reclamation Board

/s/ By A. M. Barton

District Engineer
Sacramento District
Corps of Engineers, U.S. Army
P.O. Box 1739
Sacramento 6, California

Dear Sir:

Reference your letters file No. SPKKO-P 824.3 (Sac.R.F.G.P.) dated 1 December 1951, 3 December, 1951, 4 December, 1951, three letters dated 6 December, 1951, 7 December, 1951 and six letters dated 8 December, 1951. Subject letters transferred to The Reclamation Board for operation and maintenance, various levee units of the Sacramento Flood Control Project.

The Reclamation Board at its 18 December, 1951 meeting on behalf of the State of California, accepted certain of the transferred units together with their contiguous waterway banks for operation and maintenance, and rejected others. A tabulation of the units so accepted or rejected is attached hereto.

Yours very truly,

THE RECLAMATION BOARD
A. M. BARTON
Chief Engineer and General Manager

SUGGESTED SEMIANNUAL REPORT FORM
TO: The District Engineer
Sacramento District
Corps of Engineers
1209-8th Street
Sacramento, California

(1 May 19____)
(1 Nov 19____)

Dear Sir:

The semi-annual report for the period (1 May 19____ to 31 October 19____) (1 November 19____ to 30 April 19____) Unit No. 145 - Part No. 1 of the Sacramento River Flood Control Project, the East Levee of Feather River, South Levee of Yuba River, both levees of W.P.R.R. Intercepting Channel, West Levee of South Dry Creek and North Levee of Bear River is as follows:

a. The physical condition of the protective works is indicated by the inspector's report, copies of which are inclosed, and may be summarized as follows:

(Superintendent's summary of conditions)

It is our intention to perform the following maintenance work in order to repair or correct the conditions indicated:

(Outline the anticipated maintenance operations for the following 6 months.)

b. During this report period, major high water periods (water level at 66.0 on the gage at "D" Street Marysville and 11.0 on gage in Bear River 100 feet downstream from U. S. Highway 99E at Wheatland) occurred on the following dates:

<table>
<thead>
<tr>
<th>Dates</th>
<th>Maximum Elevation</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

EXHIBIT G
Sheet 1 of 2
Comments on the behavior of the protective works during such high water periods are as follows:
(Superintendent's log of flood observations)

During the high water stages when the water level reached a height of __________, on the gage or excess thereof (dates) ______, it was necessary to organize and carry out flood operations as follows:
(See Maintenance Manual __________.)

c. The inspections have indicated (no) or (the following) encroachments or trespasses upon the project right-of-way.

d. (No) (______) permits have been issued for (the following) improvements or construction within the project right-of-way.

Executed copies of the permit documents issued are transmitted for your files.

e. The status of maintenance measures, indicated in the previous semi-annual report as being required or as suggested by the representatives of the District Engineer, is as follows:
(Statement of maintenance operations, item by item with percent completion.)

f. The fiscal statement of the Superintendent's operations for the current report period is as follows:

<table>
<thead>
<tr>
<th>Labor</th>
<th>Material</th>
<th>Equipment</th>
<th>Overhead</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Inspection</td>
